24. Notification regarding registration in System for Award Management (SAM) database. **The contractor is registered and active in SAM**

Course Title	ASFC-100-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Agile Scrum - Foundation Certificate ProgramThis Agile Scrum Foundation Certificate Program course is designed to introduce students to the Agile and Scrum frameworks. Price for Additional Student \$ 982
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$4,791.25
Course Title	ASFC-100-Public
Course Description	2 Day Public Class (Price for 1 student) Agile Scrum - Foundation Certificate ProgramThis Agile Scrum Foundation Certificate Program course is designed to introduce students to the Agile and Scrum frameworks. Price for Additional Student \$ 1228
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1,197.81
Course Title	SCRM-125-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Certified Scrum MasterA Certified ScrumMaster helps project teams properly use Scrum, increasing the likelihood of the project's overall success. CSMs understand Scrum values, practices, and applications and provide a level of knowledge and expertise above and beyond that of typical project managers. CSMs act as 'servant leaders,' helping the rest of the Scrum team work together and learn the Scrum framework. CSMs also protect the team from both internal and external distractions. By earning a Certified ScrumMaster certification you: Expand your career opportunities by staying relevant and marketable across all industry sectors adopting Agile practices. Demonstrate to employers and peers your attainment of core Scrum knowledge. Learn the foundation of Scrum and the scope of the Certified ScrumMasters role from the best minds in Scrum. Engage with a community of recognized Scrum experts who are committed to continuous improvement. The agile Scrum development process continues to gain popularity across a wide variety of businesses and products. Becoming a champion of the Scrum development process puts you in the front seat of organizational change management. A ScrumMaster is a coach, facilitator, teacher, and mentor. Learn how to kick-start these skill sets to get your team off and running with Scrum. This two-day course provides you with the full context of what it means to be agile and how we can get there with the use of a core framework called Scrum. Many teams have individuals with experiences that are far and wide in the agile space; diluting a common understanding for your organization. This course is designed to give you a hands-on understanding of current agile concepts and how implementing the Scrum framework can actually accelerate your team's ability to ship software as frequently as the business desires. With the liberal use of exercises, games, and discussions, team members learn why Scrum's seemingly simple processes can have a profound effect on the organization. You will also learn practical advice you can leverage all the way from the trenches to the Executive offices. We focus on working with core Scrum techniques and activities; including the product backlog, sprint backlog, metrics, daily scrum meetings, sprint planning meeting, sprint review meeting, sprint retrospectives, and burn-down charts. Price for Additional Student \$ 1050
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5119.03

Course Title	SCRM-140-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Advanced Certified ScrumMaster Online Workshop Details: Online/Virtual Workshops will be conducted with technology supplied by Big Agile. Online/Virtual Requirements: To obtain an optimum class experience, technology will be used to ensure proper learning objectives by the Scrum Alliance are met as well as an interactive/hands-on learning experience to maximize collaboration and exploration of topics. The technology used will encompass some video lectures to be viewed prior to the live session workshop topics. The live sessions will largely be reserved for interactive sessions; practicing the topics we learned in the video lecture. In order to achieve certification, attendees must complete the following: Lecture Series Videos Attend all live sessions for the entire duration Be active/engaged with video and audio technology Satisfy all Scrum Alliance criteria for the certification Example of technology typically used to foster an interactive workshop: Zoom Pro with Breakout Teams Mural for Team Based Collaboration Mentimeter for interactive discussion and quizzes Teachable for Big Agile Video Lecture Series Page Requirements: Hold a Certified ScrumMaster (CSM) certification with the Scrum Alliance. Attend a certified A-CSM educational offering to gain techniques and skills that go beyond the basics and mechanics of Scrum, expanding into interaction, facilitation, coaching, and team dynamics. Successfully complete all educator-designed components of an approved educational offering. This may include pre- or post-course work as deemed necessary by your approved educator to complete the learning objectives. Accept the A-CSM License Agreement and complete your Scrum Alliance membership profile. Validate at least 12 months of work experience specific to the role of Scrum Master (within the past five years). Maintain your A-CSM by earning Scrum Education Units (SEUs) and renewing your certification every two years. NOTE: You may take the A-CSM course at any time after completing your CSM certification and must have at least 12 months of Scrum Master experience logged into your Scrum Alliance profile before you are eligible to receive your A-CSM certification. Max. Participants	1
GSA Price (inc. IFF)	\$540.39
Course Title	AWS-116-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) Security Engineering on AWSThis Security Engineering on AWS course demonstrates how to efficiently use AWS security services to stay secure in the AWS Cloud. The course focuses on the security practices that AWS recommends for enhancing the security of your data and systems in the cloud. It highlights the security features of AWS key services including compute, storage, networking, and database services. Students will also learn how to leverage AWS services and tools for automation, continuous monitoring and logging, and responding to security incidents. Price for Additional Student \$ 1328

Course Length	3 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$6476.78

Course Title	AWS-132-Private/Onsite

Course Description	4.5 Day Private/Onsite Class (Price for 8 students) Architecting on AWS - AcceleratorThis Architecting on AWS - Accelerator course covers all aspects of how to architect for the cloud over four-and-a-half-days. It covers topics from Architecting on AWS and Advanced Architecting on AWS to offer an immersive course in cloud architecture. Students will learn how to design cloud architectures, starting small and working to large-scale enterprise level designsand everything in between. Starting with the Well-Architected Framework, they will learn important architecting information for AWS services including: compute, storage, database, networking, security, monitoring, automation, optimization, benefits of de-coupling applications and serverless, building for resilience, and understanding costs. Price for Additional Student \$ 2214
Course Length	4.5 Day

Course Title	AWS-143-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) DevOps Engineering on AWSDevOps Engineering on AWS teaches students how to use the combination of DevOps cultural philosophies, practices, and tools to increase your organizations ability to develop, deliver, and maintain applications and services at high velocity on AWS. This course covers Continuous Integration (CI), Continuous Delivery (CD), infrastructure as code, microservices, monitoring and logging, and communication and collaboration. Hands-on labs give you experience building and deploying AWS CloudFormation templates and CI/CD pipelines that build and deploy applications on Amazon Elastic Compute Cloud (Amazon EC2), serverless applications, and container-based applications. Labs for multi-pipeline workflows and pipelines that deploy to multiple environments are also included. Price for Additional Student \$ 1328

Course Title	AWS-175-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Practical Data Science with Amazon SageMakerIn this intermediate-level Practical Data Science with Amazon SageMaker course, you will learn how to solve a real-world use case with Machine Learning (ML) and produce actionable results using Amazon SageMaker. This course walks through the stages of a typical data science process for Machine Learning from analyzing and visualizing a dataset to preparing the data, and feature engineering. Individuals will also learn practical aspects of model building, training, tuning, and deployment with Amazon SageMaker. Real life use case includes customer retention analysis to inform customer loyalty programs. Price for Additional Student \$ 443

Course Title	AWS-180-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) Running Containers on Amazon Elastic Kubernetes Service (Amazon EKS) Amazon EKS makes it easy for students to run Kubernetes on AWS without needing to install, operate, and maintain their own Kubernetes control plane. In this course, students will learn container management and orchestration for Kubernetes using Amazon EKS. They will build an Amazon EKS cluster, configure the environment, deploy the cluster, and then add applications to their cluster. They will manage container images using Amazon Elastic Container Registry (ECR) and learn how to automate application deployment. They will deploy applications using CI/CD tools. They will learn how to monitor and scale their environment by using metrics, logging, tracing, and horizontal/vertical scaling. They will learn how to design and manage a large container environment by designing for efficiency, cost, and resiliency. They will configure AWS networking services to support the cluster and learn how to secure their Amazon EKS environment. Price for Additional Student \$ 1328

Course Title	AWS-195-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) Exam Readiness Intensive Workshop: AWS Certified Solutions Architect - AssociateThis five-day, instructor-led course helps busy architects get away from the day-to-day to get focused and ready for their AWS Certified Solutions Architect Associate exam. Attendees learn the fundamentals of building IT infrastructure on AWS, so they can build scalable and resilient solutions in the cloud, by spending the first 3 days on the Architecting on AWS course. Theyll start getting in the exam readiness mindset with bonus end of module quizzes. Next, theyll learn strategies to answer exam questions and avoid common mistakes with the Exam Readiness: AWS Certified Solutions Architect Associate half-day course. The course broadens attendees knowledge of AWS services with deep dives into Amazon Redshift, Amazon Kinesis, and AWS Key Management Service, and then concludes with two quizzes and an instructor guided review of the AWS Certified Solutions Architect Associate practice exam. Price for Additional Student \$ 2214
Course Length	5 Day

Course Title	AWS-205-Public
Course Description	1 Day Public Class (Price for 1 student) Exam Readiness: AWS Certified Database - SpecialtyThis course prepares students to take the AWS Certified Database - Specialty exam, which validates their ability to design, implement, deploy, and maintain database solutions. In this course, students will learn about the logistics of the exam and the mechanics of exam questions, and they will explore the exam's technical domains. They will review core AWS services and key concepts for the exam domains: Domain 1 - Workload Specific Database Design Domain 2 - Deployment and Migration Domain 3 - Management and Operations Domain 4 - Monitoring and Troubleshooting Domain 5 - Database Security Once they've honed their skills, they will have the chance to take a quiz that will help them assess their areas of strength and weakness so that they will know what to emphasize in their pre-exam studies. Price for Additional Student \$ 554

Course Title	F5AFM14X-Public
Course Description	2 Day Public Class (Price for 1 student) F5 Networks Configuring BIG-IP AFM: Advanced Firewall ManagerThis course uses lectures and hands-on exercises to give participants real-time experience in setting up and configuring the BIG-IP Advanced Firewall Manager (AFM) system. Students are introduced to the AFM user interface, stepping through various options that demonstrate how AFM is configured to build a network firewall and to detect and protect against DoS (Denial of Service) attacks. Reporting and log facilities are also explained and used in the course labs. Further Firewall functionality and additional DoS facilities for DNS and SIP traffic are discussed. Price for Additional Student \$ 1632
Course Length	2 Day

Course Title	GCP-111-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Preparing for the Associate Cloud Engineer ExaminationThis one-day instructor-led course helps prospective candidates structure their preparation for the Associate Cloud Engineer exam. The session will cover the structure and format of the examination, as well as its relationship to other Google Cloud certifications. Through lectures, demos and hands-on labs, candidates will familiarize themselves with the domains covered by the examination. An Associate Cloud Engineer deploys applications, monitors operations, and manages enterprise solutions. With a shortage of cloud expertise in the job market, one which is projected to last for the next several years, Google Cloud certifications can be a way to differentiate yourself from the rest and prove you have not only the technical knowledge, but the skills required to do the job. This course by itself will not prepare a candidate to pass the Associate Cloud Engineer certification exam. It will, however, help the candidate better understand the areas covered by the exam and navigate the recommended resources provided by Google and Qwiklabs for preparing to take the exam, so they can formulate their own personal study plan. Price for Additional Student \$ 390
Course Length	1 Day
Min. Participants	1
Max. Participants	8

Course Title	GCP-335-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) Machine Learning with TensorFlow on Google Cloud PlatformWhat is machine learning, and what kinds of problems can it solve? What are the five phases of converting a candidate use case to be driven by machine learning, and why is it important that the phases not be skipped? Why are neural networks so popular now? How can you set up a supervised learning problem and find a good, generalizable solution using gradient descent and a thoughtful way of creating datasets? Learn how to write distributed machine learning models that scale in Tensorflow, scale out the training of those models. and offer high-performance predictions. Convert raw data to features in a way that allows ML to learn important characteristics from the data and bring human insight to bear on the problem. Finally, learn how to incorporate the right mix of parameters that yields accurate, generalized models and knowledge of the theory to solve specific types of ML problems. You will experiment with end-to-end ML, starting from building an ML-focused strategy and progressing into model training, optimization, and productionalization with hands-on labs using Google Cloud Platform. Price for Additional Student \$ 2181

Course Title	CSAM-101-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) CSAM: Certified Software Asset ManagerThe IAITAM Certified Software Asset Manager (CSAM) course is a foundational education program that ensures students are able to manage software assets. Students also learn about the ever-changing variables throughout our industry. From software piracy and compliance issues to legislation and organizational challenges, it is necessary to evaluate both the internal and external influences that bring about change in how organizations manage their IT assets. A successful Software Asset Manager must look at the overall goals of the organization and determine where Software Asset Management will be a strategic influence in achieving those goals. During this course, students learn best practices in Software Asset Management, the when and why to question whether something should or shouldn't be done, how to clearly identify goals and how to quantify success with metrics. Software Asset Management (SAM) is the set of business practices that support the use of software within an organization and frequently involves a new view on how and why software traverses throughout the organization. SAM is currently considered a necessary business function by many organizations who view Software Asset Managers as key contributors to their overall organizational success. Some of these goals include: Reducing Risk Increasing Accountability Uncovering Savings Gaining Control of the IT Environment To be successful, Software Asset Managers need to learn what the Software Asset Management business best practices are and how to implement and leverage those best practices in a way that is tailored to their organization. This course exposes students to numerous concepts within IT Asset Management that are relevant for both direct application and as a means of discussion for those who are implementing, management and direction ITAM initiatives within their organizations. The CSAM course consists of the following components: CSAM Course Manual CSAM Course Presentation Slide Book CSAM instructor daily presentation and interaction with students administered in-person or online CSAM Comprehensive Online Examination. This is necessary for achieving CSAM Certification Price for Additional Student \$ 1178

Course Description	1 Day Public Class (Price for 1 student) CSAM: Certified Software Asset ManagerThe IAITAM Certified Software Asset Manager (CSAM) course is a foundational education program that ensures students are able to manage software assets. Students also learn about the ever-changing variables throughout our industry. From software piracy and compliance issues to legislation and organizational challenges, it is necessary to evaluate both the internal and external influences that bring about change in how organizations manage their IT assets. A successful Software Asset Manager must look at the overall goals of the organization and determine where Software Asset Management will be a strategic influence in achieving those goals. During this course, students learn best practices in Software Asset Management, the when and why to question whether something should or shouldnt be done, how to clearly identify goals and how to quantify success with metrics. Software Asset Management (SAM) is the set of business practices that support the use of software within an organization and frequently involves a new view on how and why software traverses throughout the organization. SAM is currently considered a necessary business function by many organizations who view Software Asset Managers as key contributors to their overall organizational success. Some of these goals include: Reducing Risk Increasing Accountability Uncovering Savings Gaining Control of the IT Environment To be successful, Software Asset Managers need to learn what the Software Asset Management business best practices are and how to implement and leverage those best practices in a way that is tailored to their organization. This course exposes students to numerous concepts within IT Asset Management that are relevant for both direct application and as a means of discussion for those who are implementing, management and direction ITAM initiatives within their organizations. Max. Participants	8
GSA Price (inc. IFF)	\$1677.55
Course Title	C2160-667-Public
Course Description	0.5 Day Public Class (Price for 1 student) IBM Certified Architectural Design of SOA Solutions Price for Additional Student \$ 429
Course Length	0.5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$419.39
Course Title	C2180-278-Private/Onsite
Course Description	0.5 Day Private/Onsite Class (Price for 8 students) IBM Certified Mobile Application Developer - Worklight V6.0 Price for Additional Student \$ 343
Course Length	0.5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$1677.55
Course Title	C2180-278-Public
Course Description	0.5 Day Public Class (Price for 1 student) IBM Certified Mobile Application Developer - Worklight V6.0 Price for Additional Student \$ 429
Course Length	0.5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$419.39
Course Title	C2180-408-Private/Onsite
Course Description	0.5 Day Private/Onsite Class (Price for 8 students) IBM Certified Mobile Application Administrator - Worklight Foundation V6.2 Price for Additional Student \$ 343
Course Length	0.5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$1677.55
Course Title	C2180-408-Public
Course Description	0.5 Day Public Class (Price for 1 student) IBM Certified Mobile Application Administrator - Worklight Foundation V6.2 Price for Additional Student \$ 429
Course Length	0.5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$419.39
Course Title	CB69G-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) TCP/IP for z/OS Implementation Workshop Price for Additional Student \$ 2608
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$12719.6
Course Title	CB69G-Public
Course Description	5 Day Public Class (Price for 1 student) TCP/IP for z/OS Implementation Workshop Price for Additional Student \$ 3260
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3179.9
Course Title	CE121G-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) DB2 SQL Workshop Price for Additional Student \$ 1043
Course Length	2 Day
Min. Participants	1

Max. Participants	8
GSA Price (inc. IFF)	\$5087.84
Course Title	CE121G-Public
Course Description	2 Day Public Class (Price for 1 student) DB2 SQL Workshop Price for Additional Student \$ 1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1271.96
Course Title	CE131G-Private/Onsite
Course Description	2.5 Day Private/Onsite Class (Price for 8 students) DB2 SQL Workshop for Experienced Users Price for Additional Student \$ 1565
Course Length	2.5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$7631.76
Course Title	CE131G-Public
Course Description	2.5 Day Public Class (Price for 1 student) DB2 SQL Workshop for Experienced Users Price for Additional Student \$ 1956
Course Length	2.5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1907.94
Course Title	CEN-F215-MEN-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Centriq - IBM Case Manager 5.2 - MentoringBlue Cross and Blue Shield of Kansas desires for the One Day Overview. Price for Additional Student \$ 522
Course Length	1 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2543.92
Course Title	CEN-F215-MEN-Public

GSA Price (inc. IFF)	\$1279.76
Course Title	MFCO-100-JP-Private/Onsite
Course Description	40 Day Private/Onsite Class (Price for 8 students) z/OS Application DevelopmentThis course is designed to provide the student with an in-depth understanding of Application Development in a z/OS environment using COBOL, ISPF, JCL, DB2 and CICS. The number of days in the COBOL portion of this course depends upon the students' background. When the students have experience in another programming language, the COBOL topics are covered in 15 days. If the students do not have experience with another programming language, the COBOL topics are covered in 25 days because more time is spent on programming logic and more workshops are assigned to ensure the students master both the thought process and the actual language constructs. There are five days of JCL training, five days of DB2 training and five days of CICS training and these durations are not dependent upon the students prior programming experience. As a result, the full course will run between 30 and 40 days. Price for Additional Student \$ 20992
Course Length	40 Day
Min. Participants	1

Max. Participants	8

Course Title	TRA-WB383-Private/Onsite

Course Description	4 Day Private/Onsite Class (Price for 8 students) Developing Rule Solutions in IBM Operational Decision Manager V8.5 for TravelersAn updated version of this course is available. For more information, click Developing Rule Solutions in IBM Operational Decision Manager V8.6 (WB390G). This course is also available as self-paced virtual (e-learning) course, Developing Rule Solutions in IBM Operational Decision Manager V8.5 (ZB383). This option does not require any travel. This 4-day instructor-led course introduces developers to IBM Operational Decision Manager V8.5. In this course, you learn the concepts and skills that you need to design, develop, and integrate a business rule solution with Operational Decision Manager. The course begins with an overview of Operational Decision Manager, which is composed of two main environments: IBM Decision Server for technical users and overview of IBM Decision Center for business users. The course outlines the collaboration between development and business teams during project development. Through instructor-led presentations and hands-on lab exercises, you learn about the core features of Decision Server, which is the primary working environment for developers. You design a business rule application, and work with the object models that are required to author and execute rule artifacts. You gain experience with rule deployment and execution within various types of client applications. You work extensively with Rule Execution Server and learn how you can integrate decision services within an enterprise environment. In addition, you become familiar with rule authoring (via ODM IDE in RAD/RSA) so that you can support business users to set up and customize the rule authoring and validation environments. The lab environment for this course uses Windows Server 2008 R2 Standard Edition. For information about other related WebSphere courses, visit the WebSphere Education Training Paths website: ibm.com/software/websphere/education/paths/ Price for Additional Student \$ 2086

Course Description	3 Day Private/Onsite Class (Price for 8 students) IBM Content Navigator: Boot Camp (v2.0.3.6)This 3-day boot camp introduces the IBM Content Navigator web client and the framework. You learn how to view, add, and search for content in the web client. You also explore other IBM Content Navigator advanced features. The course shows how to configure IBM Content Navigator. You learn how to connect to repositories and create new desktops, define Cross-Repository Search, and create Teamspace and Templates. You learn how to configure IBM Content Navigator Sync services and Sync client. You also learn how to sync content across multiple devices and resolve synchronization conflicts. You learn how to create Entry Templates using Entry Template Manager and to add items to the repository using these templates. You will also learn how to customize the property layouts, associate an entry template to a folder, and configure entry template management. You learn how to customize the desktop appearance, modify Menus, Icons, and Labels, create a Viewer Map, and register a Plug-in. Price for Additional Student \$ 1565

Course Description	2 Day Private/Onsite Class (Price for 8 students) Jazz Team Server V6 AdministrationThis course teaches system administrators, enterprise architects, and development team leaders how to install, configure, and maintain an IBM Jazz Team Server environment. It demonstrates how to plan a deployment topology and software infrastructure for the applications of the Rational solution for Collaborative Lifecycle Management (CLM). The Rational solution for CLM provides a fully integrated environment that includes IBM Rational Team Concert, IBM Rational DOORS Next Generation, and IBM Rational Quality Manager products. In this course, you learn how to install and configure the required software and how to manage users and licenses. You also learn techniques for maintaining and troubleshooting the Jazz Team Server and for implementing upgrades. Hands-on exercises give you experience working directly with IBM Jazz Team Server V6.0. You install several typical applications, create the required databases, and configure the environment to use DB2 and Tomcat. In a later exercise, you replace the Tomcat server with WebSphere Application Server. Price for Additional Student \$ 1043

Course Title	MSOF-750-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office PowerPoint 2013: Part 1In this Microsoft Office PowerPoint 2013 course, students will use PowerPoint 2013 to begin creating engaging, dynamic multimedia presentations. Gone are the days of flip charts or drawing on a white board to illustrate your point. Today's audiences are tech savvy, accustomed to high-impact multimedia content, and stretched for time. By learning how to use the vast array of features and functionality contained within Microsoft Office PowerPoint 2013, students will gain the ability to organize content, enhance it with high-impact visuals, and deliver it with a punch. It's hard to imagine a day going by without people passing along large amounts of information. Messages are everywhere, and the number of messages we receive seems to be increasing each day. Whether via phone, email, mass media, or personal interaction, we are subjected to a constant stream of information. With so much communication to contend with, it can be difficult to grab people's attention. But, we are often called upon to do just that. So, how do you grab and maintain an audience's focus when you're asked to present important information? By being clear, organized, and engaging. And, that is exactly what Microsoft Office PowerPoint 2013 can help you do. Price for Additional Student \$ 194
Course Length	1 Day

By learning how to use the vast array of features and functionality contained within Microsoft Office PowerPoint 2013, students will gain the ability to organize content, enhance it with high-impact visuals, and deliver it with a punch. It's hard to imagine a day going by without people passing along large amounts of information. Messages are everywhere, and the number of messages we receive seems to be increasing each day. Whether via phone, email, mass media, or personal interaction, we are subjected to a constant stream of information. With so much communication to contend with, it can be difficult to grab people's attention. But, we are often called upon to do just that. So, how do you grab and maintain an audience's focus when you're asked to present important information? By being clear, organized, and engaging. And, that is exactly what Microsoft Office PowerPoint 2013 can help you do. Price for Additional Student \$ 242

Course Title	MSOF-751-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office PowerPoint 2013: Part 2This Microsoft Office PowerPoint 2013 course provides the student with a variety of tools that can help deliver content in nearly any situation, while saving time and effort. By taking advantage of these tools, students will be creating presentations that not only stand out from the crowd, but also don't consume available time. Meetings, instruction, training, pitches; these are all a part of our daily lives. We are often called upon to deliver presentations with little notice, at multiple venues, and with varying requirements. And, some of these presentations include sensitive information that needs to be guarded. Given all the variables, it may seem an overwhelming task to deliver your content, on time, to all audiences, and to only those who need to see it. Oh, and by the way, you need to make it interesting, informative, and memorable. So, how do you do it? Without the help of a robust set of tools, it would be nearly impossible. Price for Additional Student \$ 194

Course Description	5 Day Private/Onsite Class (Price for 8 students) Mastering AngularThis Mastering Angular course is a five-day, hands-on course that thoroughly explores the latest Angular features and advances, demonstrating how to solve the traditional challenges of JavaScript web application development. Throughout the course students will build custom components using application routes, form validation, and unit-testing. The course starts with an introduction of Angular CLI and TypeScript, and then delves into component-driven development with Angular components, covering data-binding, directives, services, routing, HTTP, the RxJS library, forms unit testing, and REST. Students will also learn how to add authentication, use the Material library, learn the NgRX design pattern to implement the NgRX store, make custom directives, enhance their application with animations, write an E2E test, and increase their application's efficiency by lazy loading modules and creating their own Angular library. At the end of this five-day course, students will have an application up and running that incorporates components, directives, custom pipes, reactive forms, routes, services, unit testing, and the REST API. They will add authentication, implement the Material library, and learn how to maintain state with NgRX. They will then take a deeper dive including making their own custom directives, lazy loading modules, and E2E testing. They will learn how to enhance their application with animations and create their own Angular library. Price for Additional Student \$ 2296

Course Description	3 Day Private/Onsite Class (Price for 8 students) Securing J2EE Web ApplicationsThis Securing Java Web Applications course is designed to provide students with the skills required to recognize actual and potential software vulnerabilities, implement defenses for those vulnerabilities, and test those defenses for sufficiency. This course introduces developers to the most common security vulnerabilities faced by web applications today. Each vulnerability is examined from a Java/JEE perspective through a process of describing the threat and attack mechanisms, recognizing associated vulnerabilities, and, finally, designing, implementing, and testing effective defenses. Multiple practical labs reinforce these concepts with real vulnerabilities and attacks. Students are then challenged to design and implement the layered defenses they will need in defending their own applications. Price for Additional Student \$ 1378

