

## iOS Deployment Training

Through Apple Authorized courses, our **iOS Deployment Training** provides the skills, tools and knowledge to set up, deploy and explain key features native to iOS devices and applications. Interactive discussions and hands-on exercises guide IT professionals through the deployment and management of iOS devices. Activities are also designed to instruct technical sales professionals on how to assist customers in the purchasing of iOS devices.

Use cases demonstrate how to enroll, configure, manage or move devices through various deployment scenarios and user questions, and addresses security in the context of those scenarios.