Course Title	BAPD-105-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Making Data Science Pay Making Data Science Pay focuses on How to Set a Vision, Culture and Environment for Data-Driven Returns. Data Science is a big deal. But if you were to ask a hundred people what Data Science is and more importantly, to state its value youd probably get a hundred different answers. Data Science is too important to be so elusive. This seminar remedies that by defining the value and explaining the technology behind it. The purpose is to cut through the market buzz surrounding data science and boil it down to its practical concepts and applications. Participants will learn the real-world usage and ROI of data science including why projects typically succeed or fail. The course simplifies the technology and the essential tasks of the data scientist. It peels away the complexities surrounding data science, boiling it down to its essence, presented in a style that all can understand. This seminar is a non-biased, coherent, and often entertaining integration of facts and figures, explanations and real-world usage of data science translating its technology into value, and its value into strategic competitive advantage. It is taught by a 30-year veteran of analytics, who possesses the reason and measured judgment that can only come from the experience of being immersed in the evolution of all things data, from small data and analyses and reporting in the 80s, to big data, data science, and the advanced analytics applied in todays complex environments. Combining a perspective which is both passionate and impartial a rare find in the data science-crazed marketplace. Price for Additional Student \$ 525
Course Length	1 Day

Course Description	2 Day Private/Onsite Class (Price for 8 students) Advancing the Analytics-Driven Organization Advancing the Analytics-Driven Organization is a unique course directly addresses the cultural, environmental, team and resource issues that impact the overall analytic function in mid-sized and large organizations. This course is not academic or theoretical. Rather, it is designed and facilitated by seasoned strategic consultants who directly encounter the challenges of implementing analytics in todays organizations. Advancing the Analytics-Driven Organization presents a strategic framework required to arrive at analytic results that are purposeful, measurable, understandable, actionable, residual and adopted by stakeholders. Those who attend this course will develop analytic leadership traits that are in high demand. Participants will enhance rare soft skills to significantly enrich their professional profile and stand out in the competitive analytics marketplace. There is truly no other training in the marketplace that presents a structured framework to specifically teach how to solve the complex analytic resource, environmental and cultural issues that exist in larger organizations. Learn how to synchronize all essential roles of the analytic team and bridge the critical translation gap between them that causes most projects to fall short of their potential. Advancing the Analytics-Driven Organization is the only known visionary course that lays out critical strategic considerations to effectively qualify analytic projects and lead implementation teams. These are truly the key issues that prevent most organizations from being effective and competitive in todays analytic landscape. Those who are truly intentional about leveraging analytics for measured gain and residual impact are perfect candidates for this course. Price for Additional Student \$ 1050

Course Title	BAPD-115-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) The Predictive Analytics Operation - Comprehensive The Predictive Analytics Operation is a comprehensive experience encompassing a complete strategic implementation of modern organizational analytics. The course takes a holistic approach to advance analytic capability. This comprehensive active exposure to the full Modeling Practice Framework provides leaders and practitioners with both a strategic and tactical orientation to predictive analytics. Participants will build an analytic operation in stages to experience the natural messiness of predictive analytics. No other training in the market provides such an immersive, skill-reinforcing and complete view of the practice particularly with a real-world focus and vendor-neutral perspective. Unlike any other course on the market, the Predictive Analytics Operation Comprehensive Experience course steps through the full build of an analytic operation within the realistic environment of a large organization. Leaders who take this course will interact more effectively with their teams at the tactical level, while analytic practitioners will complement their existing algorithmic background with a more strategic goal-driven focus. Price for Additional Student \$ 2624

Course Title	BAPD-120-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) The Predictive Analytics Operation - DesignThe Predictive Analytics Operation Design Course will actively lead students through structured and comprehensive analytic project design exercises. The developers of this course have been actively involved with the design, implementation and deployment of real-world predictive modeling solutions. Those who stay for the full series will reference the completed design as the blueprints for full strategic implementation This one-of-a-kind course focuses on the most chronic failings of the vast majority of advanced analytics implementations: comprehensive project assessment, design and planning. The analytic professionals who apply the strategic principles in this course will obtain the rare analytic leadership skills to overcome their organizations ongoing analytic challenges and stand out in this competitive practice. This vendor-neutral course is designed to be taken independently, yet is part of a larger course series that covers The Modeling Agency's Modeling Practice Framework for low-risk, high-impact projects. The scope of this course extends to the first two phases: Assess and Plan. Price for Additional Student \$ 525

Course Title	BAPD-125-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) The Predictive Analytics Operation - DevelopmentThe Predictive Analytics Operation Development Course is a practitioners view of predictive modeling methods, tactics, tools and techniques through structured and comprehensive analytic project design exercises. This is the only class of its kind that places analytic model development directly in the context of a broader enterprise-level implementation framework. TMAs Model Development course is not just about the mechanics of building a predictive model its about building models that drive tangible, measurable results for the direct benefit of the organization. This course is designed to be taken independently, yet is part of a larger series that covers The Modeling Agency's entire Modeling Practice Framework for low-risk, high-impact implementation. This event covers the Fourth Phase of the Seven-Phase Modeling Practice Framework: Model. The Predictive Analytics Operation Development Course insists upon making predictive analytics purposeful, measurable and actionable in a larger and more complex organizational setting. This course does not restrict or skew the presentation of machine learning methods through a single product. Rather, the Model Development course gives broad consideration of predictive analytics from a purely vendor-neutral perspective. Live modeling demonstrations will precede follow-along exercises. Participants will directly experience the natural messiness of data mining to discover what really works, as well as what doesnt and why. The instructor will show how to evaluate various features and available products based upon strengths, limitations, function, value and general performance. Price for Additional Student \$ 1050

Course Title	DCSK-130-Private/Onsite
Course Description	4 Day Private/Onsite Class (Price for 8 students) Introduction to Spark ProgrammingThis course introduces the Apache Spark distributed computing engine, and is suitable for developers, data analysts, architects, technical managers, and anyone who needs to use Spark in a hands-on manner. It is based on the Spark 2.x release. The course provides a solid technical introduction to the Spark architecture and how Spark works. It covers the basic building blocks of Spark (e.g. RDDs and the distributed compute engine), as well as higher-level constructs that provide a simpler and more capable interface (e.g. DataSets/DataFrames and Spark SQL). It includes in-depth coverage of Spark SQL, DataFrames, and DataSets, which are now the preferred programming API. This includes exploring possible performance issues and strategies for optimization. The course also covers more advanced capabilities such as the use of Spark Streaming to process streaming data, and integrating with the Kafka server. The course is very hands-on, with many labs. Participants will interact with Spark through the Spark shell (for interactive, ad-hoc processing) as well as through programs using the Spark API. After taking this course, you will be ready to work with Spark in an informed and productive manner. Labs are supported in both Python and Scala Price for Additional Student \$ 1837

Course Title	EJBD-100-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Big Data OverviewWe all know - Big Data is here in a Big way. However, processing that data can still be a Big challenge. This course provides an in-depth overview of the choices you have in processing Big Data. It provides an introduction to what Big Data is, the types of data you might have, approaches to working on and processing the data, and the capabilities, strengths, and weaknesses of those approaches. After taking this course, you will have a clear understanding of what Big Data is and of the various types of data you may encounter. You will know different techniques and technologies for working with your data, where those technologies are a good fit, and where they are not. You will be well prepared for evaluating what approach is best suited for your needs Price for Additional Student \$ 459
Course Length	1 Day

Course Title	EJBF-730-Private/Onsite
Course Description	4 Day Private/Onsite Class (Price for 8 students) Mastering Microservices with Spring Boot and Spring CloudThis Mastering Microservices with Spring Boot and Spring Cloud Training course introduces Spring Boot, Spring Cloud and the Netflix OSS suite as a way of deploying highly resilient and scalable RESTful services and web applications. Spring Boot is a technology stack that builds on the popular Spring Framework to allow Spring-based applications as stand-alone jar files that host their own web servers. This approach works nicely with deployment automation and rapid scaling. Cloud-based, highly-distributed applications face additional challenges in supporting a dynamic environment especially around configuration, service discovery, service resilience and monitoring. Spring Cloud embraces and extends the popular suite of open source cloud tools published by Netflix (Eureka, Hystrix, Ribbon, etc). Price for Additional Student \$ 1535

Course Title	SAFE-100-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) SAFe Scrum Master (SAFe Scrum Master certification)In this two-day SAFe Scrum Master course, students will gain an understanding of the role of a Scrum Master in a SAFe enterprise. Unlike traditional Scrum Master training that focuses on the fundamentals of team-level Scrum, the SAFe Scrum Master course explores the role of the Scrum Master in the context of the entire enterprise and prepares students to successfully plan and execute the Program Increment (PI), the primary enabler of alignment throughout all levels of a SAFe organization. This includes learning the key components of Agile at scale development, how Scrum is facilitated throughout the enterprise, and how to execute Iteration Planning. Students will also discover how to build high performing Agile teams by becoming a servant leader and coach, and how to coach those teams to deliver the maximum business value at scale. SAFe 4 Scrum Master (SSM) certification signifies that people are prepared to perform the role of Scrum Master in a SAFe environment, increasing their value to teams and organizations that are implementing SAFe. Price for Additional Student \$ 1043
Course Length	2 Day

Course Title	SAFE-115-Private/Onsite

Course Description	2 Day Private/Onsite Class (Price for 8 students) SAFe DevOps (SAFe DevOps Professional certification)This two-day course provides a comprehensive overview for understanding the DevOps competencies needed to accelerate time-to-market by improving the flow of value through the Continuous Delivery Pipeline. Students will map the current value stream through their delivery pipeline from idea to cash and identify practices that will eliminate bottlenecks to flow. The course will build an understanding of the complete flow of value from Continuous Exploration to Continuous Integration, Continuous Deployment, and Release on Demand. Students will explore SAFe's CALMR (Culture, Automation, Lean, Measure, Recover) approach to DevOps, which helps create a culture of shared responsibility for the full spectrum of Solution delivery. It helps align people, processes, and technology throughout the organization to achieve faster time-to-market. Students will leave with the tools they need to execute an implementation plan for improving their delivery pipeline, and the knowledge they need to support the plan. The course also prepares students for the optional SAFe 4 DevOps Practitioner (SDP) certification exam. Price for Additional Student \$ 918

Course Title	SAFE-125-Private/Onsite

Course Description	2 Day Private/Onsite Class (Price for 8 students) Leading SAFe 4.6During this two-day course, attendees will gain the knowledge necessary to lead a Lean-Agile enterprise by leveraging the Scaled Agile Framework (SAFe), and its underlying principles derived from Lean, systems thinking, Agile development, product development flow, and DevOps. They will discuss the five competencies needed to become a Lean Enterprise. They will also learn and practice the skills for supporting and executing PI Planning events, and coordinating multiple Agile Release Trains (ARTs). Attendees will gain an understanding of the Lean-Agile mindset, why its so effective in todays adapt-or-die marketplace, and what it means to lead a Lean-Agile transformation. Theyll also learn how to build and support Agile teams and programs, empower a Lean Portfolio, build a Continuous Delivery Pipeline and DevOps culture, and coordinate large solutions. They will develop a skillset thats in demand worldwideand empower their enterprises to succeed in a disruptive marketplacewhen they become a SAFe 4 Agilist (SA). Attending the class prepares individuals to take the exam and become a certified SAFe Agilist (SA). Price for Additional Student \$ 918

Course Title	SAFE-130-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) SAFe Advanced Scrum MasterThis course prepares current Scrum Masters for their leadership role in facilitating Agile team, program, and enterprise success in a Scaled Agile Framework (SAFe) implementation. The course covers facilitation of cross-team interactions in support of program execution and relentless improvement. It enhances the Scrum paradigm with an introduction to scalable engineering and DevOps practices; the application of Kanban to facilitate the flow of value; and supporting interactions with architects, product management, and other critical stakeholders in the larger program and enterprise contexts. The course offers actionable tools for building high-performing teams and explores practical ways of addressing Agile and Scrum anti-patterns in the enterprise. Price for Additional Student \$ 918

Course Title	SAFE-135-Private/Onsite

Course Description	3 Day Private/Onsite Class (Price for 8 students) SAFe Agile Software EngineeringThe discipline of software engineering has evolved over the past decades with the introduction of Lean-Agile and DevOps principles and practices. New skills and approaches help organizations deliver software-centric solutions faster, more predictably, and with higher quality. During this workshop-oriented course, attendees learn the foundational principles and practices that make up the Agile Software Engineering discipline. Attendees will learn how continuous flow of value delivery and building quality in are enabled by modern practices including XP technical practices, Behavioral-Driven Development (BDD), and Test-Driven Development (TDD). Attendees will learn proven practices to detail, model, design, implement, verify, and validate stories in a SAFe Continuous Delivery Pipeline. They will know the practices that build quality into code (abstraction, encapsulation, intentional programming) and designs (SOLID, Design patterns). Attendees will also understand how Software Engineering fits into the larger solution context and their role in collaborating on intentional architecture and DevOps. Price for Additional Student \$ 1378

Course Title	BATB-115-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Tableau Desktop Level 1As technology progresses and becomes more interwoven with our businesses and lives, more and more data is collected about business and personal activities. This era of 'big data' has exploded due to the rise of cloud computing, which provides an abundance of computational power and storage, allowing organizations of all sorts to capture and store data. Leveraging that data effectively can provide timely insights and competitive advantages. The creation of data-backed visualizations is a key way data scientists, or any professional, can explore, analyze, and report insights and trends from data. Tableau software is designed for this purpose. Tableau was built to connect to a wide range of data sources and allows users to quickly create visualizations of connected data to gain insights, show trends, and create reports. Tableau's data connection capabilities and visualization features go far beyond those that can be found in spreadsheets, allowing users to create compelling and interactive worksheets, dashboards, and stories that bring data to life and turn data into thoughtful action. Price for Additional Student \$ 918

Course Title	BATB-120-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Tableau Desktop Level 2The advent of cloud computing and storage has ushered in the era of big data. With the abundance of computational power and storage, organizations and employees with many different roles and responsibilities can benefit from analyzing data to find timely insights and gain a competitive advantage. Data-backed visualizations allow anyone to explore, analyze, and report insights and trends from data. Tableau software is designed for this purpose. Tableau was built to connect to a wide range of data sources and allows users to quickly create visualizations of connected data to gain insights, show trends, and create reports. Beyond the fundamental capabilities of creating data-driven visualizations, Tableau allows users to manipulate data with calculations to show insights, make visualizations interactive, and perform statistical analysis. This gives users the ability to create and share data-driven insights with peers, executives, and clients. Price for Additional Student \$ 918

Course Title	C11891-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Beginning SwiftTake your first foray into programming for Apple devices with Swift.Swift is fundamentally different from Objective-C, as it is a protocol-oriented language. While you can still write normal object-oriented code in Swift, it requires a new way of thinking to take advantage of its powerful features and a solid understanding of the basics to become productive. Well begin with exploring the fundamental Swift programming concepts, language structure, and the Swift programming syntax. Then, we'll learn to create original custom operators with Swift operators, branching, and loops. Moving on, we'll learn how to run application codes and compile errors. Having made progress with it, well see how Swift compares to other computer languages and how to transform your thinking. Then, master the usage of key language elements, such as strings and collections. Finally, grasp how Swift supports modern application development using advanced features, such as built-in Unicode support and higher-order functions. No prior Swift knowledge is required for this book, however some prior exposure to another object-oriented programming language will be beneficial. This is an introductory course to the Swift programming language with Xcode. The course does not expect you to have any previous Swift knowledge or experience. The course covers ample amount of demos so that students learn the basics hands-on. This is a self-paced video course. Any files needed for exercises or activities will be available for download from the course page. Price for Additional Student \$ 130
Course Length	1 Day

Course Title	DBDB-510-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) DB2 Application ProgrammingThis DB2 Application Programming course begins with an overview of relational database concepts including referential integrity, continues with the essentials of the Structured Query Language (SQL), and finally shows how SQL statements are embedded in applications. Attention is paid to coding efficient SQL for best performance, and the SQL statement EXPLAIN PLAN is used to help to evaluate the efficiency of SQL statements. The course provides several guided, hands-on, practice sessions give each student many opportunities to use SQL to access data. As the course progresses, students will spend the majority of each day in workshop, with minimal lectures to introduce new topics and then immediately apply them hands-on. When finished, each student will have a good grasp of the essentials of SQL and the DB2 environment. Price for Additional Student \$ 2296

Course Title	WDXM-400-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) Advanced XML and XSLTThis Advanced XML and XSLT course is designed to provide students with the practical use of W3C standards (including XSL and XML Schema) and of implementing tools and technologies. This course is programming language independent, making it useful for Java, .NET, C++, and any other programming orientation. Students will receive a copy of the 'Xtensil' product. This software was developed to assist in implementing, testing, and fielding XML applications. Xtensil is used as both a teaching aid and a straightforward, basic, fully functional XML toolkit that students can use on Windows and Linux platforms. Price for Additional Student \$ 1151
Course Length	3 Day

GSA Price (inc. IFF)	\$1269.74
Course Title	0A018G-PRIVATE/ONSITE

Course Description	1 Day Private/Onsite Class (Price for 8 students) Data science without a Ph.D. Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$522
Course Length	1 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2505.23
Course Title	0A018G-PUBLIC
Course Description	1 Day Public Class (Price for 1 student) Data science without a Ph.D. Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$652
Course Length	1 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$634.87
Course Title	0A028G-PRIVATE/ONSITE
Course Description	1 Day Private/Onsite Class (Price for 8 students) Introduction to Time Series Analysis Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$522
Course Length	1 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2505.23
Course Title	0A028G-PUBLIC
Course Description	1 Day Public Class (Price for 1 student) Introduction to Time Series Analysis Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$652
Course Length	1 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$634.87
Course Title	0A038G-PRIVATE/ONSITE
Course Description	8 Day Private/Onsite Class (Price for 8 students) Advanced Predictive Modeling Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$522
Course Length	8 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2505.23
Course Title	0A038G-PUBLIC
Course Description	8 Day Public Class (Price for 1 student) Advanced Predictive Modeling Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$652
Course Length	8 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$634.87
Course Title	0A039G-PRIVATE/ONSITE
Course Description	8 Day Private/Onsite Class (Price for 8 students) Advanced Machine Learning Models Using IBM SPSS Modeler (V18.2). Price for each additional student - \$522
Course Length	8 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2543.92
Course Title	0A039G-PUBLIC
Course Description	8 Day Public Class (Price for 1 student) Advanced Machine Learning Models Using IBM SPSS Modeler (V18.2). Price for each additional student - \$652
Course Length	8 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$635.98
Course Title	0A048G-PRIVATE/ONSITE

Course Description	8 Day Private/Onsite Class (Price for 8 students) Clustering and Association Modeling Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$522
Course Length	8 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2505.23
Course Title	0A048G-PUBLIC
Course Description	8 Day Public Class (Price for 1 student) Clustering and Association Modeling Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$652
Course Length	8 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$634.87
Course Title	0A058G-PRIVATE/ONSITE
Course Description	1 Day Private/Onsite Class (Price for 8 students) Advanced Data Preparation Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$522
Course Length	1 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2505.23
Course Title	0A058G-PUBLIC
Course Description	1 Day Public Class (Price for 1 student) Advanced Data Preparation Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$652
Course Length	1 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$634.87
Course Title	0A069G-PRIVATE/ONSITE
Course Description	16 Day Private/Onsite Class (Price for 8 students) IBM SPSS Modeler Foundations (V18.2). Price for each additional student - \$1043
Course Length	16 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5087.84
Course Title	0A069G-PUBLIC
Course Description	16 Day Public Class (Price for 1 student) IBM SPSS Modeler Foundations (V18.2). Price for each additional student - \$1304
Course Length	16 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1271.96
Course Title	0A079G-PRIVATE/ONSITE
Course Description	16 Day Private/Onsite Class (Price for 8 students) Introduction to Machine Learning Models Using IBM SPSS Modeler (V18.2). Price for each additional student - \$1043
Course Length	16 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5087.84
Course Title	0A079G-PUBLIC
Course Description	16 Day Public Class (Price for 1 student) Introduction to Machine Learning Models Using IBM SPSS Modeler (V18.2). Price for each additional student - \$1304
Course Length	16 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1271.96
Course Title	0A0U8G-PRIVATE/ONSITE

Course Description	8 Day Private/Onsite Class (Price for 8 students) Predictive Modeling for Categorical Targets Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$522
Course Length	8 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2505.23
Course Title	0A0U8G-PUBLIC
Course Description	8 Day Public Class (Price for 1 student) Predictive Modeling for Categorical Targets Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$652
Course Length	8 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$634.87
Course Title	0A0V8G-PRIVATE/ONSITE
Course Description	8 Day Private/Onsite Class (Price for 8 students) Predictive Modeling for Continuous Targets Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$522
Course Length	8 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2505.23
Course Title	0A0V8G-PUBLIC
Course Description	8 Day Public Class (Price for 1 student) Predictive Modeling for Continuous Targets Using IBM SPSS Modeler (v18.1.1). Price for each additional student - \$652
Course Length	8 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$634.87
Course Title	0A108G-PRIVATE/ONSITE
Course Description	2 Day Private/Onsite Class (Price for 8 students) Introduction to IBM SPSS Modeler Text Analytics (v18.1.1). Price for each additional student - \$1043
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5010.46
Course Title	0A108G-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) Introduction to IBM SPSS Modeler Text Analytics (v18.1.1). Price for each additional student - \$1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1269.74
Course Title	0G09AG-PRIVATE/ONSITE
Course Description	2 Day Private/Onsite Class (Price for 8 students) Advanced Statistical Analysis Using IBM SPSS Statistics (V25). Price for each additional student - \$1043
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5087.84
Course Title	0G09AG-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) Advanced Statistical Analysis Using IBM SPSS Statistics (V25). Price for each additional student - \$1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1271.96
Course Title	0G51AG-PRIVATE/ONSITE

Course Description	2 Day Private/Onsite Class (Price for 8 students) Statistical Analysis Using IBM SPSS Statistics (V25). Price for each additional student - \$1043
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5087.84
Course Title	0G51AG-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) Statistical Analysis Using IBM SPSS Statistics (V25). Price for each additional student - \$1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1271.96
Course Title	0G53AG-PRIVATE/ONSITE
Course Description	2 Day Private/Onsite Class (Price for 8 students) IBM SPSS Statistics Essentials (V25). Price for each additional student - \$1043
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5087.84
Course Title	0G53AG-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) IBM SPSS Statistics Essentials (V25). Price for each additional student - \$1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1271.96
Course Title	6C02G-PRIVATE/ONSITE
Course Description	3 Day Private/Onsite Class (Price for 8 students) IBM Sterling Connect Direct for Unix V4.2.0. Price for each additional student - \$1565
Course Length	3 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$7515.69
Course Title	6C02G-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) IBM Sterling Connect Direct for Unix V4.2.0. Price for each additional student - \$1956
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1904.61
Course Title	6F100G-PRIVATE/ONSITE
Course Description	3 Day Private/Onsite Class (Price for 8 students) IBM Sterling B2B Integrator Advanced Business Process Modeling. Price for each additional student - \$1565
Course Length	3 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$7515.69
Course Title	6F100G-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) IBM Sterling B2B Integrator Advanced Business Process Modeling. Price for each additional student - \$1956
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1904.61
Course Title	6F80G-PRIVATE/ONSITE

Course Description	2 Day Private/Onsite Class (Price for 8 students) IBM Sterling Order Management (V9.4) Extending the IBM Sterling Store and IBM Call Center for Commerce Applications. Price for each additional student - \$1043
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5010.46
Course Title	6F80G-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) IBM Sterling Order Management (V9.4) Extending the IBM Sterling Store and IBM Call Center for Commerce Applications. Price for each additional student - \$1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1269.74
Course Title	6F86G-PRIVATE/ONSITE
Course Description	2 Day Private/Onsite Class (Price for 8 students) IBM Sterling File Gateway Managing Sterling File Gateway. Price for each additional student - \$1043
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5010.46
Course Title	6F86G-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) IBM Sterling File Gateway Managing Sterling File Gateway. Price for each additional student - \$1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1269.74
Course Title	6F87G-PRIVATE/ONSITE
Course Description	40 Day Private/Onsite Class (Price for 8 students) IBM Sterling B2B Integrator Fundamentals. Price for each additional student - \$2608
Course Length	40 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$12526.15
Course Title	6F87G-PUBLIC
Course Description	40 Day Public Class (Price for 1 student) IBM Sterling B2B Integrator Fundamentals. Price for each additional student - \$3260
Course Length	40 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3174.36
Course Title	6F89G-PRIVATE/ONSITE
Course Description	4 Day Private/Onsite Class (Price for 8 students) IBM Sterling B2B Integrator Administration and Tuning v5.2.6.1. Price for each additional student - \$2086
Course Length	4 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$10020.92
Course Title	6F89G-PUBLIC
Course Description	4 Day Public Class (Price for 1 student) IBM Sterling B2B Integrator Administration and Tuning v5.2.6.1. Price for each additional student - \$2608
Course Length	4 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2539.49
Course Title	6F91G-PRIVATE/ONSITE

Course Description	24 Day Private/Onsite Class (Price for 8 students) IBM Sterling Order Management (V9.5) Configuring Participant Modeling, Process Modeling, and User Security. Price for each additional student - \$1565
Course Length	24 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$7631.76
Course Title	6F91G-PUBLIC
Course Description	24 Day Public Class (Price for 1 student) IBM Sterling Order Management (V9.5) Configuring Participant Modeling, Process Modeling, and User Security. Price for each additional student - \$1956
Course Length	24 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1907.94
Course Title	6F92G-PRIVATE/ONSITE
Course Description	16 Day Private/Onsite Class (Price for 8 students) IBM Sterling Order Management (V9.5) Configuring Item and Pricing. Price for each additional student - \$1043
Course Length	16 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5087.84
Course Title	6F92G-PUBLIC
Course Description	16 Day Public Class (Price for 1 student) IBM Sterling Order Management (V9.5) Configuring Item and Pricing. Price for each additional student - \$1304
Course Length	16 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1271.96
Course Title	6F93G-PRIVATE/ONSITE
Course Description	3 Day Private/Onsite Class (Price for 8 students) IBM Sterling Order Management (V9.5) Inventory Management and Order Management Business Rules. Price for each additional student - \$1565
Course Length	3 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$7515.69
Course Title	6F93G-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) IBM Sterling Order Management (V9.5) Inventory Management and Order Management Business Rules. Price for each additional student - \$1956
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1904.61
Course Title	9D51G-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) IBM C ram Express Rules for Developers 6.0.5. Price for each additional student - \$2608
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$12526.15
Course Title	9D51G-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) IBM C ram Express Rules for Developers 6.0.5. Price for each additional student - \$3260
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3174.36
Course Title	9D52G-PRIVATE/ONSITE

Course Description	5 Day Private/Onsite Class (Price for 8 students) IBM C ram Workflow for Developers 6.0.5. Price for each additional student - \$2608
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$12526.15
Course Title	9D52G-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) IBM C ram Workflow for Developers 6.0.5. Price for each additional student - \$3260
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3174.36
Course Title	9D72G-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Fundamentals of the IBM C ram SPM Platform for Business Analysts 7.X. Price for each additional student - \$2608
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$12526.15
Course Title	9D72G-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Fundamentals of the IBM C ram SPM Platform for Business Analysts 7.X. Price for each additional student - \$3260
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3174.36
Course Title	9D73G-PRIVATE/ONSITE
Course Description	40 Day Private/Onsite Class (Price for 8 students) IBM C ram SPM for Developers (ADE) 7.X. Price for each additional student - \$2608
Course Length	40 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$12526.15
Course Title	9D73G-PUBLIC
Course Description	40 Day Public Class (Price for 1 student) IBM C ram SPM for Developers (ADE) 7.X. Price for each additional student - \$3260
Course Length	40 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3174.36
Course Title	9D74G-PRIVATE/ONSITE
Course Description	40 Day Private/Onsite Class (Price for 8 students) IBM C ram SPM for Developers (Customization) 7.X. Price for each additional student - \$2608
Course Length	40 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$12526.15
Course Title	9D74G-PUBLIC
Course Description	40 Day Public Class (Price for 1 student) IBM C ram SPM for Developers (Customization) 7.X. Price for each additional student - \$3260
Course Length	40 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3174.36
Course Title	9D76G-PRIVATE/ONSITE

Course Description	16 Day Private/Onsite Class (Price for 8 students) IBM C ram Social Program Management (SPM) 7.X Technical Overview. Price for each additional student - \$1043
Course Length	16 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5010.46
Course Title	9D76G-PUBLIC
Course Description	16 Day Public Class (Price for 1 student) IBM C ram Social Program Management (SPM) 7.X Technical Overview. Price for each additional student - \$1304
Course Length	16 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1269.74
Course Title	9D79G-PRIVATE/ONSITE
Course Description	7 Day Private/Onsite Class (Price for 8 students) IBM SPM Design System for Designers. Price for each additional student - \$522
Course Length	7 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2543.92
Course Title	9D79G-PUBLIC
Course Description	7 Day Public Class (Price for 1 student) IBM SPM Design System for Designers. Price for each additional student - \$652
Course Length	7 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$635.98
Course Title	9D80G-PRIVATE/ONSITE
Course Description	16 Day Private/Onsite Class (Price for 8 students) IBM SPM Design System for Developers. Price for each additional student - \$1043
Course Length	16 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5087.84
Course Title	9D80G-PUBLIC
Course Description	16 Day Public Class (Price for 1 student) IBM SPM Design System for Developers. Price for each additional student - \$1304
Course Length	16 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1271.96
Course Title	9D81G-PRIVATE/ONSITE
Course Description	16 Day Private/Onsite Class (Price for 8 students) IBM Universal Access for Developers (Responsive Web Application). Price for each additional student - \$1043
Course Length	16 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5087.84
Course Title	9D81G-PUBLIC
Course Description	16 Day Public Class (Price for 1 student) IBM Universal Access for Developers (Responsive Web Application). Price for each additional student - \$1304
Course Length	16 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1271.96
Course Title	B5A52ALG-PRIVATE/ONSITE

Course Description	4 Day Private/Onsite Class (Price for 8 students) IBM Cognos Framework Manager: Design Metadata Models (V10.2.2). Price for each additional student - \$1968
Course Length	4 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9477.28
Course Title	B5A52ALG-PUBLIC
Course Description	4 Day Public Class (Price for 1 student) IBM Cognos Framework Manager: Design Metadata Models (V10.2.2). Price for each additional student - \$2460
Course Length	4 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2399.55
Course Title	B6008G-PRIVATE/ONSITE
Course Description	1 Day Private/Onsite Class (Price for 8 students) Overview of IBM Cognos Analytics (v11.0). Price for each additional student - \$522
Course Length	1 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2505.23
Course Title	B6008G-PUBLIC
Course Description	1 Day Public Class (Price for 1 student) Overview of IBM Cognos Analytics (v11.0). Price for each additional student - \$652
Course Length	1 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$634.87
Course Title	B6019G-PRIVATE/ONSITE
Course Description	2 Day Private/Onsite Class (Price for 8 students) IBM Cognos Analytics: Architecture and Logging (v11.0). Price for each additional student - \$1043
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5010.46
Course Title	B6019G-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) IBM Cognos Analytics: Architecture and Logging (v11.0). Price for each additional student - \$1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1269.74
Course Title	B6061G-PRIVATE/ONSITE
Course Description	2 Day Private/Onsite Class (Price for 8 students) IBM Cognos Analytics - Author Reports with Multidimensional Data (V11.0). Price for each additional student - \$1043
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5010.46
Course Title	B6061G-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) IBM Cognos Analytics - Author Reports with Multidimensional Data (V11.0). Price for each additional student - \$1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1269.74
Course Title	B6063G-PRIVATE/ONSITE

Course Description	2 Day Private/Onsite Class (Price for 8 students) IBM Cognos Cube Designer - Design Dynamic Cubes (v11.0). Price for each additional student - \$1043
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5010.46
Course Title	B6063G-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) IBM Cognos Cube Designer - Design Dynamic Cubes (v11.0). Price for each additional student - \$1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1269.74
Course Title	B6098G-PRIVATE/ONSITE
Course Description	1 Day Private/Onsite Class (Price for 8 students) IBM Cognos Analytics - Author Active Reports (v11.0.10). Price for each additional student - \$522
Course Length	1 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2505.23
Course Title	B6098G-PUBLIC
Course Description	1 Day Public Class (Price for 1 student) IBM Cognos Analytics - Author Active Reports (v11.0.10). Price for each additional student - \$652
Course Length	1 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$634.87
Course Title	B6152G-PRIVATE/ONSITE
Course Description	4 Day Private/Onsite Class (Price for 8 students) IBM Cognos Framework Manager: Design Metadata Models (v11.0.x). Price for each additional student - \$2086
Course Length	4 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$10175.68
Course Title	B6152G-PUBLIC
Course Description	4 Day Public Class (Price for 1 student) IBM Cognos Framework Manager: Design Metadata Models (v11.0.x). Price for each additional student - \$2608
Course Length	4 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2543.92
Course Title	B6155G-PRIVATE/ONSITE
Course Description	2 Day Private/Onsite Class (Price for 8 students) IBM Cognos Analytics: Enterprise Administration (v11.0.x). Price for each additional student - \$1043
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5087.84
Course Title	B6155G-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) IBM Cognos Analytics: Enterprise Administration (v11.0.x). Price for each additional student - \$1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1271.96
Course Title	B6158G-PRIVATE/ONSITE

Course Description	3 Day Private/Onsite Class (Price for 8 students) IBM Cognos Analytics: Author Reports Fundamentals (v11.0.x). Price for each additional student - \$1565
Course Length	3 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$7631.76
Course Title	B6158G-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) IBM Cognos Analytics: Author Reports Fundamentals (v11.0.x). Price for each additional student - \$1956
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1907.94
Course Title	B6159G-PRIVATE/ONSITE
Course Description	2 Day Private/Onsite Class (Price for 8 students) IBM Cognos Analytics: Author Reports Advanced (v11.0.x). Price for each additional student - \$1043
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5087.84
Course Title	B6159G-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) IBM Cognos Analytics: Author Reports Advanced (v11.0.x). Price for each additional student - \$1304
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1271.96
Course Title	B6252G-PRIVATE/ONSITE
Course Description	4 Day Private/Onsite Class (Price for 8 students) IBM Cognos Framework Manager: Design Metadata Models (v11.1.x). Price for each additional student - \$2086
Course Length	4 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$10175.68

GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20334-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Core Solutions of Skype for Business 2015. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20335-PRIVATE/ONSITE
Course Description	3 Day Private/Onsite Class (Price for 8 students) Lync? Network Readiness Assessment. Price for each additional student - \$1171

Course Length	3 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5640.18
Course Title	MOC-20335-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) Lync? Network Readiness Assessment. Price for each additional student - \$1464
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1428.03
Course Title	MOC-20339-1-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Planning and Administering SharePoint 2016. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20339-1-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Planning and Administering SharePoint 2016. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20339-2-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Advanced Technologies of SharePoint 2016. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20339-2-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Advanced Technologies of SharePoint 2016. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20345-1-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Administering Microsoft Exchange Server 2016. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20345-1-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Administering Microsoft Exchange Server 2016. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20345-2-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Designing and Deploying Microsoft Exchange Server 2016. Price for each additional student - \$1952

Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20345-2-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Designing and Deploying Microsoft Exchange Server 2016. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20410-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Installing and Configuring Windows Server 2012. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20410-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Installing and Configuring Windows Server 2012. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20411-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Administering Windows Server 2012. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20411-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Administering Windows Server 2012. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20412-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Configuring Advanced Windows Server 2012 Services. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20412-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Configuring Advanced Windows Server 2012 Services. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20413-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Designing and Implementing a Server Infrastructure. Price for each additional student - \$1952

Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20413-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Designing and Implementing a Server Infrastructure. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20414-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Implementing an Advanced Server Infrastructure. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20414-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Implementing an Advanced Server Infrastructure. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20417-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Upgrading Your Skills to MCSA Windows Server 2012. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20417-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Upgrading Your Skills to MCSA Windows Server 2012. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20461-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Querying Microsoft SQL Server 2014. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20461-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Querying Microsoft SQL Server 2014. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20462-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Administering Microsoft SQL Server 2014 Databases. Price for each additional student - \$1952

Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20462-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Administering Microsoft SQL Server 2014 Databases. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20463-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Implementing a Data Warehouse with Microsoft SQL Server 2014. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20463-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Implementing a Data Warehouse with Microsoft SQL Server 2014. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20464-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Developing Microsoft SQL Server 2014 Databases. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20464-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Developing Microsoft SQL Server 2014 Databases. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20465-PRIVATE/ONSITE
Course Description	3 Day Private/Onsite Class (Price for 8 students) Designing Solutions for Microsoft SQL Server 2014. Price for each additional student - \$1171
Course Length	3 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$5640.18
Course Title	MOC-20465-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) Designing Solutions for Microsoft SQL Server 2014. Price for each additional student - \$1464
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1428.03
Course Title	MOC-20466-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Implementing Data Models and Reports with SQL Server 2014. Price for each additional student - \$1952

Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20466-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Implementing Data Models and Reports with SQL Server 2014. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20467-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Designing Business Intelligence Solutions with Microsoft SQL Server 2014. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20467-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Designing Business Intelligence Solutions with Microsoft SQL Server 2014. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20480-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Programming in HTML5 with JavaScript and CSS3. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20480-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Programming in HTML5 with JavaScript and CSS3. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20483-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Programming in C#. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20483-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Programming in C#. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20486-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Developing ASP.NET MVC 4 Web Applications. Price for each additional student - \$1952

Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3
Course Title	MOC-20486-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Developing ASP.NET MVC 4 Web Applications. Price for each additional student - \$2440
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2380.05
Course Title	MOC-20487-PRIVATE/ONSITE
Course Description	5 Day Private/Onsite Class (Price for 8 students) Developing Windows Azure and Web Services. Price for each additional student - \$1952
Course Length	5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$9400.3

Course Description	5 Day Public Class (Price for 1 student) Client Management Suite 7.5: Administration. Price for each additional student - \$2870
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2799.48
Course Title	CMS7-5-IMP-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec Client Management Suite 7.5: Implementation. Price for each additional student - \$2870
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2799.48
Course Title	CMS7-6-AD-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec Client Management Suite 7.6: Administration. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	CMS7-6-ADMIN-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec Client Management Suite 7.6: Administration. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	CMS7-6-IMP-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec Client Management Suite 7.6: Implementation. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	CMS-8-1-A-E1XC-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) Client Management Suite 8.1 Administration. Price for each additional student - \$2214
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2159.6
Course Title	CMS-8-5-A-E1XC-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) Client Management Suite 8.5 Administration. Price for each additional student - \$2214
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2159.6
Course Title	CS6-UNIX-E1XC-PUBLIC

Course Description	5 Day Public Class (Price for 1 student) Veritas Cluster Server 6.x for UNIX: Administration Fundamentals. Price for each additional student - \$2870
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2799.48
Course Title	C-SOC-A-R2-E1XC-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) CloudSOC Administration R2. Price for each additional student - \$1476
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1439.73
Course Title	CSS-ADMIN-E1XC-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) Cyber Security Services Administration. Price for each additional student - \$1476
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1439.73
Course Title	CW7-AD-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec Clearwell eDiscovery Platform 7.x: Administration. Price for each additional student - \$2870
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2799.48
Course Title	CW7-LEGAL-E1XC-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) Clearwell eDiscovery Platform 7.x : Legal Hold and Collection. Price for each additional student - \$1148
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1119.79
Course Title	CW7-PROC-E1XC-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) Clearwell eDiscovery Platform 7.x: Processing, Review and Export. Price for each additional student - \$1722
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1679.69
Course Title	DCSSA-6-7-DT-E1XC-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) Data Center Security Server Advanced 6.7 Diagnostics and Troubleshooting. Price for each additional student - \$1476
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1439.73
Course Title	DCSS-ADV-67-E1XC-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) Symantec Data Center Security Server Advanced 6.7 Administration. Price for each additional student - \$2214
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2159.6
Course Title	DI-ADMIN-4-5-1-E1XC-PUBLIC

Course Description	3 Day Public Class (Price for 1 student) Symantec Data Insight 4.5.1 Administration. Price for each additional student - \$1845
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1799.66
Course Title	DI-ADMIN-5-E1XC-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) Veritas Data Insight 5.0: Administration. Price for each additional student - \$1845
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1799.66
Course Title	DLP12-5-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec Data Loss Prevention 12.5: Administration. Price for each additional student - \$2870
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2799.48
Course Title	DLP14-5-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec Data Loss Prevention 14.5: Administration. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	DLP14-6-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec Data Loss Prevention 14.6: Administration. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	DLP14-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec Data Loss Prevention 14.0: Administration. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	DLP-15-ADMIN-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Data Loss Prevention 15.0 Administration. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	DLP15-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Data Loss Prevention 15.0 Administration. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	DP0151-E1XC-PUBLIC

Course Description	3 Day Public Class (Price for 1 student) Symantec Data Center Security: Server Advanced 6.0. Price for each additional student - \$2214
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2159.6
Course Title	DS-8-1-ADMIN-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Deployment Solution 8.1 Administration. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	EDISC8-AD-E1XC-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) Veritas eDiscovery Platform (Clearwell) 8.x: For Administrators. Price for each additional student - \$1312
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1279.76
Course Title	EDISC8-U-E1XC-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) Veritas eDiscovery Platform (Clearwell) 8.x: For Users Training. Price for each additional student - \$1968
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1919.64
Course Title	EE-11-2-E1XC-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) Endpoint Encryption 11.2 Install, Configure, and Deploy. Price for each additional student - \$1476
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1439.73
Course Title	EMS-33-DA-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec Encryption Management Server 3.3 and Desktop 10.3: Administration. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	END-ENC-8-E1XC-PUBLIC
Course Description	Day Public Class (Price for 1 student) Symantec Endpoint Encryption 8: Administration. Price for each additional student - \$328
Course Length	Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$319.94
Course Title	EVAULT10-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec Enterprise Vault 10.x for Exchange: Administration. Price for each additional student - \$2870
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2799.48
Course Title	EVAULT10-FSA-E1XC-PUBLIC

Course Description	4 Day Public Class (Price for 1 student) Symantec Enterprise Vault 10.x for File System Archiving: Administration. Price for each additional student - \$2296
Course Length	4 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2239.58
Course Title	EVAULT10-MT-E1XC-PUBLIC
Course Description	4 Day Public Class (Price for 1 student) Symantec Enterprise Vault 10.x for Exchange: Maintain & Troubleshoot. Price for each additional student - \$2296
Course Length	4 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2239.58
Course Title	EVAULT11-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Veritas Enterprise Vault 11.x for Exchange: Administration. Price for each additional student - \$3075
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2999.44
Course Title	EVAULT11-ID-E1XC-PUBLIC
Course Description	4 Day Public Class (Price for 1 student) Veritas Enterprise Vault 11.x: Implementation and Deployment. Price for each additional student - \$2460
Course Length	4 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2399.55
Course Title	EVAULT11-LD-E1XC-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) Legal Discovery Using Veritas Enterprise Vault 11.x Discovery Accelerator. Price for each additional student - \$1845
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1799.66
Course Title	GHOST-2.5-E1XC-PUBLIC
Course Description	4 Day Public Class (Price for 1 student) Symantec Ghost Solution Suite 2.5. Price for each additional student - \$2296
Course Length	4 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2239.58
Course Title	GHOST-3.0-E1XC-PUBLIC
Course Description	4 Day Public Class (Price for 1 student) Symantec Ghost Solution Suite 3.0: Administration. Price for each additional student - \$2952
Course Length	4 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2879.46
Course Title	HA0414-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Veritas Cluster Server 6.x for Unix: Advanced Administration. Price for each additional student - \$3075
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2999.44
Course Title	HA0425-E1XC-PUBLIC

Course Description	5 Day Public Class (Price for 1 student) Veritas Storage Foundation 6 for Oracle RAC: Administration. Price for each additional student - \$2870
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2799.48
Course Title	HA-UNIX-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Symantec High Availability Fundamentals with Storage Foundation 6.x and Cluster Server 6.x for UNIX. Price for each additional student - \$2870
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2799.48
Course Title	IAS-R1-E1XC-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) Identity and Authentication Services R1. Price for each additional student - \$2214
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2159.6
Course Title	IT-MANAG-8-0-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) IT Management Suite 8.0 for Administrators. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	IT-MANAG-8-1-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) IT Management Suite 8.1 for Administrators. Price for each additional student - \$3690
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$3599.32
Course Title	ITMS-8-1-DT-E1XC-PUBLIC
Course Description	2 Day Public Class (Price for 1 student) IT Management Suite 8.1 Diagnostics and Troubleshooting. Price for each additional student - \$1476
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1439.73
Course Title	MG10-5-ADMIN-E1XC-PUBLIC
Course Description	3 Day Public Class (Price for 1 student) Symantec Messaging Gateway 10.5: Administration. Price for each additional student - \$2214
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2159.6
Course Title	NBU7-5-UNIX-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Veritas NetBackup 7.5 for UNIX: Administration. Price for each additional student - \$2870
Course Length	5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$2799.48
Course Title	NBU7-6-BMR-E1XC-PUBLIC

Course Description	3 Day Public Class (Price for 1 student) Symantec NetBackup 7.6 Bare Metal Restore: Administration. Price for each additional student - \$1843
Course Length	3 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1797.72
Course Title	NBU7-7-ADMIN-E1XC-PUBLIC
Course Description	5 Day Public Class (Price for 1 student) Veritas Netbackup 7.7: Administration. Price for each additional student - \$3075
Course Length	5 Day
Min. Participants	1
Max. Participants	1

Course Title	035144SE-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) Certified Dark Web Analyst Common Body of Knowledge 5th Edition. The Dark Web is a vast, well-traveled, and nearly ignored waypoint of exfiltrated corporate assets as well as discussions of network attacks and methodology. Information security regularly overlooks the significance of this largely untapped resource. This course covers tools, techniques, and tactics for leveraging the Dark Web as a means for defending organizational assets proactively and reactively. The Dark Web consists of networking environments and infrastructure that does not leverage traditional TCP/IP technology. Appreciating these networks and adopting a successful defensive posture includes knowing what attack vectors are currently in use. Parsing nuances and critical distinctions can establish the difference between an attempted attack and a successful attack from the Dark Web. This course will prepare the student to understand the Dark Web, adopt protective practices for accessing Dark Networks, and find the places where ongoing attack discussions are unfolding in real time. Beyond navigation, the student will learn to use relevant tools to discover and gain entry to otherwise closed sessions. In addition, students will learn how to establish private and anonymous technologies to enhance their own efforts to conduct research and investigation. Access to the Dark Web requires specialized programs, such as TOR (The Onion Router). In depth coverage of such technology, as well as their proper installation, configuration, and use, is paramount to the proper capture of important information. Students will learn to use these tools and draw important distinctions between privacy, anonymity, and the means by which they can establish both. Lastly, the course will explore the burgeoning area of Open Source Intelligence (OSInt) over Dark Networks and includes frameworks, techniques, and recommendations for proper analysis and synthesis of discovered information.. Price for Additional Student \$2,240.00
Course Length	5 Day

Course Title	AWS-245-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) MLOps Engineering on AWS. Learn to bring DevOps-style practices into the building, training, and deployment of ML models. Could your Machine Learning (ML) workflow use some DevOps agility? MLOps Engineering on AWS will help you bring DevOps-style practices into the building, training, and deployment of ML models. ML data platform engineers, DevOps engineers, and developers/operations staff with responsibility for operationalizing ML models will learn to address the challenges associated with handoffs between data engineers, data scientists, software developers, and operations through the use of tools, automation, processes, and teamwork. By the end of the course, go from learning to doing by building an MLOps action plan for your organization. This course builds upon and extends the DevOps practice prevalent in software development to build, train, and deploy machine learning (ML) models. The course stresses the importance of data, model, and code to successful ML deployments. It will demonstrate the use of tools, automation, processes, and teamwork in addressing the challenges associated with handoffs between data engineers, data scientists, software developers, and operations. The course will also discuss the use of tools and processes to monitor and take action when the model prediction in production starts to drift from agreed-upon key performance indicators. The instructor will encourage the participants in this course to build an MLOps action plan for their organization through daily reflection of lesson and lab content, and through conversations with peers and instructors. Course level: Intermediate Duration: 3 days, 8 hours/day. Price for Additional Student \$1,296.00

In this course, students will learn what a containerized application looks like when orchestrated by Docker Swarm. We will cover scheduling workloads across a cluster, networking stateless and stateful applications, provisioning dynamic configuration and persistent storage, and scaling highly available applications in this course intended to set a strong foundation in orchestration for all technical roles.. Price for Additional Student \$509.00
Course Length	1 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$2479.92
Course Title	CN110-Public
Course Description	1 Day Public Class (Price for 1 student) Docker Swarm Application Essentials. In this course, students will learn what a containerized application looks like when orchestrated by Docker Swarm. We will cover scheduling workloads across a cluster, networking stateless and stateful applications, provisioning dynamic configuration and persistent storage, and scaling highly available applications in this course intended to set a strong foundation in orchestration for all technical roles.. Price for Additional Student \$636.00
Course Length	1 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$619.98
Course Title	CN120-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Kubernetes Application Essentials. Whether your focus is on developing containerized applications or managing a container-centric infrastructure, the Kubernetes Application Essentials course introduces Kubernetes container orchestration for everyone involved in the software development life cycle. Through a real-world approach for design and deployment considerations, students can expect to learn about the foundational Kubernetes components required for application workloads. Specifically, students will examine Kubernetes architecture, explore how Kubernetes objects work together for running an application, and learn how Kubernetes makes use of compute, networking, and storage resources.. Price for Additional Student \$1,018.00
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$4959.84

Course Description	2 Day Private/Onsite Class (Price for 8 students) Advanced Kubernetes Security. Advanced Kubernetes Security course focuses on developing the skills and knowledge needed for implementing security measures from code to a production Kubernetes cluster. Students will engage in topics pertaining to adding security mechanisms along the code deployment pipeline and reviewing and remediating security concerns within a Kubernetes infrastructure. Topics include declarative configuration analysis, container image scanning, CIS benchmark scanning and remediation, and identifying and mitigating attack vectors within Kubernetes. Kubernetes Operations and System Integration teams will benefit greatly as they work towards creating a security posture that aligns with security policies for their Kubernetes environments. At the end of this course, you will have the knowledge and skills that will aid in passing the CKS: Certified Kubernetes Security exam.. Price for Additional Student \$1,274.00

Course Title	CNX0013-Private/Onsite

Course Description	5 Day Private/Onsite Class (Price for 8 students) CyberSec First Responder® (Exam CFR-410). This course covers network defense and incident response methods, tactics, and procedures that are in alignment with industry frameworks such as NIST SP 800-61r2 (Computer Security Incident Handling Guide), US-CERT's National Cyber Incident Response Plan (NCIRP), and Presidential Policy Directive (PPD)-41 on Cyber Incident Coordination. It is ideal for candidates who have been tasked with the responsibility of monitoring and detecting security incidents in information systems and networks, and for executing standardized responses to such incidents. The course introduces tools, tactics, and procedures to manage cybersecurity risks, defend cybersecurity assets, identify various types of common threats, evaluate the organization's security, collect and analyze cybersecurity intelligence, and remediate and report incidents as they occur. This course provides a comprehensive methodology for individuals responsible for defending the cybersecurity of their organization. This course is designed to assist students in preparing for the CertNexus CyberSec First Responder (Exam CFR-410) certification examination. What they learn and practice in this course can be a significant part of their preparation. In addition, this course and subsequent certification (CFR-410) meet all requirements for personnel requiring DoD directive 8570.01-M and directive 8140 position certification baselines: CSSP Analyst CSSP Infrastructure Support CSSP Incident Responder CSSP Auditor The course and certification also meet all criteria for the following Cybersecurity Maturity Model Certification (CMMC) domains: Incident Response (IR) Audit and Accountability (AU) Risk Management (RM). Course Description	3 Day Private/Onsite Class (Price for 8 students) Cyber Secure Coder Certified CSC (Exam CSC-210). The stakes for software security are very high, and yet many development teams deal with software security only after the code has been developed and the software is being prepared for delivery. As with any aspect of software quality, to ensure successful implementation, security and privacy issues should be managed throughout the entire software development lifecycle. This course presents an approach for dealing with security and privacy throughout the entire software development lifecycle. Students will learn about vulnerabilities that undermine security, and how to identify and remediate them in your own projects. They will learn general strategies for dealing with security defects and misconfiguration, how to design software to deal with the human element in security, and how to incorporate security into all phases of development. This course includes an exam voucher.. Price for Additional Student \$1,344.00

Course Description	3 Day Private/Onsite Class (Price for 8 students) Certified Ethical Emerging Technologist™ (CEET): Exam CET-110. Mutually reinforcing innovations in computing and engineering are catapulting advances in technological production. From blockchain and artificial intelligence (AI) to gene editing and the Internet of Things (IoT), these advances come with tremendous opportunities for improvement in productivity, efficiency, and human well-being. But as scandals increasingly demonstrate, these advances also introduce new and serious risks of conflict and harm. Technology professionals now face growing demands to identify and mitigate ethical risks to human rights and the environment, as well as to navigate ethical tradeoffs between qualities such as privacy and accuracy, fairness and utility, and safety and accountability. This course provides the tools to identify and manage common ethical risks in the development of emerging data-driven technologies. It distills ethical theory, public regulations, and industry best practices into concrete skills and guidelines needed for the responsible development of digital products and services. By following the course's practical, problems-based approach, students will become adept at applying theories, principles, frameworks, and techniques in their own roles and organizations.. Course Title	COMP-240-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) CompTIA PenTest+ (Preparation for Exam PT0-002). Security remains one of the hottest topics in IT and other industries. It seems that each week brings news of some new breach of privacy or security. As organizations scramble to protect themselves and their customers, the ability to conduct penetration testing is an emerging skill set that is becoming ever more valuable to the organizations seeking protection, and ever more lucrative for those who possess these skills. In this course, students will be introduced to some general concepts and methodologies related to pen testing, and they will work their way through a simulated pen test for a fictitious company. This course can also assist them if they are pursuing the CompTIA PenTest+ certification, as tested in exam PT0-002. The course is designed to provide content and activities that correlate to the exam objectives, and therefore can be a resource as you prepare for the examination.. Course Title	COMP-245-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) CompTIA Project+ (Preparation for Exam PK0-004). If you are taking this course, you probably have some professional exposure to the duties of a project manager, or you may be embarking on a career in professional project management. As a project manager, the ability to demonstrate best practices in project management both on the job and through professional certification is becoming the standard to compete in today's fast-paced and highly technical workplace. In this course, you will apply the generally recognized practices of project management to successfully manage projects. Project managers are always under severe pressure to complete projects on time and within budget. However, most projects fail to meet these demands and as a result, many projects are terminated early. Successful project management requires knowledge and experience. This course is designed to provide students with the skills needed to be a successful project manager in today's rapidly changing world. Additionally, this course can be a significant part of their preparation for the CompTIA Project+ certification exam. The skills and knowledge they gain in this course will help them avoid making costly mistakes and increase your competitive edge in the project management profession.. Course Title	COMP-250-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) CompTIA Advanced Security Practitioner (CASP+) (Preparation for Exam CAS-004). Information security is a crucial field in the world of business. In this course, students will expand on their knowledge of information security to apply more advanced principles that will keep their organization safe from the many ways it can be threatened. They will apply critical thinking and judgment across a broad spectrum of security disciplines to propose and implement sustainable security solutions that map to organizational strategies; translate business needs into security requirements; support IT governance and risk management; architect security for hosts, networks, and software; respond to security incidents; and more. Today's IT climate demands individuals with demonstrable skills, and the information and activities in this course can help students develop the skill set they need to confidently perform their duties as an advanced security practitioner.. Course Title	COMP-260-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) CompTIA Network+ (Preparation for Exam N10-008). CompTIA is a not-for-profit trade association with the purpose of advancing the interests of IT professionals and IT channel organizations and its industry-leading IT certifications are an important part of that mission. CompTIA's Network+ certification is a foundation-level certification designed for IT professionals with around one year of experience, whose job role is focused on network administration. The CompTIA Network+ exam will certify the successful candidate has the knowledge and skills required to troubleshoot, configure, and manage common network devices; establish basic network connectivity; understand and maintain network documentation; identify network limitations and weaknesses; and implement network security, standards, and protocols. The candidate will have a basic understanding of enterprise technologies, including cloud and virtualization technologies. The Official CompTIA Network+ (Exam N10-007): 2019 Update will teach you the fundamental principles of installing, configuring, and troubleshooting network technologies and help you to progress a career in network administration. In this course, you will build on your existing user-level knowledge and experience with personal computer operating systems and networks to master the fundamental skills and concepts that you will need to use on the job in any type of networking career. This course can benefit you in two ways. If you intend to pass the CompTIA Network+ (Exam N10-007) certification examination, this course can be a significant part of your preparation. But certification is not the only key to professional success in the field of computer security. Today's job market demands individuals with demonstrable skills, and the information and activities in this course can help you build your computer security skill set so that you can confidently perform your duties in any network-related role.. Max. Participants	1
GSA Price (inc. IFF)	\$1559.7
Course Title	CP-CCTE-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Troubleshooting Expert R81.1 (CCTE). This course is designed for security experts and Check Point resellers who desire to obtain the necessary knowledge required to perform more advanced troubleshooting skills while managing their security environments.. Price for Additional Student \$1,280.00
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$6238.79
Course Title	CP-CCTE-Public
Course Description	2 Day Public Class (Price for 1 student) Troubleshooting Expert R81.1 (CCTE). This course is designed for security experts and Check Point resellers who desire to obtain the necessary knowledge required to perform more advanced troubleshooting skills while managing their security environments.. Price for Additional Student \$1,600.00
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1559.7
Course Title	CP-CCVS-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Check Point Certified VSX Specialist (CCVS). A 2-day Specialist course which provides a comprehensive understanding of the Check Point Virtual Security Extension (VSX) solution and describes how to deploy it within the corporate network environment.. Price for Additional Student \$1,280.00
Course Length	2 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$6238.79
Course Title	CP-CCVS-Public
Course Description	2 Day Public Class (Price for 1 student) Check Point Certified VSX Specialist (CCVS). A 2-day Specialist course which provides a comprehensive understanding of the Check Point Virtual Security Extension (VSX) solution and describes how to deploy it within the corporate network environment.. Price for Additional Student \$1,600.00
Course Length	2 Day

Course Title	CSC-CBROPS-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) Understanding Cisco Cybersecurity Operations Fundamentals (CBROPS) v1.0. The Understanding Cisco Cybersecurity Operations Fundamentals (CBROPS) v1.0 course teaches you security concepts, common network and application operations and attacks, and the types of data needed to investigate security incidents. This course teaches you how to monitor alerts and breaches, and how to understand and follow established procedures for response to alerts converted to incidents. Through a combination of lecture, hands-on labs, and self-study, you will learn the essential skills, concepts, and technologies to be a contributing member of a Cybersecurity Operations Center (SOC) including understanding the IT infrastructure, operations, and vulnerabilities. This course helps you prepare for the Cisco Certified CyberOps Associate certification and the role of a Junior or Entry-level cybersecurity operations analyst in a SOC. This course also earns you 30 Continuing Education (CE) credits towards recertification.. Price for Additional Student \$2,749.00
Course Length	5 Day

Course Title	DBOR-970-Private/Onsite

Course Description	3 Day Private/Onsite Class (Price for 8 students) Introduction to Oracle Database and SQL. This course is designed for developers, analysts, and others who need to use Oracles SQL language to query or modify data, and to create basic objects in Oracle databases. It is an introductory course, so no prior SQL knowledge is required. Students receive a comprehensive introduction to Oracles implementation of the SQL language. Students use common query tools such as SQL Developer, TOAD, SQL*Plus, etc. to do course workshops to reinforce all concepts. Primary emphasis is placed on generating efficient queries to extract data from the database. Hands-on workshops constitute approximately 50% of the class.. Price for Additional Student \$1,344.00
Course Length	3 Day
Min. Participants	1
Max. Participants	8

Course Title	DBOR-971-Private/Onsite
Course Description	0.5 Day Private/Onsite Class (Price for 8 students) The Essentials: How to Read Oracle Execution Plans. Because an execution plan reveals how the Oracle Cost Based Optimizer (CBO) has decided to execute your query, and that is the essential role in query performance, being able to capture and understand query SQL execution plans is a vital skill for anyone developing or maintaining applications where performance is important. This course is a great place to start! You may think of it as how to read an execution plan or how to interpret an execution plan. However you say it, if youre interested in SQL performance, you need to know the essential components of the plan (capture, order of steps, join order, etc) in order to figure out how the Oracle Cost Based Optimizer has decided to execute your query. This course is a great place to start!. Price for Additional Student \$269.00
Course Length	0.5 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$1310.15

Course Title	DBOR-972-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) An Introduction to JSON in Oracle Databases. JSON has become the preferred standard for data interchange and is used in most application APIs today. Learn how to implement JSON within an Oracle Database. Configuration is straight forward, but the ability to manipulate JSON data requires an understanding of various new features in Oracle. We will demonstrate the primary features students will need, together with recommendations when to use each. Students will do hands on labs to reinforce each feature.. Price for Additional Student \$896.00
Course Length	2 Day
Min. Participants	1

Course Description	2 Day Private/Onsite Class (Price for 8 students) Oracle Database: Managing Multitenant Architecture. This hands-on course covers all aspects of the multitenant architecture, providing detailed information on the components of a multitenant container database and its regular pluggable databases. Students learn why and how to create and manage a multitenant container database and its regular pluggable databases. They practice creating, cloning, and plugging in pluggable databases, and converting from non-CDB to the multitenant environment. They learn how to create common and local users; manage encryption, security and audit; monitor and tune performance; perform backup and recovery operations with RMAN. Application and proxy pluggable databases are described but not covered in detail. An additional workshop (optional, depending on time, interest, and pre-requisite knowledge) is included on configuring Data Guard in a Multitenant environment. The current release of the database is used for exercises and demonstrations, and the content back-ported as necessary for previous releases.. Price for Additional Student \$896.00

Course Title	DBOR-979-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Oracle ASM / ACFS Administration. In this class students will learn how to install, configure and manage Oracle (ASM) and the Oracle Clustered File System (ACFS). This is a fully instructor-led class with demonstrations and hands-on workshops. ASM / ACFS is much more than a storage platform for Oracle databases: it can also replace third party file servers and clustered file systems, acting as a highly available and fault tolerant storage medium that can be used by any application. Learn why ASM and Automatic Storage Management Cluster File System (ACFS) are so important for performance and reliability of Oracle systems and how to exploit their capabilities to the full and why ASM is the best performing storage option available for Oracle Databases.. Price for Additional Student \$896.00
Course Length	2 Day

GSA Price (inc. IFF)	\$1637.68
Course Title	DBOR-981-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) Oracle Grid Infrastructure. Grid Infrastructure is Oracles platform for running Oracle databases (single instance or RAC) and other services (e.g. Apache web servers) in a highly available, fault tolerant, manner. It includes facilities for shared storage (ASM, ASM Clustered File System/ACFS, aka Cloud FS) and network name and address management that underpin the capability to keep databases, application servers, and third party products running and available at all times. Students will learn how to install and use Grid Infrastructure to manage Oracle Databases. The course will also demonstrate that Grid Infrastructure is not necessarily complicated and can indeed make their life simpler. They will however also learn that exploiting its capabilities to the full can give fantastic levels of performance and fault tolerance, at a far lower cost than any competing products. The environment is a two node Linux cluster for each student, to be configured starting with nothing more than the operating system installed.. Price for Additional Student \$1,344.00
Course Length	3 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$6550.73

Course Title	DBOR-982-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) Oracle RAC Administration Training. In this 3 day class, students will learn how to install, configure and manage Oracle Real Application Clusters databases. Emphasis is placed on manual, command line techniques. Each student is provided with a pre-built cluster, with Grid Infrastructure and shared storage (both ASM and a clustered file system) configured. The course is workshop oriented: students will go through practical exercises that cover all the tasks likely to be needed when creating, migrating to, and administering RAC databases. Configuring MAA (Maximum Availability Architecture, RAC plus Data Guard) is discussed and (time, interest, and background knowledge permitting) can be included as demonstration or exercise.. Price for Additional Student \$1,344.00

Course Title	DBOR-983-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Oracle Database Administration Workshop Level 1. This course provides students with the skills necessary to create and administer an Oracle database. In this class they will concentrate on the skills and best practices required for day-to-day database administration tasks such as security, creating and managing users, space management, administering undo and redo, running utilities, configuring Oracle networking, and simple backup and recovery techniques. An in-depth discussion of Oracle instance and database architecture is also provided. The final three topics are optional for this course, as they are covered in real detail elsewhere in the curriculum. However, if time permits and students are interested, they may be covered to a certain extent. The course is run on the current release of database, but the instructors will back-port the course to earlier releases where behavior has significantly changed and it is relevant to the students.. Price for Additional Student \$896.00
Course Length	2 Day

Course Title	DEVO-105-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Continuous Delivery and DevOps. Containers have entirely changed how developers and end-users see applications as a whole. With this course, you'll learn all about containers, their architecture and benefits, and how to implement them within your development lifecycle. You'll discover how you can transition from the traditional world of virtual machines and adopt modern ways of using DevOps to ship a package of software continuously. Starting with a quick refresher on the core concepts of containers, you'll move on to study the architectural concepts to implement modern ways of application development. You'll cover topics around Docker, Kubernetes, Ansible, Terraform, Packer, and other similar tools that will help you to build a base. As you advance, the course covers the core elements of cloud integration (AWS ECS, GKE, and other CaaS services), continuous integration, and continuous delivery (GitHub actions, Jenkins, and Spinnaker) to help you understand the essence of container management and delivery. The later sections of the course will take you through container pipeline security and GitOps (Flux CD and Terraform). By the end of this DevOps course, you'll have learned best practices for automating your development lifecycle and making the most of containers, infrastructure automation, and CaaS, and be ready to develop applications using modern tools and techniques.. Price for Additional Student \$749.00

Course Title	DEVO-152-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) DASA DevOps Fundamentals 2. The DASA DevOps Fundamentals certification provides the core education necessary to build DevOps vocabulary and understand its principles and practices. Its the ideal starting point for DevOps journeys, whether students are already familiar with working with Agile and/or DevOps teams or not. Faster software deployment, increased deployment frequency, and higher change success rate are only some of the visible outcomes of practicing DevOps. Organizations such as Netflix, Spotify, and Facebook are transforming IT by successfully implementing DevOps principles. But you dont have to be big to be a DevOps leader. Companies large and small, young and old, have smoothly made the transition and have the proof of success in their pockets. This course will inspire students to serve as a change champion by sharing and using what they learned, and continue to learn, about DevOps to lead and mentor others. A solid understanding of DevOps Fundamentals has helped numerous professionals and organizations how to approach a DevOps journey, not only from a tool and automation perspective but also looking in-depth at the softer side of things. This 2-day course provides students an extensive introduction to the core Agile DevOps principles. It covers all 12 key knowledge and skill competencies defined by DASA to ensure you acquire a solid knowledge of DevOps concepts and terminology. Multiple cases or scenarios, group discussions, and examples are included in the course to enhance their learning experience.. Price for Additional Student \$510.00

Course Title	DEVO-300-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) DASA DevOps Coach. The DASA DevOps Coach certification is designed to prepare you to become a catalyst for change for high performing individuals, teams, and organizations. DevOps Coaches understand how to advocate and embed DevOps principles in its true spirit and play a crucial role in helping build high performing self-organizing teams. Like all other hyper-growth trends in the IT industry, the adoption of DevOps is not immune to potential misunderstandings and misconceptions. Besides relevant tooling and technology, DevOps predominantly entails a cultural shift towards a new mindset, behaviors, a new organization, and a new way of working. DASA DevOps Coaches within organizations make remarkable contributions on the ground in developing team members and teams into high performing teams with a new mindset, behaviors, organization, and a way of working. The objective of the Coach is to help teams develop their DevOps skills, knowledge, and behavior in order to rapidly become self-sufficient and fully leverage the benefits of DevOps. Coaches promote and facilitate teams that make them more competent and fulfilled so that they are proficient to contribute to their organization and find meaning in DevOps adoption. As a coach, the student help to speed up delivery in teams, create more transparency, and build a continuous improvement mindset. At the Organization level, the student provide strategic coaching and help organizations achieve their transformational goals. The DASA DevOps Coach program is designed to prepare professionals for working as an effective DevOps Coach. During this intense, activity-based course students become familiar with the characteristics and traits of a successful DevOps Coach, learn about DASAs coaching model and apply the DASA DevOps Competence Model in teams and organizations.. Course Description	2 Day Private/Onsite Class (Price for 8 students) DASA DevOps Product Owner. The DASA DevOps Product Owner certification is designed to enable students into a critical leadership role responsible for managing the full lifecycle of a product from concept to grave. Faster software deployment, increased deployment frequency, and higher change success rate are only some of the visible outcomes of practicing DevOps. Organizations such as Netflix, Spotify, and Facebook are transforming IT by successfully implementing DevOps principles. But you dont have to be big to be a DevOps leader. Companies large and small, young and old, have smoothly made the transition and have the proof of success in their pockets. DevOps Product Owners have a systematic responsibility for the entire lifecycle of a product and have to ensure the maximum value of the product is achieved. To do so successfully, they must be prepared to address a mixed set of requirements, from new product features to incidents in current versions. As if that wasnt challenging enough, a capacity to engage with a large group of stakeholders, both within the team as well as beyond it, is essential. In order to respond to all these demands, it is crucial that professionals are as prepared as they can be. With this in mind, the DASA DevOps Product Owner certification extends traditional Agile Product Owner courses and tackles the extended set of requirements that the Product Owner faces when teams start to take on both Dev and Ops responsibilities. The course covers traditional Agile and Scrum concepts and capabilities within a DevOps context so as to help both aspiring as well as experienced Product Owners to develop their role.. GSA Price (inc. IFF)	\$1637.68
Course Title	EJBD-130-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) Designing Concurrent Systems With Apache Zookeeper. This course is unique in that it teaches the best practices and caveats of designing modern concurrent Big Data systems. ZooKeeper is an ideal tool to understand and practice the theory, and to reason about system performance, fault tolerance, and stability. ZooKeeper is the defacto standard for coordinating multiple components in distributed systems. In this class, we will learn ZooKeeper architecture, design, and implementation. Then we will go through the standard ZooKeeper design patterns and their implementation. In recent years, most of the design work with ZooKeeper is done through Curator. The curator makes the implementation of the design patterns called recipes much easier and more robust. We will work with Elections (such as Leader Latch and Leader Election), Locks, Barriers, and more. The course includes a balance of theory and lab work.. Price for Additional Student \$1,344.00
Course Length	3 Day
Min. Participants	1
Max. Participants	8

Course Description	3 Day Private/Onsite Class (Price for 8 students) Test Driven Development (TDD) and Unit Testing Essentials. Test Driven Development (TDD) and Unit Testing Essentials is a three-day, comprehensive hands-on test-driven development / JUnit / TDD training course geared for developers who need to get up and running with essential Test-driven development programming skills using JUnit and various open-source testing frameworks. Throughout the course you'll learn, explore and gain practical experience working with best practices for writing great programs in Java, using test-driven development techniques. This course quickly introduces you to the core features and benefits of JUnit. You'll leave this course armed with the skills required to leverage solid test driven development and unit testing techniques, using the latest industry techniques and best practices. Throughout the course, you'll work on a project with labs specifically oriented towards using TDD to implement a complex and multi-faceted web application that uses a database in its final form.. Price for Additional Student \$1,123.00

Course Title	EJCJ-535-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) Implementing Agile Test Driven Development (for Java Developers). Implementing Agile Test Driven Development for Java Developers is a three day, in-depth Agile-testing training course that provides experienced Java developers with a solid introduction to Test Driven Development and test first design within the context of Agile processes and practices. Test-driven development (TDD) is an evolutionary approach to development where you must first write a test that fails before you write new functional code. This process was developed by Kent Beck and Ward Cunningham. It is primarily an agile approach to software development and is one of the core principles of Extreme Programming.. Price for Additional Student \$1,123.00

Course Title	EJCJ-595-Private/Onsite
Course Description	4 Day Private/Onsite Class (Price for 8 students) Software Design and Architecture. This course explores proven real-world techniques to meet the biggest challenge in the software development community - building quality systems which fulfill your requirements, and delivering them on time. The focus of the course is to give you the practical skills that are most critical in building well designed software systems. It is extremely hands-on and applied, as well as giving you the formal knowledge you need to be fully conversant in this important area. This course explores the most common object-oriented design patterns (Gang of Four) and how to use these patterns to develop solid, robust and reusable software development applications. The course covers the patterns in the three core areas: Creational, Structural, Behavioral. This course is hands-on with design projects and programming labs. Course examples in the slides are geared towards Java. There are also several projects interlaced in the course, in addition to coding labs.. Price for Additional Student \$1,498.00
Course Length	4 Day

Course Title	GCP-306-Private/Onsite
Course Description	4 Day Private/Onsite Class (Price for 8 students) Architecting Hybrid Cloud Infrastructure with Anthos. This four day, instructor-led course prepares students to modernize, manage, and observe their containerized applications using Kubernetes, in Google Cloud, AWS, Azure, and on-premises. Through presentations and hands-on labs, participants explore Google Kubernetes Engine (GKE), Connect Agent, Anthos Service Mesh and Anthos Config Management features. Participants learn how to work with containerized applications even when split between multiple clusters, hosted by multiple cloud providers or on-premises. This course is a continuation of Architecting with GKE and assumes direct experience with the technologies covered in that course.. Price for Additional Student \$1,702.00
Course Length	4 Day
Min. Participants	1
Max. Participants	8

Course Title	LNx-LFD232-CFCD-Public
Course Description	2 Day Public Class (Price for 1 student) Cloud Foundry for Developers (LFD232) + CFCD Exam Bundle. The Cloud Foundry Certified Developer certification is a performance-based exam designed to verify a candidate's expertise using the Cloud Foundry platform and building cloud-native applications. Exam Details This is an online proctored exam that can take up to three hours to complete. It includes performance-based tasks and multiple choice questions, to test individual developers on their practical and conceptual knowledge of Cloud Foundry and general cloud-native architectural principles.. Price for Additional Student \$460.00
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$448.41
Course Title	LNx-LFD232-Public
Course Description	2 Day Public Class (Price for 1 student) Cloud Foundry for Developers (LFD232). Businesses around the world need more skilled developers. Update your cloud-native skills with Cloud Foundry training and certification to deliver world-class apps. This course teaches you how to use Cloud Foundry to build, deploy and manage a cloud-native microservices solution. Topics covered directly align with the knowledge domains tested by the Cloud Foundry Certified Developer exam and will substantially increase students ability to become certified. Lab Info Lab exercises for this course will be conducted on your own Cloud Foundry instance. While you can install Cloud Foundry locally, this can be challenging and will consume a lot of resources on your computer. There are hosted providers that may provide free trials, but their offerings do tend to change, and may impose resource limitations. In such cases, you may have to upgrade to a paid plan to complete the labs.. Price for Additional Student \$460.00
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$448.41
Course Title	LNx-LFD254-Public
Course Description	1.5 Day Public Class (Price for 1 student) Containers for Developers and Quality Assurance (LFD254). This course will show you how Developers and Quality Assurance Engineers can automate and streamline their processes with Docker. Lab Info To successfully complete the lab exercises in this course, access to a Linux server or Linux desktop/laptop is required. Access to a public cloud provider, or VirtualBox on your machine is also needed. Detailed instructions to set up your lab environment are provided in the course. If using a cloud provider like GCP or AWS, you should be able to complete the lab exercises using the free tier or credits provided to you. However, you may incur charges if you exceed the credits initially allocated by the cloud provider, or if the cloud providers terms and conditions change.. Price for Additional Student \$239.00

Max. Participants	1
GSA Price (inc. IFF)	\$232.98
Course Title	LNx-LFD259-CKAD-Public
Course Description	1.5 Day Public Class (Price for 1 student) Kubernetes for Developers (LFD259) + CKAD Exam Bundle. The Certified Kubernetes Application Developer exam certifies that users can design, build, configure, and expose cloud native applications for Kubernetes. Lab Info For hands-on lab exercises, access to a Linux server or Linux desktop/laptop is required. Access to a public cloud provider, or VirtualBox on your machine is also needed. Lab exercises in this course have been tested in a GCP environment. If using a cloud provider like GCP or AWS, you should be able to complete the lab exercises using the free tier or credits provided to you. However, you may incur charges if you exceed the credits initially allocated by the cloud provider. This exam is an online, proctored, performance-based test that consists of a set of performance-based tasks (problems) to be solved in a command line. Candidates have 2 hours to complete the tasks. The exam is based on Kubernetes v1.20. Price for Additional Student \$460.00
Course Length	1.5 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$448.41
Course Title	LNx-LFD259-Public

Course Description	1.5 Day Public Class (Price for 1 student) Kubernetes for Developers (LFD259). Kubernetes is a high-velocity open source orchestration tool to deploy, scale, and update containerized applications. This course will teach you how to containerize, host, deploy, and configure an application in a multi-node cluster. The topics covered are directly aligned with the knowledge domains tested by the Cloud Native Computing Foundation Certified Kubernetes Application Developer (CKAD) Program, and will substantially increase students ability to become certified. Lab Info To successfully complete the lab exercises in this course, access to a Linux server or Linux desktop/laptop is required. Access to a public cloud provider, or VirtualBox on your machine is also needed. Detailed instructions to set up your lab environment are provided in the course. Course Title	LNx-LFS211-Public
Course Description	2 Day Public Class (Price for 1 student) Linux Networking and Administration (LFS211). Linux is the #1 operating system for web servers, cloud computing, smart phones and consumer electronics. Due to its rapid adoption, there's a shortage of Linux system administrators. According to the 2015 Linux Jobs Report, the unstoppable Linux job market shows no sign of slowing down. The Linux Foundation has created a career entry training and certification path that is 100% online, highly respected and exceptionally affordable. Get the skills you need to get certified and work as a Linux systems engineer. This 100% online self-paced course walks you through everything you need to know to pass the Linux Foundation Certified Engineer exam and advance your IT career in Linux. Lab Info Lab exercises in this course are designed to work either on native hardware, or using a virtual machine (VM), under a hypervisor, such as those in the KVM, VMWare, or Virtual Box families. Detailed instructions to set up your lab environment are provided in the course.. Price for Additional Student \$239.00

Course Title	LNx-LFS264-Public
Course Description	1 Day Public Class (Price for 1 student) Anuket Fundamentals (LFS264). Learn about the fundamentals of the Linux Foundation Anuket project and how it can help accelerate your Network Functions Virtualization (NFV) transformation from fixed-function, proprietary devices to flexible, software-driven environments. This course is designed to provide a fundamental understanding and basic hands-on knowledge of the Anuket project and a guide for navigating, participating, and benefiting from the Anuket community. This course introduces you to the fundamentals of Anuket. Starting with an overview of Network Function Virtualization (NFV) and Anuket, it delves into the challenges Anuket solves, then provides an overview of the specification, implementation, and compliance projects under the Anuket project. In addition to theoretical learning, the course includes lab exercises that you can run on the Google Cloud Platform. These lab exercises revolve around deployment and testing, for a deeper learning of some of Anuket's key areas. Lab Info: Lab exercises for this course will be conducted on your own Google Cloud account. Detailed instructions to set up your lab environment, including all the necessary images, are provided in the course. You should be able to complete the lab exercises using the free tier or credits provided to you. However, you may incur charges if you exceed the credits initially allocated by the cloud provider, or if the cloud providers terms and conditions change.. Price for Additional Student \$239.00

Course Title	LO-035447-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) Data Wrangling with Python. Data is the new oil, but it comes crude. To do anything meaningful - modeling, visualization, machine learning, for predictive analysis you first need to wrestle and wrangle with data. Data Wrangling with Python teaches you the essentials that will get you up and running with data wrangling in no time. Overview For data to be useful and meaningful, it must be curated and refined. Data Wrangling with Python teaches you the core ideas behind these processes and equips you with knowledge of the most popular tools and techniques in the domain. The course starts with the absolute basics of Python, focusing mainly on data structures. It then delves into the fundamental tools of data wrangling like NumPy and Pandas libraries. You'll explore useful insights into why you should stay away from traditional ways of data cleaning, as done in other languages, and take advantage of the specialized pre-built routines in Python. This combination of Python tips and tricks will also demonstrate how to use the same Python backend and extract/transform data from an array of sources including the Internet, large database vaults, and Excel financial tables. To help you prepare for more challenging scenarios, you'll cover how to handle missing or wrong data, and reformat it based on the requirements from the downstream analytics tool. The course will further help you grasp concepts through real-world examples and datasets. By the end of this course, you will be confident in using a diverse array of sources to extract, clean, transform, and format your data efficiently.. Price for Additional Student \$1,123.00
Course Length	3 Day
Min. Participants	1
Max. Participants	8

Course Title	LO-091004-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Access 2013: Part 1. Data is everywhere. Whether you are at the grocery store, office, laboratory, classroom, or ballpark, you are awash in data: prices, schedules, performance measures, lab results, recipes, contact information, quality metrics, market indices, grades, and statistics. Most job roles today involve some form of data management. In the case of data workers, it may be their primary job task. For some, like research scientists and accountants, data management may be a strong component of the job. And for others, such as sales clerks or those in the skilled trades, data management may consist of an incidental job responsibility such as time reporting or recording a sale. But virtually everyone is affected in some way by the need to manage data. A relational database application such as Microsoft Office Access 2013 can help you and your organization collect and manage large amounts of data. Access is a versatile tool. You can use it as a personal data management tool (for your use alone), or you can use it as a construction set to develop applications for an entire department or organization. In this course, you will learn how to use Access 2013 to manage your data, including creating a new database; constructing tables; designing forms and reports; and creating queries to join, filter, and sort data. You can also use this course to prepare for the Microsoft Office Specialist (MOS) Certification exam for Microsoft Access 2013.. Price for Additional Student \$381.00

Course Title	LO-091006-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Access 2013: Part 3. You've covered many of the basic functions of Microsoft Office Access and now you're ready to learn advanced Access features such as database management, advanced form design, packaging a database, encrypting a database, preparing a database for multi-user access, and more. Knowledge of these features separate database professionals from the casual database users or occasional designers. Today's training, added to that which you've gained from the previous two days, rounds out your Access education and provides you with marketable job skills. You can also use the course to prepare for the Microsoft Office Specialist (MOS) Certification exams for Microsoft Access 2013.. Price for Additional Student \$381.00

Course Description	0.5 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2013: Data Analysis with PivotTables. Advances in technology have made it possible to store ever increasing amounts of data. Along with this, the need to analyze that data and gain actionable insight is greater than ever. You already have experience working with Excel and creating basic PivotTables to summarize data. But, Excel is capable of doing so much more. Being able to harness the power of advanced PivotTable features and create PivotCharts will help you to gain a competitive edge. You will not only be able to summarize data for you to analyze, but also organize the data in a way that can be meaningfully presented to others. This leads to data-driven business decisions that have a better chance for success for everyone involved.. Price for Additional Student \$381.00

Course Title	LO-091018-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2010: Part 1 (Second Edition). The breadth of business, educational, and organizational information in existence today is absolutely staggering. Organizations the world over rely on this information to make sound decisions regarding all manner of affairs. But, with the amount of available data growing on a daily basis, the ability to make sense of all of that data is becoming more and more challenging. Fortunately, the days of performing calculations and analyzing data on paper are pretty much gone. Imagine having to calculate what percentage of your organization's sales occurred in one small town in Brazil. If your organization operates in multiple countries and generates billions of dollars in revenue annually, it could take a lifetime to isolate the exact figures you need and then compare those to the rest of your revenues. But, who has that kind of time? This is exactly where the power of Excel can help. By applying the robust functionality that's built into Excel to your organization's raw data, you will be able to gain of level of insight into that data that would have been nearly impossible just a couple of decades ago. Excel can help you organize, calculate, analyze, revise, update, and present your data in ways that will help the decision makers in your organization steer you in the right direction. Of course, knowing exactly how to ask Excel the questions that you need answered, which questions you can even ask, and how to interpret the answers Excel gives is necessary before you can even begin to embark on the journey ahead. This course aims to provide you with the foundational Excel knowledge and skills necessary to begin that journey. This course covers Microsoft Office Specialist exam objectives to help students prepare for the Excel 2010 Exam and the Excel 2010 Expert Exam.. Price for Additional Student \$381.00

Course Title	LO-091019-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2010: Part 2 (Second Edition). Whether you need to crunch numbers for sales, inventory, information technology, human resources, or other organizational purposes and departments, the ability to get the right information to the right people at the right time can create a powerful competitive advantage. After all, the world runs on data more than ever before and that's a trend not likely to change, or even slow down, any time soon. But with so much data available and being created on a nearly constant basis, the ability to make sense of that data becomes more critical and challenging with every passing day. You already know how to get Excel to perform simple calculations and how to modify your workbooks and worksheets to make them easier to read, interpret, and present to others. But Excel is capable of doing so much more. In order to gain a truly competitive edge, you need to be able to extract actionable organizational intelligence from your raw data. In other words, when you have questions about your data, you need to know how to get Excel to provide the answers for you. And that's exactly what this course aims to help you do. This course builds upon the foundational knowledge presented in the Microsoft Office Excel 2010: Part 1 (Second Edition) course and will help start you down the road to creating advanced workbooks and worksheets that can help deepen your organizational intelligence. The ability to analyze massive amounts of data, extract actionable intelligence from it, and present that information to decision makers is the cornerstone of driving a successful organization that is able to compete at a high level. This course covers Microsoft Office Specialist exam objectives to help students prepare for the Excel 2010 Exam and the Excel 2010 Expert Exam.. Price for Additional Student \$381.00

Course Title	LO-091020-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2010: Part 3 (Second Edition). Clearly, you use Excel a lot in your role. Otherwise, you wouldn't be taking this course. By now, you're already familiar with Excel 2010, its functions and formulas, a lot of its features and functionality, and its powerful data analysis tools. You are likely called upon to analyze and report on data frequently, work in collaboration with others to deliver actionable organizational intelligence, and keep and maintain workbooks for all manner of purposes. At this level of use and collaboration, you have also likely encountered your fair share of issues and challenges. You're too busy, though, to waste time scouring over workbooks to resolve issues or to perform repetitive, monotonous tasks. You need to know how to get Excel to do more for you so you can focus on what's really important: staying ahead of the competition. That's exactly what this course aims to help you do. This course builds off of the foundational and intermediate knowledge presented in the Microsoft Office Excel 2010: Part 1 (Second Edition) and Part 2 (Second Edition) courses to help you get the most of your Excel experience. The ability to collaborate with colleagues, automate complex or repetitive tasks, and use conditional logic to construct and apply elaborate formulas and functions will put the full power of Excel right at your fingertips. The more you learn about how to get Excel to do the hard work for you, the more you'll be able to focus on getting the answers you need from the vast amounts of data your organization generates. This course covers Microsoft Office Specialist exam objectives to help students prepare for the Excel 2010 Exam and the Excel 2010 Expert Exam.. Price for Additional Student \$381.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Word 2010: Part 1. These days, most people take electronic word-processing for granted. While we may still write out our grocery lists with pen and paper, we expect to use a computer to create the majority of our documents. It's impossible to avoid word-processing software in many areas of the business world. Managers, lawyers, clerks, reporters, and editors rely on this software to do their jobs. Whether you are an executive secretary or a website designer, you'll need to know the ins and outs of electronic word-processing. Microsoft Word 2010 is designed to help you move smoothly through the task of creating professional-looking documents. Its rich features and powerful tools can make your work easy, and even fun. In this course, you'll learn how to use Word 2010 to create and edit simple documents; format documents; add tables and lists; add design elements and layout options; and proof documents. You can also use this course to prepare for the Microsoft Office Specialist (MOS) Certification exams for Microsoft Word 2010.. Price for Additional Student \$381.00

Course Title	LO-091022-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Word 2010: Part 2. After completing the first course in this series, Microsoft Office Word 2010: Part 1, you are now able to perform the basic tasks to create a variety of documents. You probably noticed as you continued working in Word that there are some tasks that you repeat quite often. This course will show you how you can work more efficiently by automating some tasks and providing methods to maintain consistency between documents. You will create more complex documents that include lists, tables, charts, graphics, and newsletter layouts. You will also merge data into documents to personalize correspondence and address envelopes and labels with the data as well. Word can be used to create complex documents that are nearly as complicated as those created using a desktop publishing application. Using Word, you can control how the text flows between paragraphs and pages, you can link a story on page one to the rest of the story later in the document, and you can add graphics and specify how the text and graphic appear together on the page. You can also use this course to prepare for the Microsoft Office Specialist (MOS) Certification exams for Microsoft Word 2010.. Price for Additional Student \$381.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) 'Microsoft Office 365 Online (with Skype for Business) note: for Office 2013, 2016, or later'. This course is an introduction to Microsoft Office 365 with Skype for Business in a cloud-based environment. It can be used as an orientation to the full suite of Office 365 cloud-based tools, or the Skype for Business lessons can be presented separately in a seminar-length presentation with the remaining material available for later student reference. Using the Office 365 suite of productivity apps, users can easily communicate and collaborate together through Microsoft Outlook mail and Skype for Business instant messaging and online meetings. Additionally, the Microsoft SharePoint team site provides a central storage location for accessing and modifying shared documents. This course introduces working with shared documents in the familiar Office 365 online appsWord, PowerPoint, and Excelas an alternative to installing the Microsoft Office desktop applications. This course also introduces several productivity appsTeams, Yammer, Planner, and Delvethat can be used in combination by teams for communication and collaboration.. Course Title	LO-091029-Public
Course Description	1 Day Public Class (Price for 1 student) 'Microsoft Office 365 Online (with Skype for Business) note: for Office 2013, 2016, or later'. This course is an introduction to Microsoft Office 365 with Skype for Business in a cloud-based environment. It can be used as an orientation to the full suite of Office 365 cloud-based tools, or the Skype for Business lessons can be presented separately in a seminar-length presentation with the remaining material available for later student reference. Using the Office 365 suite of productivity apps, users can easily communicate and collaborate together through Microsoft Outlook mail and Skype for Business instant messaging and online meetings. Additionally, the Microsoft SharePoint team site provides a central storage location for accessing and modifying shared documents. This course introduces working with shared documents in the familiar Office 365 online appsWord, PowerPoint, and Excelas an alternative to installing the Microsoft Office desktop applications. This course also introduces several productivity appsTeams, Yammer, Planner, and Delvethat can be used in combination by teams for communication and collaboration.. Price for Additional Student \$476.00
Course Length	1 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$464.01
Course Title	LO-091030-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office 365 Online Productivity Apps. This course builds on the foundational knowledge of the Microsoft Office 365 online apps and takes a deeper look at the specific apps beyond Microsoft Word, Excel, and PowerPoint. Knowing that productivity often begins with assembling the right people, this course starts with the Teams app that is used to collaborate on shared files and conduct online meetings. The connection between Planner and Teams is established to keep the group's work on schedule. The Forms app is introduced as a tool for collecting information that can be used to help determine your next course of action. The apps designed to handle media assets are introduced: Stream to manage video resources and Sway to create digital stories. Finally, the power of automating your work processes is introduced in Flow, with students using the built-in templates as a starting point. For those interested in the Power BI and PowerApps features, a brief overview of these apps is included in an appendix. Important Note About Prerequisite Course: This course is designed to be the second course in a series. The first course is Microsoft Office 365 Online (with Skype for Business). It is highly recommended that you take the prerequisite course before taking this one.. Price for Additional Student \$381.00
Course Length	1 Day

Course Title	LO-091031-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office PowerPoint 2010: Part 1. It's hard to imagine a day going by without people passing along large amounts of information. Messages are everywhere, and the number of messages we receive seems to be increasing each day. Whether via phone, email, mass media, or personal interaction, we are subjected to a constant stream of information. With so much communication to contend with, it can be difficult to grab people's attention. But, we are often called upon to do just that. So, how do you grab and maintain an audience's focus when you're asked to present important information? By being clear, organized, and engaging. And, that is exactly what Microsoft Office PowerPoint 2010 can help you do. Gone are the days of flip charts or drawing on a white board to illustrate your point. Today's audiences are tech savvy, accustomed to high-impact multimedia content, and stretched for time. By learning how to use the vast array of features and functionality contained within PowerPoint 2010, you will gain the ability to organize your content, enhance it with high-impact visuals, and deliver it with a punch. In this course, you will use PowerPoint 2010 to begin creating engaging, dynamic multimedia presentations. You can also use this course to prepare for the Microsoft Office Specialist (MOS) Certification exams for Microsoft PowerPoint 2010.. Price for Additional Student \$381.00

Course Title	LO-091032-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office PowerPoint 2010: Part 2. Meetings, instruction, training, pitches; these are all a part of our daily lives. We are often called upon to deliver presentations with little notice, at multiple venues, and with varying requirements, and that includes sensitive information that needs to be guarded. Given all the variables, it may seem an overwhelming task to deliver your content, on time, to all audiences, and to only those who need to see it. Oh, and by the way, you need to make it interesting, informative, and memorable. So, how do you do it? Without the help of a robust set of tools, it would be nearly impossible. But, PowerPoint 2010 provides you with a variety of such tools, that can help you deliver content in nearly any situation, while saving time and effort. By taking advantage of these tools, you will be creating presentations that not only stand out from the crowd, but also don't consume all of your available time.. Course Title	LO-091035-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2010: Dashboards. Whether you need to crunch numbers for sales, inventory, information technology, human resources, or other organizational purposes and departments, the ability to get the right information to the right people at the right time can create a powerful competitive advantage. After all, the world runs on data more than ever before and that's a trend not likely to change, or even slow down, any time soon. But with so much data available and being created on a nearly constant basis, the ability to make sense of that data becomes more critical and challenging with every passing day. You already know how to get Excel to perform simple calculations and how to modify your workbooks and worksheets to make them easier to read, interpret, and present to others. But Excel is capable of doing so much more. To gain a truly competitive edge, you need to be able to extract actionable organizational intelligence from your raw data, and present it in a visual format that enables decision makers to view key trends and conclusions at a glance. And that's exactly what this course aims to help you do. This course builds upon the foundational knowledge presented in the Microsoft Office Excel 2010: Part 1 (Second Edition) course and will help start you down the road to creating advanced workbooks and worksheets that you can use to create dashboards. The ability to analyze massive amounts of data, extract actionable intelligence from it, and present that information to decision makers is the cornerstone of driving a successful organization that is able to compete at a high level.. Course Title	LO-091037-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Windows 10: Transition from Windows 7. Mobile devices are becoming increasingly popular. As a result, many business professionals find themselves regularly performing a greater number of work-related tasks from a variety of devices. You may find yourself included in this group of multiple-device users. But, you still perform a majority, or at least a large part, of your work from a desktop or a laptop computer. With the release of Microsoft Windows 10, Microsoft has made strides in bridging the gap between your laptop or desktop PC and a variety of mobile devices. Developing an understanding of how to accomplish your day-to-day work tasks in this new environment will push you one step closer to being able to comfortably work from a number of platforms, and a number of devices, nearly anywhere you go. Once you've gained a foundational understanding of how to operate within the Windows 10 environment from your PC, you'll be able to take full advantage of the many sharing, storing, and multi-platform benefits inherent in the Windows 10 operating system.. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office 2016: Transition from Office 2007/2010. You've used Microsoft Office 2007 or Office 2010 to create various types of business materials, from documents in Word to spreadsheets in Excel to presentations in PowerPoint. Perhaps you use Outlook to manage your calendar, contacts, and email; or Access to manage inventory and trouble tickets. However you use Office, the fact is the Office suite of applications is the de-facto standard for business productivity software. Each new release of Office builds upon the successes of the previous generations. This course builds upon the foundational Microsoft Office 2007/2010 knowledge and skills youve already acquired. It focuses on the enhanced features youll want to leverage to improve the way you manage, organize, present, and distribute your companys data and information. Youll explore a variety of enhancements, from Words ability to edit PDF files to the new Flash Fill functionality in Excel that dramatically increases the speed at which you can add data to a spreadsheet. Youll discover how the cloud has been deeply integrated into your Office experience and how collaborating with colleagues has never been easier. This Microsoft Office 2016: Transition from Office 2007/2010 course will help you bridge the gap from the version you already know and love, to the latest release of Microsofts flagship productivity suite.. Course Title	LO-091041-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Outlook 2010: Part 1. Email has become one of the most widely used methods of communication, whether for personal or business communications. In most organizations, large or small, email is the preferred form of communicating information among employees. As email grows in popularity and use, most organizations have found the need to implement a corporate mail management system such as Microsoft Office Outlook to handle the emails and meeting invitations sent among employees. In this course, you will explore the Outlook interface and when you are familiar with it; you will use Outlook to manage all aspects of email communications; use the Outlook calendar to manage appointments and meetings; use Outlook's Contacts to manage your contact information; create Tasks and Notes for yourself in Outlook; and customize the Outlook interface to serve your own personal needs. This course is the first in a series of Outlook 2010 courses. It will provide you with the basic skills you need to start using Outlook 2010 to manage your email communications, calendar events, contact information, tasks, and notes. You can also use this course to prepare for the Microsoft Office Specialist (MOS) Certification exams for Microsoft Outlook 2010.. Price for Additional Student \$381.00

In most organizations, large or small, email is the preferred form of communicating information among employees. As email grew in popularity and use, most organizations found the need to implement a corporate mail management system such as Microsoft Office Outlook to handle the emails, meeting invitations, and other communications sent among employees. In this course, you will explore the advanced features provided with the Outlook interface, such as advanced message, calendar, and contacts management. You will use the Tasks and Journal workspaces provided in the application to manage task assignments to you and others, and to record interactions you have with your colleagues. You will also share your workspaces with other users, and use Outlook data files to save and back up your important information. This course is the second in a series of two Microsoft Office Outlook 2010 courses. It will provide you with the advanced skills you may need to fully and efficiently use Outlook 2010 to manage your communications and interactions with other people. You can also use this course to prepare for the Microsoft Office Specialist (MOS) certification exams for Microsoft Outlook 2010.. Price for Additional Student \$381.00

Course Title	LO-091042-Public

Course Description	1 Day Public Class (Price for 1 student) Microsoft Office Outlook 2010: Part 2. Email has become one of the most widely used methods of communication, whether for personal or business communications. In most organizations, large or small, email is the preferred form of communicating information among employees. As email grew in popularity and use, most organizations found the need to implement a corporate mail management system such as Microsoft Office Outlook to handle the emails, meeting invitations, and other communications sent among employees. In this course, you will explore the advanced features provided with the Outlook interface, such as advanced message, calendar, and contacts management. You will use the Tasks and Journal workspaces provided in the application to manage task assignments to you and others, and to record interactions you have with your colleagues. You will also share your workspaces with other users, and use Outlook data files to save and back up your important information. This course is the second in a series of two Microsoft Office Outlook 2010 courses. It will provide you with the advanced skills you may need to fully and efficiently use Outlook 2010 to manage your communications and interactions with other people. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Outlook 2013: Part 1 (Desktop/Office 365). Email has become one of the most widely used methods of communication, whether for personal or business communications. In most organizations, large or small, email is the preferred form of communicating information amongst employees. As email grows in popularity and use, most organizations have found the need to implement a corporate mail management system such as Microsoft Office Outlook to handle the emails and meeting invitations sent among employees. In this course, you will explore the Outlook interface and when you are familiar with it, you will use Outlook to manage all aspects of email communications; use the Outlook calendar to manage appointments and meetings; use Outlook's People workspace to manage your contact information; create Tasks and Notes for yourself in Outlook; and customize the Outlook interface to serve your own personal needs. This course is the first in a series of two Microsoft Office Outlook 2013 courses. It will provide you with the basic skills you need to start using Outlook 2013 to manage your email communications, calendar events, contact information, tasks, and notes. You can also use this course to prepare for the Microsoft Office Specialist (MOS) Certification exams for Microsoft Outlook 2013.. Price for Additional Student \$381.00

Course Title	LO-091045-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Access 2016: Part 1. Data is everywhere. Whether you are at the grocery store, office, laboratory, classroom, or ballpark, you are awash in data: prices, schedules, performance measures, lab results, recipes, contact information, quality metrics, market indices, grades, and statistics. Most job roles today involve some form of data management. In the case of data workers, it may be their primary job task. For some, such as research scientists and accountants, data management may be a strong component of the job. And for others, such as sales clerks or those in the skilled trades, data management may consist of an incidental job responsibility, for example, time reporting or recording a sale. Virtually everyone is affected in some way by the need to manage data. A relational database application such as Microsoft Office Access 2016 can help you and your organization collect and manage large amounts of data. Access is a versatile tool. You can use it as a personal data management tool (for your use alone), or you can use it as a construction set to develop applications for an entire department or organization. In this course, you will use Access 2016 to manage your data, including creating a new database; constructing tables; designing forms and reports; and creating queries to join, filter, and sort data. You can also use the course to prepare for the Microsoft Office Specialist (MOS) Certification exam for Microsoft Access 2016.. Price for Additional Student \$381.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Word 2016: Part 1 (Desktop/Office 365). These days, most people take electronic word processing for granted. While we may still write out our grocery lists with pen and paper, we expect to use a computer to create the majority of our documents. It's impossible to avoid word-processing software in many areas of the business world. Managers, lawyers, clerks, reporters, and editors rely on this software to do their jobs. Whether you are an executive secretary or a website designer, you'll need to know the ins and outs of electronic word processing. Microsoft Word 2016 is designed to help you move smoothly through the task of creating professional-looking documents. Its rich features and powerful tools can make your work easy, and even fun. In this course, you'll learn how to use Word 2016 to create and edit simple documents; format documents; add tables and lists; add design elements and layout options; and proof documents. This course covers Microsoft Office Specialist exam objectives to help students prepare for the Word 2016 Exam and the Word 2016 Expert Exam.. Price for Additional Student \$381.00

Course Title	LO-091051-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2013: Part 1 (Second Edition) (Desktop/Office 365). The breadth of business, educational, and organizational information in existence today is absolutely staggering. Organizations the world over rely on this information to make sound decisions regarding all manner of affairs. But with the amount of available data growing on a daily basis, the ability to make sense of all of that data is becoming more and more challenging. Fortunately, the days of performing calculations and analyzing data on paper are pretty much gone. Imagine, if you will, having to calculate what percentage of your organization's sales occurred in one small town in, say, Brazil. If your organization operates in multiple countries and generates billions of dollars in revenue annually, it could take a lifetime to isolate the exact figures you need and then compare those to the rest of your revenues. Who has that kind of time? This is exactly where the power of Excel can help. By applying the robust functionality that's built into Excel to your organization's raw data, you will be able to gain a level of insight into that data that would have been nearly impossible just a couple of decades ago. Excel can help you organize, calculate, analyze, revise, update, and present your data in ways that will help the decision makers in your organization steer you in the right direction. Of course, knowing exactly how to ask Excel the questions that you need answered, which questions you can even ask, and how to interpret the answers Excel gives is necessary before you can even begin to embark on the journey ahead. This course aims to provide you with the foundational Excel knowledge and skills necessary to begin that journey. This course covers Microsoft Office Specialist exam objectives to help students prepare for the Excel 2013 Exam and the Excel 2013 Expert Exam.. Price for Additional Student \$381.00

Course Title	LO-091052-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2013: Part 2 (Second Edition). Whether you need to crunch numbers for sales, inventory, information technology, human resources, or other organizational purposes and departments, the ability to get the right information to the right people at the right time can create a powerful competitive advantage. After all, the world runs on data more than ever before and that's a trend not likely to change, or even slow down, any time soon. But with so much data available and being created on a nearly constant basis, the ability to make sense of that data becomes more critical and challenging with every passing day. You already know how to get Excel to perform simple calculations and how to modify your workbooks and worksheets to make them easier to read, interpret, and present to others. But, Excel is capable of doing so much more. To gain a truly competitive edge, you need to be able to extract actionable organizational intelligence from your raw data. In other words, when you have questions about your data, you need to know how to get Excel to provide the answers for you. And that's exactly what this course aims to help you do. This course builds upon the foundational knowledge presented in the Microsoft Office Excel 2013: Part 1 (Second Edition) course and will help start you down the road to creating advanced workbooks and worksheets that can help deepen your understanding of organizational intelligence. The ability to analyze massive amounts of data, extract actionable information from it, and present that information to decision makers is at the foundation of a successful organization that is able to compete at a high level. This course covers Microsoft Office Specialist exam objectives to help students prepare for the Excel 2013 Exam and the Excel 2013 Expert Exam.. Price for Additional Student \$381.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2013: Part 3 (Second Edition). Clearly, you use Excel a lot in your role. Otherwise, you wouldn't be taking this course. By now, you're already familiar with Excel 2013, its functions and formulas, a lot of its features and functionality, and its powerful data analysis tools. You are likely called upon to analyze and report on data frequently, work in collaboration with others to deliver actionable organizational intelligence, and keep and maintain workbooks for all manner of purposes. At this level of use and collaboration, you have also likely encountered your fair share of issues and challenges. You're too busy, though, to waste time scouring over workbooks to resolve issues or to perform repetitive, monotonous tasks. You need to know how to get Excel to do more for you so you can focus on what's really important: staying ahead of the competition. That's exactly what this course aims to help you do. This course builds off of the foundational and intermediate knowledge presented in the Microsoft Office Excel 2013: Part 1 (Second Edition) and Part 2 (Second Edition) courses to help you get the most of your Excel experience. The ability to collaborate with colleagues, automate complex or repetitive tasks, and use conditional logic to construct and apply elaborate formulas and functions will put the full power of Excel right at your fingertips. The more you learn about how to get Excel to do the hard work for you, the more you'll be able to focus on getting the answers you need from the vast amounts of data your organization generates. This course covers Microsoft Office Specialist exam objectives to help students prepare for the Excel 2013 Exam and the Excel 2013 Expert Exam.. Price for Additional Student \$381.00

Course Title	LO-091055-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2016: Part 1 (Desktop/Office 365). Organizations the world over rely on information to make sound decisions regarding all manner of affairs. But with the amount of available data growing on a daily basis, the ability to make sense of all of that data is becoming more and more challenging. Fortunately, this is where the power of Microsoft Office Excel 2016 can help. Excel can help you organize, calculate, analyze, revise, update, and present your data in ways that will help the decision makers in your organization steer you in the right direction. It will also make these tasks much easier for you to accomplish, and in much less time, than if you used traditional pen-and-paper methods or non-specialized software. This course aims to provide you with a foundation for Excel knowledge and skills, which you can build upon to eventually become an expert in data manipulation. This course covers Microsoft Office Specialist exam objectives to help students prepare for the Excel 2016 Exam and the Excel 2016 Expert Exam.. Price for Additional Student \$381.00

Course Title	LO-091056-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2016: Part 2. Whether you need to crunch numbers for sales, inventory, information technology, human resources, or other organizational purposes and departments, the ability to get the right information to the right people at the right time can create a powerful competitive advantage. After all, the world runs on data more than ever before and that's a trend not likely to change, or even slow down, any time soon. But with so much data available and being created on a nearly constant basis, the ability to make sense of that data becomes more critical and challenging with every passing day. You already know how to get Excel to perform simple calculations and how to modify your workbooks and worksheets to make them easier to read, interpret, and present to others. But, Excel is capable of doing so much more. To gain a truly competitive edge, you need to be able to extract actionable organizational intelligence from your raw data. In other words, when you have questions about your data, you need to know how to get Excel to provide the answers for you. And that's exactly what this course aims to help you do. This course builds upon the foundational knowledge presented in the Microsoft Office Excel 2016: Part 1 course and will help start you down the road to creating advanced workbooks and worksheets that can help deepen your understanding of organizational intelligence. The ability to analyze massive amounts of data, extract actionable information from it, and present that information to decision makers is at the foundation of a successful organization that is able to compete at a high level. This course covers Microsoft Office Specialist exam objectives to help students prepare for the Excel 2016 Exam and the Excel 2016 Expert Exam.. Price for Additional Student \$381.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2016: Part 3. Clearly, you use Excel a lot in your role. Otherwise, you wouldn't be taking this course. By now, you're already familiar with Excel 2016, its functions and formulas, a lot of its features and functionality, and its powerful data analysis tools. You are likely called upon to analyze and report on data frequently, work in collaboration with others to deliver actionable organizational intelligence, and keep and maintain workbooks for all manner of purposes. At this level of use and collaboration, you have also likely encountered your fair share of issues and challenges. You're too busy, though, to waste time scouring over workbooks to resolve issues or to perform repetitive, monotonous tasks. You need to know how to get Excel to do more for you so you can focus on what's really important: staying ahead of the competition. That's exactly what this course aims to help you do. This course builds off of the foundational and intermediate knowledge presented in the Microsoft Office Excel 2016: Part 1 and Part 2 courses to help you get the most of your Excel experience. The ability to collaborate with colleagues, automate complex or repetitive tasks, and use conditional logic to construct and apply elaborate formulas and functions will put the full power of Excel right at your fingertips. The more you learn about how to get Excel to do the hard work for you, the more you'll be able to focus on getting the answers you need from the vast amounts of data your organization generates. This course covers Microsoft Office Specialist exam objectives to help students prepare for the Excel 2016 Exam and the Excel 2016 Expert Exam.. Price for Additional Student \$381.00

Course Title	LO-091058-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Outlook 2016: Part 1 (Desktop/Office 365). Email has become one of the most widely used methods of communication, whether for personal or business communications. In most organizations, large or small, email is the preferred form of communicating information amongst employees. As email grows in popularity and use, most organizations have found the need to implement a corporate mail management system such as Microsoft Office Outlook to handle the messages and meeting invitations sent among employees. In this course, you will use Outlook to send, receive, and manage email messages, manage your contact information, schedule appointments and meetings, create tasks and notes for yourself, and customize the Outlook interface to suit your working style. This course is the first in a series of two Microsoft Office Outlook 2016 courses. It will provide you with the basic skills you need to start using Outlook 2016 to manage your email communications, contact information, calendar events, tasks, and notes. You can also use this course to prepare for the Microsoft Office Specialist (MOS) Certification exams for Microsoft Outlook 2016.. Price for Additional Student \$381.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Outlook 2016: Part 2. Every day, millions of email messages are exchanged among people within and between organizations. Email has a ubiquitous presence in the lives of many, and it's likely that email technologies will continue to evolve with the changing needs of workplaces. After all, email communication has not been replaced, or its growth slowed, as many predicted with the rise of social media and the widespread adoption of mobile technologies. Many organizations have implemented mail management systems that combine the back-end power of Microsoft Exchange Server and the front-end intuitive user interface of Microsoft Office Outlook 2016. In this course, you will customize command sets, configure mail accounts, set global options, perform advanced searches, apply filters to intercept mail and control spam, create rules to automate many management tasks, work with calendars and contacts, manage tasks, protect data with archiving and data files, as well as share and delegate access to your workspaces. In short, you'll work with a wide range of features and options and, in so doing, understand why Outlook is a leading personal management system. This course builds upon the foundational knowledge presented in the Microsoft Office Outlook 2016: Part 1 course and will help you customize a communication system well-suited to your work styles. In addition, this course will help you prepare for the Microsoft Office Specialist (MOS) Certification exam for Microsoft Outlook 2016.. Price for Additional Student \$381.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office PowerPoint 2016: Part 1 (Desktop/Office 365). It's hard to imagine a day going by without people passing along large amounts of information. Messages are everywhere, and the number of messages we receive seems to be increasing each day. Whether via phone, email, mass media, or personal interaction, we are subjected to a constant stream of information. With so much communication to contend with, it can be difficult to grab people's attention. But, we are often called upon to do just that. So, how do you grab and maintain an audience's focus when you're asked to present important information? By being clear, organized, and engaging. And, that is exactly what Microsoft Office PowerPoint 2016 can help you do. Gone are the days of flip charts or drawing on a white board to illustrate your point. Today's audiences are tech savvy, accustomed to high-impact multimedia content, and stretched for time. By learning how to use the vast array of features and functionality contained within PowerPoint 2016, you will gain the ability to organize your content, enhance it with high-impact visuals, and deliver it with a punch. In this course, you will use PowerPoint 2016 to begin creating engaging, dynamic multimedia presentations. You can also use the course to prepare for the Microsoft Office Specialist (MOS) Certification exam for Microsoft PowerPoint 2016.. Price for Additional Student \$381.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office PowerPoint 2016: Part 2. Meetings, instruction, training, pitches; these are all a part of our daily lives. We are often called upon to deliver presentations with little notice, at multiple venues, and with varying requirements. And, some of these presentations include sensitive information that needs to be guarded. Given all the variables, it may seem an overwhelming task to deliver your content, on time, to all audiences, and to only those who need to see it. Oh, and by the way, you need to make it interesting, informative, and memorable. So, how do you do it? Without the help of a robust set of tools, it would be nearly impossible. But Microsoft Office PowerPoint 2016 provides you with a variety of such tools that can help you deliver content in nearly any situation, while saving time and effort. By taking advantage of these tools, you will be creating presentations that not only stand out from the crowd, but also don't consume all of your available time. You can also use the course to prepare for the Microsoft Office Specialist (MOS) Certification exam for Microsoft PowerPoint 2016.. Price for Additional Student \$381.00

Course Description	0.5 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2016/2019: Data Analysis with Power Pivot. We are now living in the age of big data. Data is being collected all the time and for increasingly detailed transactions. This can lead to an overwhelming amount of data, which brings about a need for people who can analyze large amounts of data quickly. Fortunately, Excel provides Power Pivot to help you organize, manipulate, and report on your data in the best way possible. Since a tool is only as good as the person using it, it is important to gain a solid understanding of Power Pivot to maximize your effectiveness when analyzing data. This course presents information and skills that are appropriate for users of either the Office 2016 or Office 2019 desktop applications. However, the instructional environment for the delivery of this course utilizes Office 2016.. Price for Additional Student \$381.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft SharePoint 2016: Site User. In many professional environments today, people work collaboratively in teams. Information technology and applications facilitate this by allowing people to easily share, access, edit, and save information. Microsoft SharePoint 2016 is a platform specifically designed to facilitate collaboration, allowing people to use familiar applications and Web-based tools to create, access, store, and track documents and data in a central location. In this course, you will learn about and use a SharePoint Team Site to access, store, and share information and documents. SharePoint is a complex platform with many features and capabilities. A strong understanding of those features and capabilities will allow you to work more efficiently and effectively with SharePoint, and with the documents and data stored in SharePoint. Furthermore, effective use of new social networking capabilities will allow you to identify, track, and advance issues and topics most important to you, and collaborate with colleagues more effectively.. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Publisher 2016/2019. Microsoft Office Publisher is a desktop publishing software application capable of producing greeting cards, certificates, newsletters, and other printed publications. Publisher includes a large collection of templates that provide a great way to start a new publication. Publisher offers a large selection of 'building blocks' that can be dragged into your documents, helping you to create page elements such as calendars, newsletter sidebars, and borders. Publisher integrates online sharing and mail merge features, which are handy when you need to send publications to a list of customers, and it's possible to export publications as HTML web pages or PDF documents. With a user-friendly interface, Publisher makes it easy to create and edit publications. This course presents information and skills that are appropriate for users of either the Office 2016 or Office 2019 desktop applications. Course Title	LO-091076-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2016/2019: Dashboards. Whether you need to crunch numbers for sales, inventory, information technology, human resources, or other organizational purposes and departments, the ability to get the right information to the right people at the right time can create a powerful competitive advantage. After all, the world runs on data more than ever before and that's a trend not likely to change, or even slow down, any time soon. But with so much data available and being created on a nearly constant basis, the ability to make sense of that data becomes more critical and challenging with every passing day. You already know how to get Microsoft Office Excel to perform simple calculations and how to modify your workbooks and worksheets to make them easier to read, interpret, and present to others. But Excel is capable of doing so much more. To gain a truly competitive edge, you need to be able to extract actionable organizational intelligence from your raw data, and present it in a visual format that enables decision makers to view key trends and conclusions at a glance. And that's exactly what this course aims to help you do. This course builds upon the foundational knowledge presented in theMicrosoft Office Excel 2016: Part 1 (Desktop/Office 365) or Microsoft Office Excel 2019: Part 1 courses and will help start you down the road to creating advanced workbooks and worksheets that you can use to create dashboards. The ability to analyze massive amounts of data, extract actionable intelligence from it, and present that information to decision makers is the cornerstone of driving a successful organization that is able to compete at a high level. This course presents information and skills that are appropriate for users of either the Office 2016 or Office 2019 desktop applications. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2019: Part 1. Organizations the world over rely on information to make sound decisions regarding all manner of affairs. But with the amount of available data growing on a daily basis, the ability to make sense of all of that data is becoming more and more challenging. Fortunately, this is where the power of Microsoft Office Excel 2019 can help. Excel can help you organize, calculate, analyze, revise, update, and present your data in ways that will help the decision makers in your organization steer you in the right direction. It will also make these tasks much easier for you to accomplish, and in much less time, than if you used traditional pen-and-paper methods or non-specialized software. This course aims to provide you with a foundation for Excel knowledge and skills, which you can build upon to eventually become an expert in data manipulation. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Excel Associate (Office 365 and Office 2019): Exam MO-200 and Excel Expert (Office 365 and Office 2019): Exam MO-201 certifications.. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2019: Part 3. Clearly, you use Excel a lot in your role. Otherwise, you wouldn't be taking this course. By now, you're already familiar with Microsoft Office Excel 2019, its functions and formulas, a lot of its features and functionality, and its powerful data analysis tools. You are likely called upon to analyze and report on data frequently, work in collaboration with others to deliver actionable organizational intelligence, and keep and maintain workbooks for all manner of purposes. At this level of use and collaboration, you have also likely encountered your fair share of issues and challenges. You're too busy, though, to waste time scouring over workbooks to resolve issues or to perform repetitive, monotonous tasks. You need to know how to get Excel to do more for you so you can focus on what's really important: staying ahead of the competition. That's exactly what this course aims to help you do. This course builds upon the foundational and intermediate knowledge presented in the Microsoft Office Excel 2019: Part 1 and Microsoft Office Excel 2019: Part 2 courses to help you get the most of your Excel experience. The ability to collaborate with colleagues, automate complex or repetitive tasks, and use conditional logic to construct and apply elaborate formulas and functions will put the full power of Excel right at your fingertips. The more you learn about how to get Excel to do the hard work for you, the more you'll be able to focus on getting the answers you need from the vast amounts of data your organization generates. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Excel Associate (Office 365 and Office 2019): Exam MO-200 and Excel Expert (Office 365 and Office 2019): Exam MO-201 certifications.. Course Title	LO-091081-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Outlook 2019: Part 1. Email has become one of the most widely used methods of communication, whether for personal or business communications. In most organizations, large or small, email is the preferred form of communicating information amongst employees. As email grows in popularity and use, most organizations have found the need to implement a corporate mail management system such as Microsoft Office Outlook to handle the messages and meeting invitations sent among employees. In this course, you will use Outlook to send, receive, and manage email messages, manage your contact information, schedule appointments and meetings, create tasks and notes for yourself, and customize the Outlook interface to suit your working style. This course is the first in a series of two Microsoft Office Outlook 2019 courses. It will provide you with the basic skills you need to start using Outlook 2019 to manage your email communications, contact information, calendar events, tasks, and notes. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Outlook Associate (Office 365 and Office 2019): Exam MO-400 certification.. Price for Additional Student \$381.00
Course Length	1 Day

Course Title	LO-091082-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Outlook 2019: Part 2. Every day, millions of email messages are exchanged among people within and between organizations. Email has a ubiquitous presence in the lives of many, and it's likely that email technologies will continue to evolve with the changing needs of workplaces. After all, email communication has not been replaced, or its growth slowed, as many predicted with the rise of social media and the widespread adoption of mobile technologies. Many organizations have implemented mail management systems that combine the back-end power of Microsoft Exchange Server and the front-end intuitive user interface of Microsoft Office Outlook 2019. In this course, you will customize command sets, configure mail accounts, set global options, perform advanced searches, apply filters to intercept mail and control spam, create rules to automate mail management tasks, work with calendars and contacts, manage tasks, preserve data with archives and data files, as well as share and delegate access to your Outlook items. In short, you'll work with a wide range of features and options and, in so doing, understand why Outlook is a leading personal management system. This course builds upon the foundational knowledge presented in the Microsoft Office Outlook 2019: Part 1 course and will help you customize a communication system well-suited to your work style. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Outlook Associate (Office 365 and Office 2019): Exam MO-400 certification.. Price for Additional Student \$381.00

Course Title	LO-091083-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Access 2019: Part 1. Data is everywhere. Most job roles today involve some form of data management. Virtually everyone is affected in some way by the need to manage data. A relational database application such as Microsoft Office Access can help you and your organization with this task. This course is the first part of a three-course series that covers the skills needed to perform database design and development in Access. Microsoft Office Access 2019: Part 1 (this course): Focuses on the design and construction of an Access database viewing, navigating, searching, and entering data in a database, as well as basic relational database design and creating simple tables, queries, forms, and reports. Microsoft Office Access 2019: Part 2 : Focuses on optimization of an Access database, including optimizing performance and normalizing data, data validation, usability, and advanced queries, forms, and reports. Microsoft Office Access 2019: Part 3 : Focuses on managing the database and supporting complex database designs , including import and export of data, using action queries to manage data, creating complex forms and reports, macros and VBA, and tools and strategies to manage, distribute, and secure a database. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Access Expert (Office 363 and Office 2019): Exam MO-500 certification.. Course Title	LO-091086-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel Online. Organizations the world over rely on information to make sound decisions regarding all manner of affairs. But with the amount of available data growing on a daily basis, the ability to make sense of all of that data is becoming more and more challenging. Fortunately, this is where the power of Microsoft Office 365 Excel Online can help. Excel can help you organize, calculate, analyze, revise, update, and present your data in ways that will help the decision makers in your organization steer you in the right direction. It will also make these tasks much easier for you to accomplish, and in much less time, than if you used traditional pen-and-paper methods or non-specialized software. This course aims to provide you with a foundation for Excel knowledge and skills, which you can build upon to eventually become an expert in data manipulation.. Price for Additional Student \$381.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office PowerPoint 2019: Part 1. It's hard to imagine a day going by without people passing along large amounts of information. With so much communication to contend with, it can be difficult to grab people's attention. But, we are often called upon to do just that. So, how do you grab and maintain an audience's focus when you're asked to present important information? By being clear, organized, and engaging. And, that is exactly what Microsoft Office PowerPoint 2019 can help you do. Gone are the days of flip charts or drawing on a white board to illustrate your point. Today's audiences are tech savvy, accustomed to high-impact multimedia content, and stretched for time. By learning how to use the vast array of features and functionality contained within PowerPoint 2019, you will gain the ability to organize your content, enhance it with high-impact visuals, and deliver it with a punch. In this course, you will use PowerPoint 2019 to begin creating engaging, dynamic multimedia presentations. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the PowerPoint Associate (Office 365 and Office 2019): Exam MO-300.. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office PowerPoint 2019: Part 2. Meetings, instruction, training, pitches; these are all a part of our daily lives. We are often called upon to deliver presentations with little notice, at multiple venues, and with varying requirements. And, some of these presentations include sensitive information that needs to be guarded. Given all the variables, it may seem an overwhelming task to deliver your content, on time, to all audiences, and to only those who need to see it. Oh, and by the way, you need to make it interesting, informative, and memorable. So, how do you do it? Without the help of a robust set of tools, it would be nearly impossible. But Microsoft Office PowerPoint 2019 provides you with a variety of such tools that can help you deliver content in nearly any situation, while saving time and effort. By taking advantage of these tools, you will be creating presentations that not only stand out from the crowd, but also don't consume all of your available time. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the PowerPoint Associate (Office 365 and Office 2019): Exam MO-300.. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Word 2019: Part 2. After you master the basics of creating, editing, and printing Microsoft Word documents, you're ready to move on to tackling the more advanced features. In this course, you will work with features such as formats, styles, and templates to create professional documents with a consistent look and feel. You will add visual interest to your documents by using the tables and charts features. Quick Parts and templates provide efficiency and consistency when adding content, and long complex documents can be simplified and managed in Master Documents. Finally, you will use the mail merge feature to automate sending individual letters to customers. Creating professional-looking documents can give you and your organization a competitive edge. Implementing time-saving features such as document templates and automated mailings can help reduce expenses. Mastering these techniques will make you a valued employee in your organization. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Word Associate (Office 365 and Office 2019): Exam MO-100 and Word Expert (Office 365 and Office 2019): Exam MO-101 certifications.. Course Description	1 Day Private/Onsite Class (Price for 8 students) 'Microsoft Office 365 Online (with Teams for the Desktop) note: for Office 2013, 2016, or later'. This course is an introduction to Microsoft Office 365 with Teams in a cloud-based environment. It can be used as an orientation to the full suite of Office 365 cloud-based tools, or the Teams lessons can be presented separately in a seminar-length presentation with the remaining material available for later student reference. Using the Office 365 suite of productivity apps, users can easily communicate and collaborate together through Microsoft Outlook mail and Teams messaging and meeting functionality. Additionally, the Microsoft SharePoint team site provides a central storage location for accessing and modifying shared documents. This course introduces working with shared documents in the familiar Office 365 online appsWord, PowerPoint, and Excelas an alternative to installing the Microsoft Office desktop applications. This course also introduces several productivity apps including Yammer, Planner, and Delve that can be used in combination by teams for communication and collaboration.. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft SharePoint Modern Experience: Site User. In many professional environments today, people work collaboratively in teams. Information technology and applications facilitate this by allowing people to easily share, access, edit, and save information. Microsoft SharePoint is a platform specifically designed to facilitate collaboration, allowing people to use familiar applications and web-based tools to create, access, store, and track documents and data in a central location. In this course, you will learn about and use SharePoint to access, store, share, and collaborate with information and documents. SharePoint is a complex platform with many features and capabilities. A strong understanding of those features and capabilities will allow you to work more efficiently and effectively with SharePoint, and with the documents and data stored in SharePoint. Furthermore, effective use of the Modern UI and Office 365 integrations will streamline tasks, and facilitate collaboration with colleagues in other Office 365 and third-party apps. Note: The skills covered in this course are appropriate both for Site Users who work in environments with SharePoint Online servers and for those using on-premise SharePoint servers in Modern Experience mode. This course covers the comprehensive suite of SharePoint online features and functions, which may go beyond what is available if the production environment is limited to SharePoint 2019 servers. How the environment is customized and configured will also affect how production sites compare to the sample sites shown in class.. Price for Additional Student \$381.00

Course Title	LO-091096-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft SharePoint Modern Experience: Site Owner with Microsoft Forms and Flow. Microsoft SharePoint is a platform designed to facilitate collaboration and allow people to use familiar applications and web-based tools to create, access, store, and track documents and data in a central location. As such, SharePoint has many distinct features that must be enabled and configured, and many content structures that can be selected, added, and configured. In this course, you will learn how to create, configure, and manage SharePoint sites so that your team or organization can share information and collaborate effectively. SharePoint content structures and configuration options are complex. Site owners must understand what features, options, and content structures are available in SharePoint, and how to properly configure them. With SharePoint sites, features, and content structures properly implemented, users will be able to securely share files, collaborate on documents, and access information they need to work with their colleagues more effectively. Note: The skills covered in this course are appropriate both for Site Owners who work in environments with SharePoint Online servers and for those using on-premises SharePoint servers in Modern Experience mode. Course Title	LO-091097-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft SharePoint Modern Experience: Advanced Site Owner. Microsoft SharePoint Online and SharePoint 2019 helps people collaborate and use familiar applications and web-based tools to create, access, store, and track documents and data in a central location. SharePoint can also help organizations segment digital information, share information from external sources, archive records, and create rich websites quickly and easily. In this course, you will learn how to create, configure, and manage a SharePoint site so that your team or organization can collaborate effectively, manage the flow of digital information, meet governance and compliance needs, and create rich websites for your organization's needs. SharePoint features are robust and complex. Site owners can determine what features and options to make available in SharePoint, and how to configure those features to meet organizational and user needs. By properly implementing these features, users will be able to collaborate effectively, and organizations will save time and money through automation of business processes, fast and efficient retrieval of information, and effective records management.. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Project 2019 (On-Premise or Online Editions): Part 1. Welcome to Microsoft Project 2019 (On-Premise or Online Editions): Part 1 . This course is designed to familiarize you with the basic features and functions of Microsoft Project so you can use it effectively and efficiently in a real-world environment. This course covers the critical knowledge and skills a project manager needs to create a project plan with Project during the planning phase of a project. In other words, if your supervisor assigns you to lead a project, this course will enable you to draft a project plan with Project and share it with your supervisor (and others) for review and approval. Note : This course is for anyone who has Project on the desktop, regardless of whether they purchased an on-premise edition or subscribed to a cloud-based (online) edition. Most project managers and project team members use the desktop application, so that is the main focus of this course. The main features of the online app are presented in an appendix.. Course Title	LO-091105-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office 2013: Transition from Office 2007/2010. Youve used Office 2007 or Office 2010 to create various types of business materials from documents in Microsoft Word to spreadsheets in Excel to presentations in PowerPoint. Perhaps you use Outlook to manage your calendar, contacts, and email or Access to manage inventory and trouble tickets. However you use Office, the fact is the Office suite of applications is the de-facto standard for business productivity software. Each new release of Office builds upon the successes of the previous generations. This course builds upon the foundational Microsoft Office 2007/2010 knowledge and skills youve already acquired. It focuses on the enhanced features youll want to leverage to improve the way you manage, organize, present, and distribute your companys data and information. Youll explore a variety of enhancements, from Words ability to edit PDF files to the new Flash Fill functionality in Excel that dramatically increases the speed at which you can add data to a spreadsheet. Youll discover how the cloud has been deeply integrated into your Office experience and how collaborating with colleagues has never been easier. This Microsoft Office 2013: Transition from Office 2007/2010 course will help you bridge the gap from the version you already know and love to the latest release of Microsofts flagship productivity suite.. Course Title	LO-091110-Public
Course Description	1 Day Public Class (Price for 1 student) Microsoft Project 2013: Part 1. Welcome to Microsoft Project 2013: Part 1. This course is designed to familiarize you with the basic features and functions of Microsoft Project Professional 2013 so that you can use it effectively and efficiently in a real-world environment. This course covers the critical knowledge and skills a project manager needs to create a project plan with Project 2013 during the planning phase of a project. In other words, if your supervisor assigns you to lead aproject, this course will enable you to draft a project plan with Project 2013 and share it with your supervisor (and others) for review and approval. You can also use this course to prepare for the Microsoft Office Specialist (MOS) Certification exam for Microsoft Project 2013.. Price for Additional Student \$476.00
Course Length	1 Day

Max. Participants	1
GSA Price (inc. IFF)	\$464.01
Course Title	LO-091111-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Project 2013: Part 2. Welcome to Microsoft Project 2013: Part 2. This course is designed to familiarize you with the advanced features and functions of Microsoft Project Professional 2013 so that you can use it effectively and efficiently in a real-world environment. In Microsoft Project 2013: Part 1,you learned the basic features of Microsoft Project Professional 2013 during the planning phase of a project. You gained the knowledge and skills to: Create a new project plan. This includes starting a blank project file or starting a project file from a template. Manage time in a project plan. This includes changing the project time frame and calendar. Manage tasks in a project plan. This includes adding tasks and linking them together into paths. Manage resources in a project plan. This includes adding people, equipment, and materials to a project and assigning them to tasks. Share a project plan. This includes saving, printing, emailing, and exporting project files. Microsoft Project 2013: Part 2 covers the advanced knowledge and skills a project manager needs to update a project plan in Project 2013 during the execution, monitoring, and controlling phases of a project. In other words, once your project plan is approved by the project sponsor, this course will enable you to manage the project so that it is completed on time, within budget, and according to scope. Each lesson in this course is built around the executing, monitoring, and controlling tasks that can be accomplished using the advanced commands found on one of these Project 2013 tabs: PROJECT, TASK, VIEW, or REPORT. This will enable you to become a 'power user' and leverage the full potential of the application.. Price for Additional Student \$381.00

Course Title	LO-091112-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office OneNote 2013. This course is intended to enable the typical student, educator, or business user of a desktop version of Microsoft Office (2007 or later) to productively use the key components of the Microsoft Office OneNote 2013 application on a desktop, laptop, or Microsoft Windows 8 tablet device, when working in or away from the primary office or study environment. OneNote has many features that can improve time management skills, including task lists and scheduling with Microsoft Outlook. OneNote also makes it easier to comprehend information by allowing for audio recording and even searching the audio recording for specific spoken words or phrases. Research can be accomplished on the web and links are maintained so you know where you found the information. These are just a few of the note-taking organization features that will be covered in this class. This course can also be used to prepare for the Microsoft Office Specialist (MOS) Certification exam.. Price for Additional Student \$381.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Visio 2013: Part 1. From the earliest eras of human existence, visual images have been used to represent knowledge, data, and information. Beginning with the Paleolithic cave paintings and continuing to today's most complex computer networks, these images leverage the ability of the human brain to rapidly perceive patterns and trends from visual representations. In today's workplace, visual diagrams are an essential part of communication, from road maps to sales flows to process charts. Visio provides you with an intuitive, customizable tool to easily create a professional-looking visual product by using its extensive gallery of shapes. By following the exercises in this course, you will create visually engaging diagrams, maps, and drawings, using graphical elements to make information easier to comprehend.. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Visio 2013: Part 2. Microsoft Visio stands out among similar applications because of its unique ability to draw a wide variety of diagrams, flowcharts, workflows, and organization structures anything that can be represented by shapes connected by lines. Most importantly, these shapes can be rearranged and with corresponding lines remaining intact. Visio has improved over the years as features common among Microsoft Office applications have been added. Today, Visio is well integrated with other members of the Office family as well as Microsoft's cloud-based services. This greatly enriches the sharing and publishing of Visio drawings. Microsoft Visio 2013 : Part 1, you learned the basic skills needed to create and modify various Visio drawings. Microsoft Visio 2013 : Part 2, you will learn about more advanced features making you a more efficient and effective Visio user.. Price for Additional Student \$381.00

Course Title	LO-091118-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Windows 8 and Office 2013: Making the Transition. Mobile devices are widely used. As a result, many business professionals find themselves performing a greater number of work-related tasks, from a variety of devices, regularly. You may find yourself included in this group of multiple-device users, although you might still perform a significant amount of your work from a desktop or a laptop computer. Being able to access your work from nearly anywhere is a matter of convenience and efficiency, but it also has its drawbacks. Some devices simply don't have the ability to run many of the applications you use in an office setting. You have likely experienced the frustration of trying to review a document from a mobile device only to encounter an error message. With the release of Windows 8 and Office 2013, Microsoft has made strides in bridging the gap between your laptop or desktop PC, and a variety of mobile devices. While this may bring us one step closer to the ability to work anywhere, any time, from any device, it can present some challenges. How can an operating system designed to work on mobile devices also function on a PC? How can you make a smooth transition from one type of device to another? And, how compatible can these vastly different environments really be?. Price for Additional Student \$381.00
Course Length	1 Day

Course Title	LO-091123-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office 2013: Transition from Office 2003. Youve used Office 2003 to create various types of business materials from documents in Microsoft Word to spreadsheets in Excel to presentations in PowerPoint. Perhaps you use Outlook to manage your calendar, contacts, and email or Access to manage inventory and trouble tickets. However you use Office, the fact is the Office suite of applications is the de-facto standard for business productivity software. Each new release of Office builds upon the successes of the previous generations. This course builds upon the foundational Microsoft Office 2003 knowledge and skills youve already acquired. It focuses on the enhanced features youll want to leverage to improve the way you manage, organize, present, and distribute your companys data and information. Youll explore a variety of enhancements, from Words ability to edit PDF files, to the new Flash Fill functionality in Excel that dramatically increases the speed at which you can add data to a spreadsheet. Youll discover how the cloud has been deeply integrated into your Office experience and how collaborating with colleagues has never been easier. The Microsoft Office 2013: Transition from Office 2003 course will help you bridge the gap from the version you already know and love to the latest release of Microsofts flagship productivity suite.. Course Title	LO-091130-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Windows 8.1: Transition from Windows 7. Mobile devices are becoming increasingly popular. As a result, many business professionals find themselves performing a greater number of work-related tasks, from a variety of devices, regularly. You may find yourself included in this group of multiple-device users. But, you still perform a majority, or at least a large part, of your work from a desktop or a laptop computer. While being able to access your work from nearly anywhere is a matter of convenience and efficiency, it also has its drawbacks. Some devices simply don't have the ability to run many of the applications you use in an office setting. You have likely experienced the frustration of trying to review a document from a mobile device, only to encounter an error message. With the release of Windows 8.1, Microsoft has made strides in bridging the gap between your laptop or desktop PC, and a variety of mobile devices. While this may bring us one step closer to the ability to work anywhere, any time, from any device, it can present some challenges. How can an operating system designed to work on mobile devices also function on a PC? How can you make a smooth transition from one type of device to another? And, how compatible can these vastly different environments really be? Because considerations such as these went into the design and development of Windows 8.1, you may find the Windows 8.1 environment to be a rather dramatic change from what you're used to. But, developing an understanding of how to accomplish your day-to-day work tasks in this new environment will push you one step closer to being able to comfortably work from a number of platforms, and a number of devices, nearly anywhere you go. Once you've gained a foundational understanding of how to operate within the Windows 8.1 environment from your PC, you'll be able to take full advantage of the many sharing, storing, and multi-platform benefits inherent in the Windows 8.1 operating system.. Price for Additional Student \$381.00

Course Title	LO-091136-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Excel for Office 365 (Desktop or Online): Part 1. Organizations the world over rely on information to make sound decisions regarding all manner of affairs. But with the amount of available data growing on a daily basis, the ability to make sense of all of that data is becoming more and more challenging. Fortunately, this is where the power of Microsoft Excel can help. Excel can help you organize, calculate, analyze, revise, update, and present your data in ways that will help the decision makers in your organization steer you in the right direction. It will also make these tasks much easier for you to accomplish, and in much less time, than if you used traditional pen-and-paper methods or non-specialized software. This course aims to provide you with a foundation for Excel knowledge and skills, which you can build upon to eventually become an expert in data manipulation. Note: Most Office 365 users perform the majority of their daily tasks using the desktop version of the Office software, so that is the focus of this training. The course material will also enable you to access and effectively utilize many web-based resources provided with your Office 365 subscription. This includes brief coverage of key skills for using Excel for the Web and OneDrive. Helpful notes throughout the material alert you to cases where the online version of the application may function differently from the primary, desktop version. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Excel Associate (Office 365 and Office 2019): Exam MO-200 and Excel Expert (Office 365 and Office 2019): Exam MO-201.. Price for Additional Student \$381.00

Course Title	LO-091137-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Excel for Office 365 (Desktop or Online): Part 2. Whether you need to crunch numbers for sales, inventory, information technology, human resources, or other organizational purposes and departments, the ability to get the right information to the right people at the right time can create a powerful competitive advantage. After all, the world runs on data more than ever before and that's a trend not likely to change, or even slow down, any time soon. But with so much data available and being created on a nearly constant basis, the ability to make sense of that data becomes more critical and challenging with every passing day. You already know how to get Microsoft Excel to perform simple calculations and how to modify your workbooks and worksheets to make them easier to read, interpret, and present to others. But, Excel is capable of doing so much more. To gain a truly competitive edge, you need to be able to extract actionable organizational intelligence from your raw data. In other words, when you have questions about your data, you need to know how to get Excel to provide the answers for you. And that's exactly what this course aims to help you do. This course builds upon the foundational knowledge presented in the Microsoft Excel for Office 365 (Desktop or Online): Part 1 course and will help start you down the road to creating advanced workbooks and worksheets that can help deepen your understanding of organizational intelligence. The ability to analyze massive amounts of data, extract actionable information from it, and present that information to decision makers is at the foundation of a successful organization that is able to compete at a high level. Note: Most Office 365 users perform the majority of their daily tasks using the desktop version of the Office software, so that is the focus of this training. Course Title	LO-091139-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Outlook for Office 365 (Desktop or Online): Part 1. Email has become one of the most widely used methods of communication, whether for personal or business communications. In most organizations, large or small, email is the preferred form of communicating information among employees. As email grows in popularity and use, most organizations have found the need to implement a corporate mail management system such as Microsoft Outlook to handle the messages and meeting invitations sent among employees. In this course, you will use Outlook to send, receive, and manage email messages; manage your contact information; schedule appointments and meetings; create tasks and notes for yourself; and customize the Outlook interface to suit your working style. Note : Most Office 365 users perform the majority of their daily tasks using the desktop version of the Office software, so that is the focus of this training. The course material will also enable you to access and effectively utilize many web-based resources provided with your Office 365 subscription. This includes brief coverage of key skills for using Outlook on the Web and OneDrive. Helpful notes throughout the material alert you to cases where the online version of the application may function differently from the primary, desktop version. This course is the first in a series of two Microsoft Outlook for Office 365 courses. It will provide you with the basic skills you need to start using Outlook to manage your email communications, contact information, calendar events, tasks, and notes. This course covers the Microsoft Office Specialist Program exam objectives to help you prepare for the Outlook Associate (Office 365 and Office 2019): Exam MO-400 certification exam.. Course Title	LO-091140-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Outlook for Office 365 (Desktop or Online): Part 2. Every day, millions of email messages are exchanged among people within and between organizations. Email has a ubiquitous presence in the lives of many, and it's likely that email technologies will continue to evolve with the changing needs of workplaces. After all, email communication has not been replaced, or its growth slowed, as many predicted with the rise of social media and the widespread adoption of mobile technologies. Many organizations have implemented mail management systems that combine the back-end power of Microsoft Exchange Server and the front-end intuitive user interface of Microsoft Outlook. In this course, you will customize command sets, configure mail accounts, set global options, perform advanced searches, apply filters to intercept mail and control spam, create rules to automate mail management tasks, work with calendars and contacts, manage tasks, preserve data with archives and data files, as well as share and delegate access to your Outlook items. In short, you'll work with a wide range of features and options and, in so doing, understand why Outlook is a leading personal management system. Note : Most Office 365 users perform the majority of their daily tasks using the desktop version of the Office software, so that is the focus of this training. The course material will also include helpful notes throughout the material to alert you to cases where the online version of the application may function differently from the primary, desktop version.C11 This course builds upon the foundational knowledge presented in the Microsoft Outlook for Office 365 (Desktop or Online): Part 1 course and will help you customize a communication system well-suited to your work style. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Word for Office 365 (Desktop or Online): Part 1. These days, most people take electronic word processing for granted. While we may still write out our grocery lists with pen and paper, we expect to use a computer to create the majority of our documents. It's impossible to avoid word-processing software in many areas of the business world. Managers, lawyers, clerks, reporters, and editors rely on this software to do their jobs. Whether you are an executive secretary or a website designer, you'll need to know the ins and outs of electronic word processing. Microsoft Word is designed to help you move smoothly through the task of creating professional-looking documents. Its rich features and powerful tools can make your work easy, and even fun. In this course, you'll learn how to use Word on the desktop to create and edit simple documents; format documents; add tables and lists; add design elements and layout options; and proof documents. Note: Most Office 365 users perform the majority of their daily tasks using the desktop version of the Office software, so that is the focus of this training. Course Title	LO-091163-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2021: Part 1. Organizations the world over rely on information to make sound decisions regarding all manner of affairs. But with the amount of available data growing on a daily basis, the ability to make sense of all of that data is becoming more and more challenging. Fortunately, this is where the power of Microsoft Office Excel 2021 can help. Excel can help students organize, calculate, analyze, revise, update, and present their data in ways that will help the decision makers in their organization steer them in the right direction. It will also make these tasks much easier for them to accomplish, and in much less time, than if they used traditional pen-and-paper methods or non-specialized software. This course aims to provide students with a foundation for Excel knowledge and skills, which they can build upon to eventually become an expert in data manipulation. This course covers Microsoft Office Specialist Program exam objectives to help students prepare for the Excel Associate (Office 365 and Office 2021): Exam MO-200 and Excel Expert (Office 365 and Office 2021): Exam MO-201 certifications.. Course Title	LO-091164-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2021: Part 2. Whether you need to crunch numbers for sales, inventory, information technology, human resources, or other organizational purposes and departments, the ability to get the right information to the right people at the right time can create a powerful competitive advantage. After all, the world runs on data more than ever before and that's a trend not likely to change, or even slow down, any time soon. But with so much data available and being created on a nearly constant basis, the ability to make sense of that data becomes more critical and challenging with every passing day. You already know how to get Microsoft Office Excel to perform simple calculations and how to modify your workbooks and worksheets to make them easier to read, interpret, and present to others. But, Excel is capable of doing so much more. To gain a truly competitive edge, you need to be able to extract actionable organizational intelligence from your raw data. In other words, when you have questions about your data, you need to know how to get Excel to provide the answers for you. And that's exactly what this course aims to help you do. This course builds upon the foundational knowledge presented in the Microsoft Office Excel 2021: Part 1 course and will help start you down the road to creating advanced workbooks and worksheets that can help deepen your understanding of organizational intelligence. The ability to analyze massive amounts of data, extract actionable information from it, and present that information to decision makers is at the foundation of a successful organization that is able to compete at a high level. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Excel Associate (Office 365 and Office 2021): Exam MO-200 and Excel Expert (Office 365 and Office 2021): Exam MO-201 certifications.. Price for Additional Student \$189.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Excel 2021: Part 3. Clearly, you use Excel a lot in your role. Otherwise, you wouldn't be taking this course. By now, you're already familiar with Microsoft Office Excel 2021, its functions and formulas, a lot of its features and functionality, and its powerful data analysis tools. You are likely called upon to analyze and report on data frequently, work in collaboration with others to deliver actionable organizational intelligence, and keep and maintain workbooks for all manner of purposes. At this level of use and collaboration, you have also likely encountered your fair share of issues and challenges. You're too busy, though, to waste time scouring over workbooks to resolve issues or to perform repetitive, monotonous tasks. You need to know how to get Excel to do more for you so you can focus on what's really important: staying ahead of the competition. That's exactly what this course aims to help you do. This course builds upon the foundational and intermediate knowledge presented in the Microsoft Office Excel 2021: Part 1 and Microsoft Office Excel 2021: Part 2 courses to help you get the most of your Excel experience. The ability to collaborate with colleagues, automate complex or repetitive tasks, and use conditional logic and dynamic arrays to construct and apply elaborate formulas and functions will put the full power of Excel right at your fingertips. The more you learn about how to get Excel to do the hard work for you, the more you'll be able to focus on getting the answers you need from the vast amounts of data your organization generates. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Excel Associate (Office 365 and Office 2021): Exam MO-200 and Excel Expert (Office 365 and Office 2021): Exam MO-201 certifications.. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Word 2021: Part 1. These days, most people take electronic word processing for granted. While we may still write out our grocery lists with pen and paper, we expect to use a computer to create the majority of our documents. It's impossible to avoid word-processing software in many areas of the business world. Managers, lawyers, clerks, reporters, and editors rely on this software to do their jobs. Whether you are an executive secretary or a website designer, you'll need to know the ins and outs of electronic word processing. Microsoft Word 2021 is designed to help you move smoothly through the task of creating professional-looking documents. Its rich features and powerful tools can make your work easy, and even fun. In this course, you'll learn how to use Word 2021 to create and edit simple documents; format documents; add tables and lists; add design elements and layout options; and proof documents. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Word Associate (Office 365 and Office 2021): Exam MO-100 and Word Expert (Office 365 and Office 2021): Exam MO-101 certifications.. Course Title	LO-091167-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office Word 2021: Part 2. After you master the basics of creating, editing, and printing Microsoft Word documents, you're ready to move on to tackling the more advanced features. In this course, you will work with features such as formats, styles, and templates to create professional documents with a consistent look and feel. You will add visual interest to your documents by using the tables and charts features. Quick Parts and templates provide efficiency and consistency when adding content, and long complex documents can be simplified and managed in Master Documents. Finally, you will use the mail merge feature to automate sending individual letters to customers. Creating professional-looking documents can give you and your organization a competitive edge. Implementing time-saving features such as document templates and automated mailings can help reduce expenses. Mastering these techniques will make you a valued employee in your organization. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Word Associate (Office 365 and Office 2021): Exam MO-100 and Word Expert (Office 365 and Office 2021): Exam MO-101 certifications.. Course Description	1 Day Private/Onsite Class (Price for 8 students) Microsoft Office PowerPoint 2021: Part 2. Meetings, instruction, training, and pitches are all part of our daily lives. We are often called upon to deliver presentations with little notice, at multiple venues, and with varying requirements. And, some of these presentations include sensitive information that needs to be guarded. Given all the variables, it may seem an overwhelming task to deliver your content on time, to all audiences, and to only those who need to see it. Oh, and by the way, you need to make it interesting, informative, and memorable. So, how do you do it? Without the help of a robust set of tools, it would be nearly impossible. But Microsoft PowerPoint 2021 provides you with a variety of such tools that can help you deliver content in nearly any situation, while saving time and effort. By taking advantage of these tools, you will be creating presentations that not only stand out from the crowd, but also don't consume all your available time. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the PowerPoint Associate (Office 365 and Office 2019): Exam MO-300.. Course Title	LO-092022-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Adobe InDesign CS6: Part 2. In Adobe InDesign CS6: Part 1 you were introduced to the many features that help you create professional looking documents. Now you need to create much lengthier interactive documents that need to be accessed across a range of devices. In this course, you will learn advanced InDesign techniques to enhance the look and functionality of your documents. Using Adobe InDesign, you can create interactive documents and export them for viewing in a web browser with various features such as buttons, page transitions, movies and audio files, hyperlinks and animation. You have the ability to assign color profiles and establish print presets. In creating longer documents, you'll be able to include such features as a table of contents, footnotes, cross-references and an index. This course is also designed to cover the InDesign CS6 Adobe Certified Expert (ACE) exam objectives.. Price for Additional Student \$381.00

Course Title	LO-092031-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Adobe Illustrator CS6: Part 1. To meet the demands of individuals and organizations for flexible, reusable, and easily modified visual content, Adobe Systems has created a cadre of applications that collectively provide a scalable, end-to-end solution for nearly every type of visual design project one can contemplate. Called Creative Suite 6 (CS6), the collection of applications perform specialized design tasks while interoperating among each other to deliver superlative content. This course focuses on Illustrator CS6, the component within CS6 used to create drawn graphics, while enabling its users to integrate content from other domains (such as photo-oriented graphics and animation, which belong to Photoshop and Flash). With Illustrator's many, easily used tools, you will discover that not only can you unlock the same creative impulses you've always had as you've picked up a pencil to sketch out an idea, but also capture those multiple ideas and what ifs during the creative process in ways that you never imagined. And for those of you who are just embarking on building your creative skills, you will be surprised at how good your work will appear even at the outset of your exploration of the world of graphic design. This course also is designed to cover the Illustrator CS6 Adobe Certified Expert (ACE) certification exam objectives.. Price for Additional Student \$381.00

Course Title	LO-092101-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Adobe Acrobat XI Pro: Part 1. Communicating ideas and information is the cornerstone of organizational operations. And, electronic forms of communication have made the transfer of knowledge quick, easy, and inexpensive. The ability to harness the potential of electronic forms of communication is critical in nearly every type of organization. But, in many, if not most, organizations, people work with a wide variety of devices running on a wide variety of platforms. And sometimes, what works well or looks good on one device, won't work at all on another device. Or, your carefully designed and formatted document may end up looking like a jumbled mess on someone else's computer. So, how do you balance the need to communicate ideas to large groups of people with the enormous diversity found in today's electronic devices? The answer: you don't have to because Adobe created the Portable Document Format as a solution to incompatible document formats. Adobe Acrobat XI Pro puts the power of the Portable Document Format, literally, at your fingertips. By taking advantage of the functionality and features available in Acrobat, you will ensure the integrity of your electronic documents regardless of who views them, on what devices, or with what operating systems. And that will give the confidence and peace of mind that comes with knowing that what you meant to communicate is what your document recipients will see.. Price for Additional Student \$381.00

Course Title	LO-093059-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) Certified Information Systems Security Professional (CISSP): Fifth Edition. Welcome to Certified Information Systems Security Professional (CISSP): Fifth Edition . With your completion of the prerequisites and necessary years of experience, you are firmly grounded in the knowledge requirements of todays security professional. This course will expand upon your knowledge by addressing the essential elements of the eight domains that comprise a Common Body of Knowledge (CBK) for information systems security professionals. The course offers a job-related approach to the security process, while providing a framework to prepare for CISSP certification. CISSP is the premier certification for todays information systems security professional. It remains the premier certification because the sponsoring organization, the International Information Systems Security Certification Consortium, Inc. (ISC)2 , regularly updates the test by using subject matter experts (SMEs) to make sure the material and the questions are relevant in todays security environment. By defining eight security domains that comprise a CBK, industry standards for the information systems security professional have been established. The skills and knowledge you gain in this course will help you master the eight CISSP domains and ensure your credibility and success within the information systems security field.. Price for Additional Student \$1,904.00

Course Description	5 Day Private/Onsite Class (Price for 8 students) Desktop Infrastructure Implementation (Exam 70-415). You designed and implemented an advanced server infrastructure. As the business expands, it is important for the organization to automate the Windows deployment process. You need to use several desktop infrastructure technologies to automate the Windows deployment in the organizational desktops. To meet these requirements, you will create desktop infrastructure by setting up image capture and managing WDS and MDT in the enterprise network. You will also configure DFSR server and SCCM, manage RD session host and connection manager, manage remote desktop gateway and web access to support OS deployment with optimized network performance. To ensure the smooth functioning of the desktop infrastructure implementation, you will configure desktops using the Lite-touch and Zero-touch deployments. In addition to these tasks, you will manage user state virtualization, implement user state migration, manage remote desktop gateway, configure RD virtualization host infrastructure, and manage desktop security options to create a centralized and secured data center. By familiarizing yourself with these tasks, you can plan and implement an effective Windows desktop infrastructure in your organization that suits the requirements of your business. In this course, you will implement desktop infrastructure.. Price for Additional Student \$1,904.00

Course Description	5 Day Private/Onsite Class (Price for 8 students) Desktop Application Infrastructure Implementation (Exam 70-416). You designed and implemented desktop infrastructure. As business operations expand, it is important for the organization to design, deploy, and manage an effective Windows Server 2012 desktop application infrastructure. You need to use several desktop infrastructure implementation methodologies to be able to design and manage a physical or virtual Windows desktop application management infrastructure. To meet these requirements, you will create a desktop application environment by planning the enterprise desktop application environment and preparing the environment for application distribution. You will also deploy desktop application using Group Policy and Windows Intune to quickly deploy desktop applications in the organizational network. To centrally manage application deployments and secure the applications from unauthorized access, you will configure SCCM for application deployment and deploy applications using SCCM. In addition to these tasks, you will deploy self-service portals, administer presentation virtualization infrastructure, manage remote applications, deploy application virtualization using App-V, configure high availability for App-V and application virtualization, manage application updates, and troubleshoot application compatibility issues to create a centralized and secured environment for desktop applications. By familiarizing yourself with these tasks, you can plan and implement an effective desktop application environment that suits the requirements of your business. Course Title	LO-093107-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) Microsoft SQL Server 2012: Database Querying (Exam 70-461). Managing required information by storing and retrieving data is part of Database Administrators day-to-day activities. One of the most effective ways to manage required information is by using databases. You may need to manipulate and modify your table data based on changing business requirements. The course, Microsoft SQL Server 2012: Database Querying will help you use SQL Server 2012 as a tool to manage organizational data. In today's competitive environment, information plays a vital role in determining the success of an organization. If you are able to effectively manage information, you can provide a competitive edge to your organization. Familiarizing yourself with database querying concepts will enable you to effectively manage your organizational data. In this course, you will create queries to retrieve, add, update, and maintain your database data. You will also work with data sorting, built-in functions, stored procedures, subqueries, table operators, set operators, conditional operators, views, indexes, and error handling features of SQL Server 2012.. Price for Additional Student \$1,904.00

Course Title	LO-094005-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) SQL Querying: Fundamentals. Many organizations use databases to store their most critical information: the information that manages their day-to-day operations. After the data is stored in databases, however, it is useless unless you can retrieve it for further business analysis. One example of a database management system is Microsoft SQL Server 2012. The language you use to retrieve information from SQL Server 2012 databases is the Structured Query Language (SQL). This course, SQL Querying: Fundamentals, will teach you to use SQL as a tool to retrieve the information you need from databases.. Price for Additional Student \$381.00
Course Length	1 Day

Course Title	LO-094006-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) SQL Querying: Advanced. In the course SQL Querying: Fundamentals, you learned the basics of SQL querying. Now that you have a foundation in how to query databases, you will learn in this course how to identify and use advanced querying techniques. In addition, you might find that you need to perform tasks such as modifying the structure of a table; inserting, updating, or deleting data; and indexing tables to optimize query performance. In this course, you will learn how to complete these tasks and more. In today's competitive environment, information is one of the most important factors in determining the success of an organization. If you are able to manage and retrieve information efficiently, you can streamline the organization's processes and give it a competitive edge. As the organization grows, you will need to handle large amounts of data. Under such circumstances, you might need to query multiple tables simultaneously and with increasing frequency. You must step up the speed of generating query output to cope with the increasing demands of data storage, management, and retrieval.. Price for Additional Student \$381.00
Course Length	1 Day

Course Title	LO-094007-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) HTML5: Content Authoring Fundamentals. In the current age, using the Internet has become essential to communication and gaining access to information, much like the telephone and newspapers were to earlier generations. Familiarity with the Internet comes with a certain level of expectation regarding the attractiveness and ease of use of web pages. Web designers need to create effective and successful websites. If users find your website difficult to navigate, they may not visit it again. HTML5 and CSS3 are some of the most integral and evolving web technologies that enable you to structure content and present it on the web. Knowledge of these languages will help you create web pages that are easy to read and appealing to users. This course lays the foundation for mastering these two popular web publishing technologies.. If users find your website difficult to navigate, they may not visit it again. HTML5 and CSS3 are some of the most integral and evolving web technologies that enable you to structure content and present it on the web. Knowledge of these languages will help you create web pages that are easy to read and appealing to users. This course lays the foundation for mastering these two popular web publishing technologies.. Price for Additional Student \$476.00
Course Length	1 Day

Max. Participants	1
GSA Price (inc. IFF)	\$464.01
Course Title	LO-094008-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) HTML5: Content Authoring with New and Advanced Features. HTML5 is the latest generation of markup languages used to create content for the web. It is also used as a programming language for mobile (smartphone and tablet) application development. When people say 'HTML5,' they typically mean not only the latest version of HTML, but also CSS, JavaScript, and various markup languages used to represent other kinds of web content, such as SVG (graphics) and MathML (mathematical formulas). Web browsers, which display content coded in these languages, have evolved rapidly over the last few years. This course focuses on the new and advanced features of HTML5, covering how to create HTML5 and CSS3 markup that will work well on the widest possible variety of web browsers, mobile devices, and machine readers, such as search engine web crawlers. The course also demonstrates how to use advanced HTML5 multimedia features such as video, audio, and animation.. Price for Additional Student \$381.00
Course Length	1 Day

Course Description	3 Day Private/Onsite Class (Price for 8 students) Developing Secure Android Apps for Business. Android is the most widely used mobile operating system today. Not only does it have the largest market share of smartphone and tablet operating systems, but Android also powers devices such as TV streaming boxes, digital cameras, vehicle dashboards, and much more. In this course, you will learn how to develop and publish an Android app, focusing on developing business apps for tablets and smartphones that are compatible with a wide variety of Android versions and device layouts. This course is also designed to assist you in preparing for the Master Mobile Application Developer (MMAD) (Exam MAD-111) certification examination. What you learn and practice in this course can be a significant part of your preparation for portions of that certification.. Price for Additional Student \$1,142.00

Course Description	3 Day Private/Onsite Class (Price for 8 students) Developing Secure Universal Windows Platform Apps in C# and XAML. Microsoft Windows 10 has merged the software platforms for Windows applications into a single Universal Windows Platform (UWP) that makes it relatively straightforward to develop one app that runs on phones, tablets, computers, and other devices. Microsoft has provided various tools and programming languages to support development in this platform, giving the developer the ability to use tools and techniques that they are most comfortable with. With Visual Studio (even with the free Community edition), the developer can choose to program Windows applications using a variety of languages. This course introduces students to Windows 10 application development using C# (pronounced 'see sharp') and XAML (pronounced 'zammel'). You can take this course as part of your preparation for a certification exam such as that for MCSD: Universal Windows Platform.. Price for Additional Student \$1,142.00

Course Title	LO-094018-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) SQL Querying: Fundamentals (Second Edition). Organizations typically store their most critical informationthe information used to manage day-to-day operationswithin a database. The ability to retrieve and analyze this information is essential to the functioning of the organization. Structured Query Language (SQL) is the primary language used to accomplish such tasks. Essentially, SQL is the language you use to interact with a database. The ability to write SQL is an essential job skill for those who need to manage large volumes of data, produce reports, mine data, or combine data from multiple sources. Even if someone else on your team creates reports for you, having a fundamental understanding of SQL querying will help you ask the right questions and know what you're looking for in your data analysis tools. This course, SQL Querying: Fundamentals (Second Edition), will teach you to use SQL as a tool to retrieve the information you need from databases.. Price for Additional Student \$381.00

Course Title	LO-094019-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) SQL Querying: Advanced (Second Edition). In today's competitive environment, information is one of the most important factors in determining the success of an organization. If you are able to manage and retrieve information efficiently, you can streamline the organization's processes and give it a competitive edge. Some data analysis tasks may require that you query multiple tables simultaneously or create complex views of data. In the course SQL Querying: Fundamentals (Second Edition), you learned the basics of SQL querying. In this course, you will build on this foundation, learning advanced querying techniques, such as writing nested queries, using JOINS to combine data from multiple tables, summarizing query results, using advanced filtering, and using views to simplify repetitive querying tasks. You will also learn how to perform common database administration tasks such as duplicating tables, modifying table structures, inserting, updating, or deleting data, and indexing tables to optimize query performance. You will also learn how to work with multiple tasks as a transaction.. Price for Additional Student \$381.00

Course Title	LO-094020-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Database Design: A Modern Approach. For many new or intermediate database developers, its difficult to know where to start when designing a relational database. Its easy to make the mistake of assuming that the functionality of a database will take shape over time, or the design will fall into place as you build the database. This course introduces a process for effectively planning and designing a functional, efficient database. Knowing how to plan a relational database is important to the success of the databases you create. Without planning, you cannot possibly know what the database needs to do, or even what information to include in the database. Planning a database is essential and prevents the extra work of fixing data maintenance problems later on. The concepts are not specific to a particular software application and can be applied to any relational database management system.. Price for Additional Student \$381.00

Course Description	3 Day Private/Onsite Class (Price for 8 students) Google AdWords Exam Preparation: Fundamentals and Search Advertising. In today's technologically connected society, people have access to information almost everywhere they go on a variety of devices. All strong marketing campaigns should incorporate some form of web-based advertising. Google AdWords is a web-based advertising tool that allows individuals and organizations to advertise on the Internet. Google AdWords is the most popular web advertising tool and operates on the largest connected set of networks, Google's networks. Google AdWords is simple to start using, but is difficult to master. AdWords campaigns have many components that must work together well to create an effective ad campaign. Managing an AdWords campaign involves constant monitoring, analysis, and refinement to improve campaign performance. In this course, you will create a Google AdWords account and an AdWords campaign. You will create both text and image ads, and target campaigns to specific audience segments by using advanced AdWords features. You will refine and optimize all aspects of your AdWords campaigns from ads, to keywords, to bidding, to budgets. You will also use advanced tools to manage AdWords accounts and data.. Course Description	1 Day Private/Onsite Class (Price for 8 students) Google Analytics: Foundation. Every business and organization has a web presence. It may be a single website or multiple websites, mobile applications, or any combination. However your organization presents itself on the web, managing its web presence is vital to its success. Knowing how people and customers interact with your websites and mobile applications can provide potent insights into how well the messages, pages, and other content on your website is received. By monitoring, tracking, and analyzing visitors to your website and their activities on your website, you can draw conclusions about the effectiveness of your site content, promotions, and advertising campaigns and technical details such as site architecture and navigation. Google Analytics is a robust analytics suite that is integrated with Google's data and other application service offerings such as AdWords and AdSense. Google Analytics is free to use and easy to set up. It allows your organization to track user actions on your web properties and use Google Analytics' rich reporting and analysis tools to analyze data, measure discrete interactions on your site, and qualify the success of your web initiatives. With Google Analytics, you can define success metrics for your website and measure that performance through data analysis. Google Analytics also lets you monitor your site in real-time, and provide alerts when events occur that are out of the norm. Although it is easy to start using Google Analytics, its robust and complex suite of tools will take time to master. In this course, you will create a Google Analytics account, create multiple web properties to monitor, and tag website pages with Google Analytics tracking code. You will then create multiple views for collecting and analyzing data, and create filters, goals, and funnels for your views. You will then use Google Analytics real-time reports and dashboards to perform quick analysis of your monitored websites. Finally, you will perform more in-depth analysis of website data by using Google Analytics reports.. Price for Additional Student \$381.00

Course Title	LO-095101-Private/Onsite
Course Description	5 Day Private/Onsite Class (Price for 8 students) Salesforce.com: Sales Cloud Administration Essentials. Whether you are a new Salesforce system administrator or have been managing Salesforce for some time, you probably know that a big part of the job is receiving and acting on requests from management or other Salesforce users to modify the system to meet the needs of the users and the company. The nature of Salesforce is such that there are almost always several ways to accomplish these types of modifications, so how will you know that you're taking the right approach and really providing the support that is needed? By completing this course, you will identify information about the five native business processes every company can manage using Salesforce, regardless of the License Edition. You will also gain insight into each of the functional groups of users (Inside Sales, Outside Sales, Marketing, Customer Support, and Management), and you will establish patterns of critical thinking that can help you to ensure that you are indeed taking the right approach and providing the necessary support for each request you receive. Ultimately, completing this course enables you to be a vital resource for knowing how to configure the system in a manner that also allows the extraction of intelligence needed to measure and improve the company's key performance indicators.. Price for Additional Student \$1,904.00

Course Description	2 Day Private/Onsite Class (Price for 8 students) Crystal Reports 2013: Part 2. Until now, you have used Crystal Reports to build and modify reports. You want to use the advanced functionality of Crystal Reports to generate reports in the format you desire. In this course, you will create complex reports and data sources using the tools in Crystal Reports 2013. You will not only create more sophisticated reports including subreports and cross-tabs, but you will also increase the speed and efficiency of your reports by using SQL queries. Even though you are familiar with Crystal Reports, you may take some time to study its various tools that enable you to generate reports with the desired data using advanced methods such as SQL querying. This way, you won't be slowed down by large databases or databases with which you are unfamiliar. By creating subreports, cross-tabs, and running totals, you will turn raw data into meaningful customized reports that will help your business run more smoothly. If you work with large databases, you may find yourself faced with performance issues. In this course, you will also learn to use tools that can increase the speed with which data is retrieved.. Price for Additional Student \$762.00

Course Description	2 Day Private/Onsite Class (Price for 8 students) Tableau Desktop: Part 1. As technology progresses and becomes more interwoven with our businesses and lives, more and more data is collected about business and personal activities. This era of 'big data' has exploded due to the rise of cloud computing, which provides an abundance of computational power and storage, allowing organizations of all sorts to capture and store data. Leveraging that data effectively can provide timely insights and competitive advantages. The creation of data-backed visualizations is a key way data scientists, or any professional, can explore, analyze, and report insights and trends from data. Tableau software is designed for this purpose. Tableau was built to connect to a wide range of data sources, and allows users to quickly create visualizations of connected data to gain insights, show trends, and create reports. Tableau's data connection capabilities and visualization features go far beyond those that can be found in spreadsheets, allowing users to create compelling and interactive worksheets, dashboards, and stories that bring data to life and turn data into thoughtful action.. Course Title	LO-097017-Public
Course Description	1 Day Public Class (Price for 1 student) Logical Selling: A Practical Approach for Increasing Sales Results. Sales professionals need a system for producing sales results. Logical Selling: A Practical Approach for Increasing Sales Results provides that framework and the tools to make it your own. In this course, you will identify what makes your product stand out and plan a strategy for reaching the customers who need it. You will also examine the stages of each sale from finding the opportunity to realizing the deal and use them to create win-win situations for you and your customer. Finally, you will build the interpersonal and negotiating skills to form lasting business relationships from these successes.. Price for Additional Student \$476.00

Course Description	1 Day Private/Onsite Class (Price for 8 students) DEBIZ (Exam DEB-110): Data Ethics for Business Professionals. The power of extracting value from data utilizing Artificial Intelligence, Data Science and Machine Learning exposes the learning differences between humans and machines. Humans can apply ethical principles throughout the decision-making process to avoid discrimination, societal harm, and marginalization to maintain and even enhance acceptable norms. Machines make decisions autonomously. So how do we apply ethical principles to data driven technology? This course provides business professionals and consumers of technology core concepts of ethical principles, how they can be applied to emerging data driven technologies and the impact to an organization which ignores ethical use of technology. CertNexus is recognized by SHRM to offer Professional Development Credits (PDCs) for SHRM-CP or SHRM-SCP recertification activities.. Price for Additional Student \$448.00

Course Description	5 Day Private/Onsite Class (Price for 8 students) Automating Administration with PowerShell. This course provides students with the fundamental knowledge and skills to use PowerShell for administering and automating administration of Windows servers. This course provides students the skills to identify and build the command they require to perform a specific task. In addition, students learn how to build scripts to accomplish advanced tasks such as automating repetitive tasks and generating reports. This course provides prerequisite skills supporting a broad range of Microsoft products, including Windows Server, Windows Client, Microsoft Azure, and Microsoft 365. In keeping with that goal, this course will not focus on any one of those products, although Windows Server, which is the common platform for all of those products, will serve as the example for the techniques this course teaches.. Course Description	4 Day Private/Onsite Class (Price for 8 students) Configuring and Operating Microsoft Azure Virtual Desktop. This course teaches Azure administrators how to plan, deliver, and manage virtual desktop experiences and remote apps, for any device, on Azure. Lessons include implementing and managing networking for Azure Virtual Desktop, configuring host pools and session hosts, creating session host images, implementing, and managing FSLogix, monitoring Azure Virtual Desktop performance and health, and automating Azure Virtual Desktop management tasks. Students will learn through a mix of demonstrations and hands-on lab experiences deploying virtual desktop experiences and apps on Azure Virtual Desktop and optimizing them to run in multi-session virtual environments. Candidates of this course must have solid Azure administration skills. This course assumes prior experience, including virtualization, networking, identity, storage, backup and restore, and disaster recovery. Students should have knowledge of on-premises virtual desktop infrastructure technologies as they relate to migrating to Azure Virtual Desktop. Students are expected to have used the tools common to the Azure environment, such as the Azure PowerShell and Cloud Shell.. Price for Additional Student \$1,523.00

Course Description	4 Day Private/Onsite Class (Price for 8 students) Data Engineering on Microsoft Azure. In this course, the student will learn about the data engineering as it pertains to working with batch and real-time analytical solutions using Azure data platform technologies. Students will begin by understanding the core compute and storage technologies that are used to build an analytical solution. The students will learn how to interactively explore data stored in files in a data lake. They will learn the various ingestion techniques that can be used to load data using the Apache Spark capability found in Azure Synapse Analytics or Azure Databricks, or how to ingest using Azure Data Factory or Azure Synapse pipelines. The students will also learn the various ways they can transform the data using the same technologies that is used to ingest data. They will understand the importance of implementing security to ensure that the data is protected at rest or in transit. The student will then show how to create a real-time analytical system to create a real-time analytical solutions.. Price for Additional Student \$1,523.00

Customer Data Platform specialists implement solutions that provide insight into customer profiles and that track engagement activities to help improve customer experiences and increase customer retention. In this course, students will learn about the Dynamics 365 Customer Insights solution, including how to unify customer data with prebuilt connectors, predict customer intent with rich segmentation, and maintain control of customer data. This course begins with importing and transforming your customer data and culminates with extending your customer data platform solution into the Power Platform and Dynamics 365 applications.. Price for Additional Student \$1,904.00
Course Length	4 Day

Course Title	MOC-MB-800T00-Private/Onsite

Course Description	4 Day Private/Onsite Class (Price for 8 students) Microsoft Dynamics 365 Business Central Functional Consultant. Built and optimized for small and medium businesses, Dynamics 365 Business Central is an application for companies that have outgrown their entry-level business applications. Growing businesses often outgrow their basic accounting software or legacy enterprise resource planning (ERP) systems that are unable to handle increased inventory and transactions, lack integration with other line-of-business systems, and have reporting limitations. Businesses are also challenged with the logistics of providing services that have more scalability, increased mobility, and availability in the cloud. With Business Central, you can manage your financials, automate and secure your supply chain, sell smarter, improve customer service and project performance, and optimize your operations.. Price for Additional Student \$1,523.00
Course Length	4 Day

Course Title	OLEK-100-Private/Onsite

Course Description	1 Day Private/Onsite Class (Price for 8 students) Effective Business Writing (Second Edition). Though businesses increasingly rely on technology, technological skills alone do not guarantee success in the workplace. Students must still develop their ideas, express them clearly, and persuade others of their viability. This course offers effective strategies to sharpen their writing skills by structuring their ideas logically, exercising diplomacy in letters and reports, and shaping their arguments. In contemporary business environments, information overload makes it necessary for them to communicate clearly and concisely. Trying to make sense of a disorganized email message can be frustrating given the number of emails they have to answer daily. By analyzing their audience, organizing their writing, and employing effective persuasive techniques, their writing will make an impact.. Price for Additional Student \$374.00
Course Length	1 Day
Min. Participants	1
Max. Participants	8
GSA Price (inc. IFF)	\$1824.85

Course Description	1 Day Private/Onsite Class (Price for 8 students) Coaching for Results (Second Edition). As a leader in your organization, you're expected to help people meet or exceed expectations and to help ensure productivity and profitability for the organization. Coaching is a leadership tool that is effective in improving performance and contributing to the goals of the organization. In this course, you will build a foundation for coaching, establish a coaching process, execute a coaching plan, and explore strategies for coaching in different business scenarios. Many different factors can affect employee performance. When performance problems arise, people need to be supported to get back on track and do their jobs well. Coaching is an effective way of confirming an employee's value while improving performance. Coaching contributes to employee retention because it offers the opportunity to grow, provides motivation, and supports learning. Coaching also enhances the image and effectiveness of managers and supervisors.. Price for Additional Student \$374.00

Course Title	OS100-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) OpenStack Essentials. Are you looking at moving your legacy infrastructure and applications to the Cloud? Which Cloud software do you use? Do you need a Public Cloud or a Private Cloud? Perhaps, a Hybrid Cloud. This course will help you answer those questions and more using OpenStack as your Cloud platform. OpenStack uses a modularized architecture. You can start with a core set of services for IaaS and then expand to include other services as you grow. For example, when you are ready to containerize your legacy applications, you can add OpenStack components to build & manage your container orchestration engine (COE) cluster, as well as the containers and pods. Other components discussed deploy bare metal machines, provide cloud billing & rating, and more. All Mirantis OpenStack courses are vendor agnostic. Tasks are performed in an OpenStack environment without any vendor add-ons that might change the way OpenStack works. Reference implementations are utilized, such as Logical Volume Manager (LVM) for Block Storage, Open vSwitch (OVS) for L2 networking, or KVM/QEMU for the hypervisor.. Price for Additional Student \$509.00
Course Length	1 Day
Min. Participants	1

Max. Participants	8

Course Title	OS320-Private/Onsite
Course Description	2 Day Private/Onsite Class (Price for 8 students) Advanced OpenStack Deployment and Debug - Ussuri. Need to build a private Cloud? Perhaps youve actually done that. Did you succeed? The OS320: Advanced OpenStack Deployment and Debug course is an in-depth 2 day course that provides you with a working set of lab exercises to deploy OpenStack in a private Cloud. The content is also suitable for cloud support personnel who need to understand how their OpenStack cloud was built. The course ends with an in-depth review of the various log files while deploying an instance to provide you with troubleshooting techniques for handling errors. The course begins with an Ubuntu environment with the stable Ussuri code branch. You execute the necessary tasks to install the OpenStack components (see outline below). Typically, this involves installing 1 or more Linux packages (the code), editing 1 or more configuration files, setting up the databases and database tables, restarting the services, & verifying your work. At the end of the lab exercises, you have your own private cloud using all of the default drivers (such as, KVM for the hypervisor, and OVS for layer 2 networking) At the end of OS320, you have the skills required to pass the COA exam. All Mirantis OpenStack courses are vendor agnostic. Tasks are performed in an OpenStack environment without any vendor add-ons that might change the way OpenStack works. Reference implementations are utilized, such as Logical Volume Manager (LVM) for Block Storage, Open vSwitch (OVS) for L2 networking, or KVM/QEMU for the hypervisor.. Course Title	SCRTY-110-Private/Onsite
Course Description	3 Day Private/Onsite Class (Price for 8 students) Ghidra. Ghidra, an open-source software reverse engineering (SRE) framework created by the NSA research directorate, enables users to analyze compiled code on any platform, whether Linux, Windows, or macOS. This course is a starting point for developers interested in leveraging Ghidra to create patches and extend tool capabilities to meet their cybersecurity needs. They will begin by installing Ghidra and exploring its features, and gradually learn how to automate reverse engineering tasks using Ghidra plug-ins. They will then see how to set up an environment to perform malware analysis using Ghidra and use it in the headless mode. As they progress, they will use Ghidra scripting to automate the task of identifying vulnerabilities in executable binaries. The course also covers advanced topics such as developing Ghidra plug-ins, developing their own GUI, incorporating new process architectures if needed, and contributing to the Ghidra project.. Course Title	SSMG-140-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) Storytelling with Data. This engaging workshop teaches the fundamentals of effective visualization, with emphasis on building a compelling narrative around the information you want to communicate. These lessons are made concrete through numerous real-world examples, and participants get hands-on practice in an interactive session. The goal of this workshop is to bring data to life and use it to communicate a story to an audience, with a focus on simplicity and ease of interpretation. Based on the strategies covered in the best-selling book, storytelling with data: a data visualization guide for business professionals. The focus is on general best practices and is not tool specific. While illustrative examples are primarily Excel and PowerPoint-based, we emphasize concepts and approaches that can be applied in any graphing application or presentation software.. Course Description	2 Day Public Class (Price for 1 student) Introduction to RPA for Business Course. The Introduction to Robotic Process Automation for Business course is intended to introduce Robotic Process Automation (RPA) to business and finance students. The course assumes no prior knowledge of RPA. It equips the student with skills that will help him identify automation opportunities in an organization. It deep dives into the different stages of automation journey with a focus on the role of a Business Analyst. It further builds on these concepts and explains how to gauge the success of automation implementation in an organization. The last section of the course challenges the students to apply RPA to business skills and come up with new processes that would not have been possible without RPA.. Price for Additional Student \$1,240.00
Course Length	2 Day
Min. Participants	1
Max. Participants	1
GSA Price (inc. IFF)	\$1208.77
Course Title	UIP-500-Private/Onsite
Course Description	1 Day Private/Onsite Class (Price for 8 students) SAP Automation with RPA. SAP Automation with RPA course offers basic knowledge and skills focused on developing and deploying software robots for automating processes of SAP WinGUI application. The course assumes that the student has a working knowledge of SAP WinGUI application and has completed Step into RPA or Introduction to RPA for Business course offered through UiPath Academic Alliance. A student undergoing the course shall develop the competence to automate a defined process in SAP WinGUI application. The course consists of 2.5 hours of theory lessons and two projects (3 hours/project). SAP Automation with RPA course is available in both Studio and StudioX.. Price for Additional Student \$496.00
Course Length	1 Day
Min. Participants	1
Max. Participants	8

Course Description	5 Day Private/Onsite Class (Price for 8 students) Business Analysis for RPA. The Business Analysis for Robotic Process Automation (RPA) course offers comprehensive knowledge and professional-level skills focused on developing knowledge skills and tools necessary to elicit, document, deliver and manage requirements throughout the technology delivery life-cycle. The course assumes no prior knowledge of the Business Analysis vocation. It consists of 30 hours of a theory component and an associated 12 hours of In-class activities component. The course also includes a capstone project (15 hours). The course prepares the student for UiPath RPA Business Analyst Associate (UiRBA) Certification. UiPath Certified Professional is the RPA industrys leading certification program and the RPA Business Analyst Associate (UiRBA) provides unique credentials validating your skills-sets in the discipline of Business Analysis in RPA. This course is endorsed by the International Institute of Business Analysis (IIBA), the worlds leading professional association of Business Analysis professionals. IIBA connects 30,000 Members, 120 Chapters, and 500 training, academic, and enterprise partners worldwide. As part of UiPath-IIBA partnership, IIBA offers special benefits to the students of this course. Throughout this course, students are supplemented with a student workbook, Business Analysis Templates, and with a practical, experiential case study to support learning. Throughout the 42 hours of study, students will complete reflective activities, review exemplars, and apply the techniques learned throughout the theory section of the course.. Price for Additional Student \$2,480.00

GSA Price (inc. IFF)	\$1368.63
Course Title	WDWP-160-Private/Onsite

Course Description	4 Day Private/Onsite Class (Price for 8 students) Advanced Perl Programming. This four-day course offers many benefits for organizations that do a significant amount of Perl programming. Several chapters teach advanced productivity features of the Perl language itself, including debugging techniques, sophisticated list usage, code references, tied variables, and effective package use. The course puts programmers on very solid ground for doing object-oriented programming in Perl. Programmer productivity increases tremendously by reusing modules written by others, so this course teaches how to find, install, and use libraries of routines from the thousands of freely available Perl modules on the Web. Students learn how to use SQL to access relational databases (such as Oracle) with the DBI/DBD Perl modules - most production Perl programs need to do this, especially web-based back-end server programs. Students will also learn how to build graphical interfaces in Perl using the Perl/Tk module. The course teaches several other productivity features as well, including extending Perl with C/C++, embedding the Perl interpreter in another language, documentation with POD directives, module development and distribution, and advanced Perl design and implementation considerations.. Price for Additional Student \$1,498.00
Course Length	4 Day
Min. Participants	1
Max. Participants	8

Course Title	WDWP-170-Private/Onsite

Course Description	5 Day Private/Onsite Class (Price for 8 students) Perl Programming on UNIX. Perl began as a text-processing language, an extension to the popular but limited awk language. Perl evolved into a general-purpose programming language popular with web developers, database developers, and many other types of programmers. Perl is very strong at processing large amounts of data, including manipulation, analysis, validation, conversion, formatting, and reporting. It offers complete libraries for database access, web development, graphics programming, and other environmental requirements. This five-day course teaches students the foundations of using Perl effectively in many application environments. In addition to teaching the basics, such as data types, operators, flow control, and subroutines, the course goes into great detail on using arrays and hashes for complex data manipulation, regular expressions for advanced text processing, and Perl's object-oriented features for modern OO programming practices. Students write many complete Perl programs in this course, which ensures that when they return to work they can become productive immediately.. Price for Additional Student \$1,872.00
Course Length	5 Day
